The working (6,7): a clearer graphical derivation

106 listed moves in 75 independent steps | Clarity before count

READ THE PICTURES AS THREE DIFFERENT ACTIONS. A blue disk substitution changes factors by a named identity. A yellow sphere redraw changes only the drawing of the same curve or arc. A peripheral cleanup is shown on a separate line, after its curve is already peripheral.

What a step means. A numbered step is a set of independent factor-interval edits. Moves a,b,... are listed one after another for printing, but each starts from the SAME step input and they may be performed in either order. Every proposed parallel pair has a literal two-order certificate. A singleton step contains one move. Some independent edits are deliberately shown in separate steps for readability.

These numbers do not claim a shorter proof. This follows the longer 90-operation source, with the simpler early prefix, delayed petals, lower half meeting and returned round 45 loan: the F2 half-twist neighborhood has length 4 rather than 12, and the half-neighborhood total at the matched checkpoint drops from 80 to 72. These are support lengths in this chart; the maximum stays 30. The shorter 79-operation route remains archived. More complicated or more tangled curves are not preferable merely because they use fewer arrows. Future research will prioritize simpler arc/curve supports and their interactions.

Delayed petals. Keep the three-point root intact while the last two half twists are handled. Expand it only after those halves have combined, on its own step. This keeps 17 rows rather than 19 during the gather. The two actual half-twist classes are unchanged; this reduces diagram clutter, not arc complexity.

Framing ledger. The ledger is separate from the main factor list. The represented word is ledger times main factorization. During the five-point rechart, each same-curve redraw records its boundary correction here. The SIX corrections are kept explicitly, redrawn as one peripheral powered curve, and only then cleared. An individual curve rechart can carry a deck sign; the ledger retains it. A single five-point cap would have -I and is never silently used.

Drawing conventions. Read factors downward. All support diagrams keep the same unnumbered six-point grid: 18pt spacing and 1.26pt radius. Braids represent the pictured disk word and remain connected. Individual support pictures are not joint cut-system certificates. Parallel factor edits do not assert a simultaneous ambient isotopy of an entire joint cut system.

Let the final half twists meet lower

The same two arcs; a different meeting place; two more listed moves.

The two remaining half twists already have the same arc. The old route carried the lower half twist upward through all six intervening factors. That made several surrounding curves wind more before the half twists could combine.

The new route. Carry the upper half twist DOWN past the first five intervening factors. Independently, carry the lower half twist UP past the squared pair. Each carried half twist keeps its original arc; the crossed factors change by the displayed Hurwitz moves. These two carries act on disjoint factor intervals, so both start from the same input and either order gives exactly the same result.

The halves are now adjacent near the bottom of that interval. Combine them THERE into their full twist. Only then carry the full twist upward through the five neighbors. This rejoins exactly the previous complete derivation; the retained three-point root still expands later on its own step.

What this improves. While the two half twists remain, the exact closed-neighborhood crossing sum is at most 936 rather than 1094, and the largest pair has 36 crossings rather than 48. Several surrounding curves show less nested winding. The half arcs themselves are unchanged. These are closed-neighborhood counts, not intersections of the arcs or one jointly minimal drawing.

The tradeoff. The support-word maximum in this local route is 18 rather than 17. Four listed moves and eleven adjacent checks replace two moves and six checks. The final full-twist carry restores the old endpoint geometry after the halves disappear. This is a choice about clarity during the half-twist part, not a shorter proof or a reduction in overall geometric complexity.

Return the retained outer after borrowing 45

Two final pair curves straighten; five more source moves; no new sphere move.

Near the end, three standard unit exterior twists are already visible. The remaining four-point outer and four pair curves give a valid named daisy. Two of those pair curves still have nested winding, with support lengths 6 and 4.

The actual loan. Expand that retained outer by a fully matched PC daisy, on its own presentation step. Its checked internal chart lends the actual round 45 full twist. All factors remain full positive twists; an inverse braid generator in the common chart is not a half-twist factor.

An explicit cyclic start puts 45 first. Carry the SAME 45 through all TEN actual neighbors, including every donor leftover and all three earlier exteriors. Every adjacent move is reconstructed before normalization. A second explicit cyclic start gathers the changed donor daisy, and its named contraction RETURNS the original four-point outer literally.

The result. Only the two wound pair curves change. Their support lengths fall from 6 to 2 and 4 to 2. The other SIX source records keep their actual curves and presentations. All 28 pairwise minimal CLOSED intersection counts remain the same. At the returned eight-record checkpoint, maximum/total support is 5/27 rather than 6/33; stored braid letters are 88 rather than 96.

The cost. The temporary donor has ELEVEN rows instead of eight, with total support 42 rather than 33. Its largest individual support word stays at 6. Eight source moves and fourteen external adjacent checks replace three moves and two checks. The late donor-return and short 24 gather are genuinely independent and can share a step: both cards start from the SAME input, with a literal two-order certificate.

The final five actual inputs then match the twice-modified D5 daisy in a complete common chart. Four standard unit exteriors remain visible, each with lift -I. Combining them, redrawing their FOURTH power on the sphere and clearing the already-peripheral power remain separate. Every one of the thirteen sphere-discrepancy WORDS is unchanged.

Scope. These are support lengths in the chosen chart, not arc crossings, jointly minimal diagrams or whole-proof bounds. All half-twist classes and the earlier lower meeting stay unchanged. The previous 101-move/71-step certificate, payload, page source and PDF are pinned byte-for-byte, with a functional interactive archive.

Contents

Independent steps, their individual moves, and complete redraw discrepancies.

Clarity-first diagram sequence

I. Prepare and apply the disk lantern 5

II. Sphere redraws and the separate framing ledger 12

IV. The terminal redraw and peripheral cleanup 78

V. Full sphere-redraw discrepancies 81

106 moves; 75 independent steps. No shortening claim.

I. Prepare and apply the disk lantern

Every substitution and sphere redraw is separate. Independent moves share a step number; their individual diagrams remain visible.

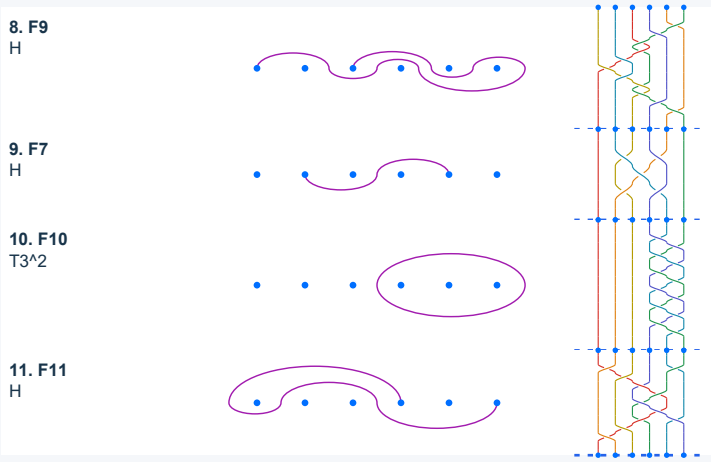

1 - step 001

Change the working ordering by an inverse Hurwitz move

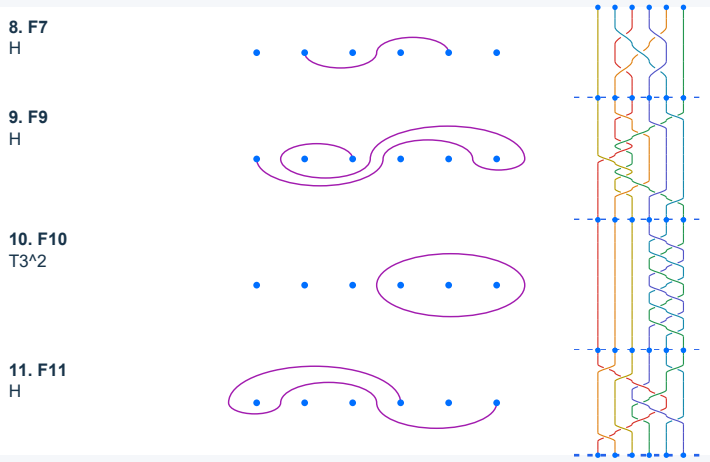

DISK MOVE: exact local free-word, based-action, or supported-class certificate retained.

7 unchanged displayed factors above; 2 below. Only the changed interval is shown.

Before

After

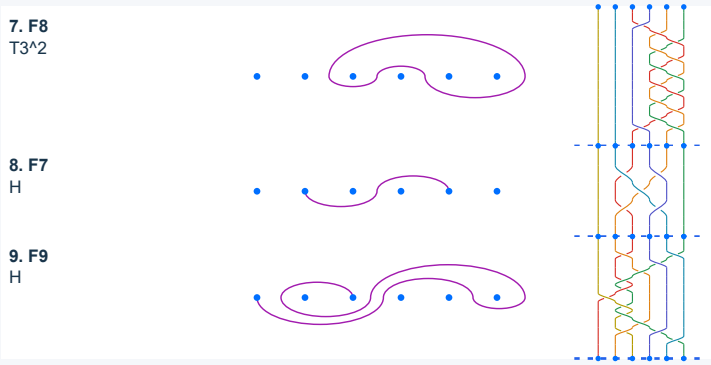

1 - step 002a

Change the working ordering by an inverse Hurwitz move

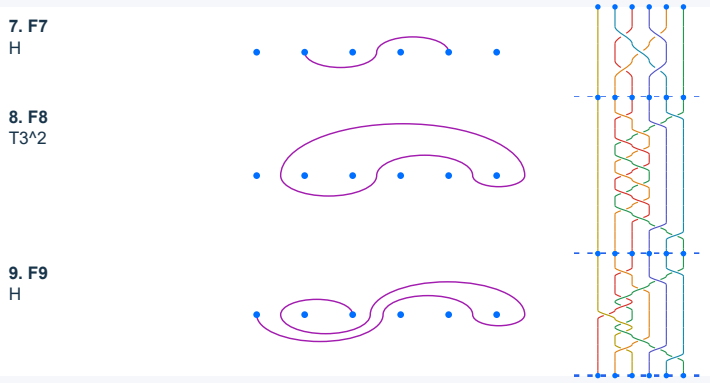

DISK MOVE: exact local free-word, based-action, or supported-class certificate retained.

6 unchanged displayed factors above; 4 below. Only the changed interval is shown. PARALLEL STEP 2: moves a, b are independent and each starts from the SAME input. Both orders are certified.

Before

After

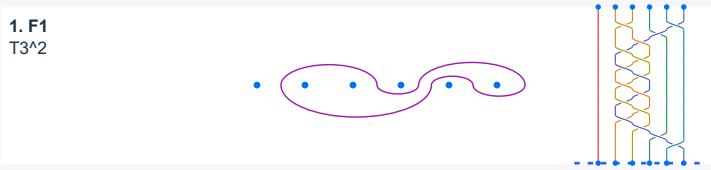

1 - step 002b

Split F1 into ordinary roots

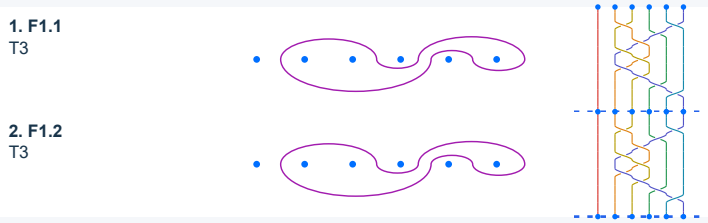

DISK MOVE: exact local free-word, based-action, or supported-class certificate retained.

0 unchanged displayed factors above; 12 below. Only the changed interval is shown. PARALLEL STEP 2: moves a, b are independent and each starts from the SAME input. Both orders are certified.

Before

After

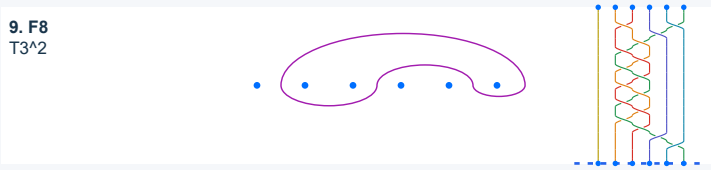

1 - step 003a

Split F8 into ordinary roots

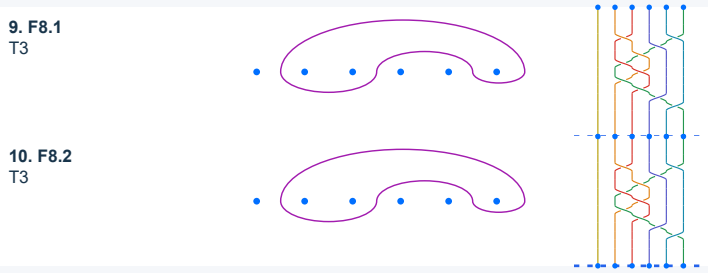

DISK MOVE: exact local free-word, based-action, or supported-class certificate retained.

8 unchanged displayed factors above; 5 below. Only the changed interval is shown. PARALLEL STEP 3: moves a, b, c are independent and each starts from the SAME input. Both orders are certified.

Before

After

1 - step 003b

Split F10 into ordinary roots

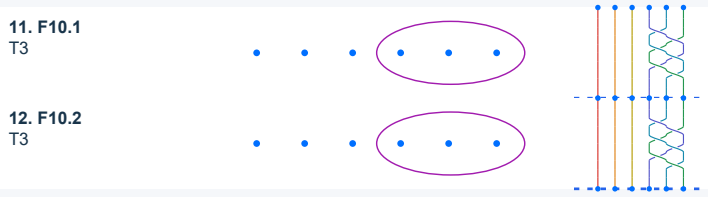

DISK MOVE: exact local free-word, based-action, or supported-class certificate retained.

10 unchanged displayed factors above; 3 below. Only the changed interval is shown. PARALLEL STEP 3: moves a, b, c are independent and each starts from the SAME input. Both orders are certified.

Before

After

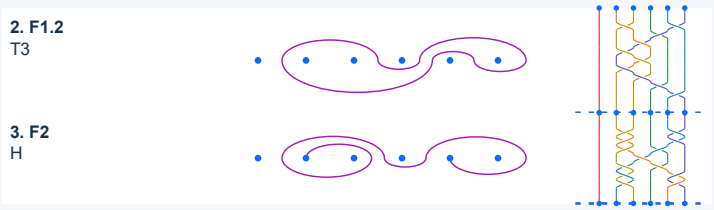

1 - step 003c

F1.2 down past F2

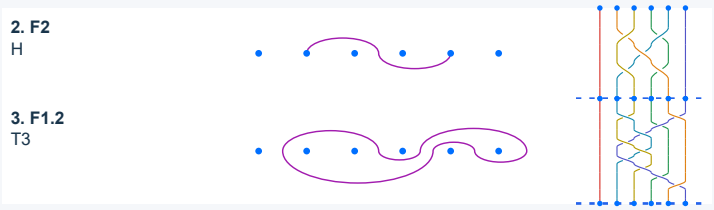

DISK MOVE: exact local free-word, based-action, or supported-class certificate retained.

1 unchanged displayed factors above; 11 below. Only the changed interval is shown. PARALLEL STEP 3: moves a, b, c are independent and each starts from the SAME input. Both orders are certified.

Before

After

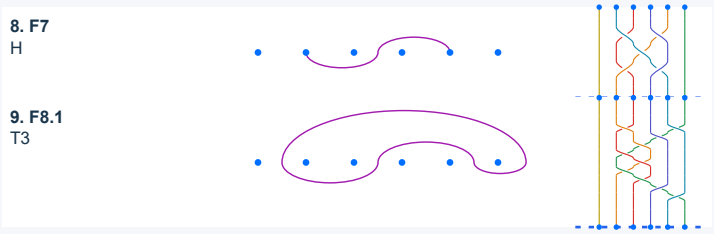

1 - step 004a

F8.1 up past F7

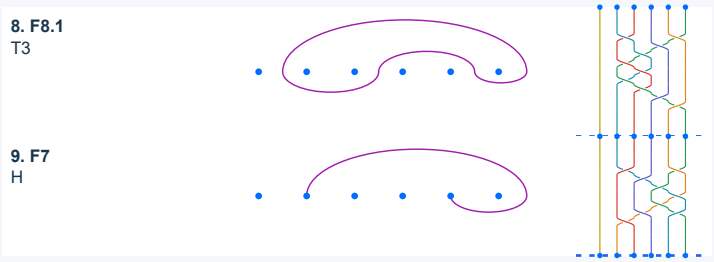

DISK MOVE: exact local free-word, based-action, or supported-class certificate retained.

7 unchanged displayed factors above; 7 below. Only the changed interval is shown. PARALLEL STEP 4: moves a, b are independent and each starts from the SAME input. Both orders are certified.

Before

After

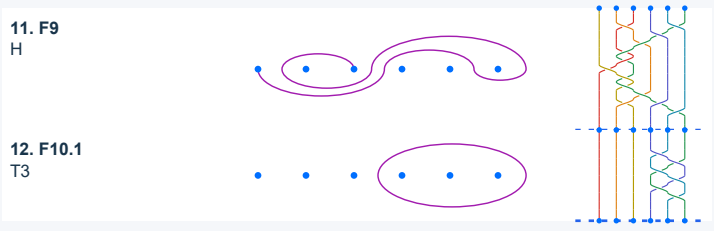

1 - step 004b

F10.1 up past F9

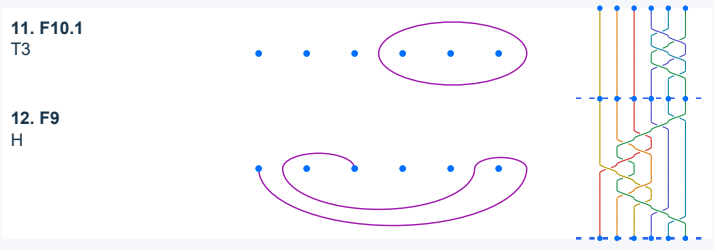

DISK MOVE: exact local free-word, based-action, or supported-class certificate retained.

10 unchanged displayed factors above; 4 below. Only the changed interval is shown. PARALLEL STEP 4: moves a, b are independent and each starts from the SAME input. Both orders are certified.

Before

After

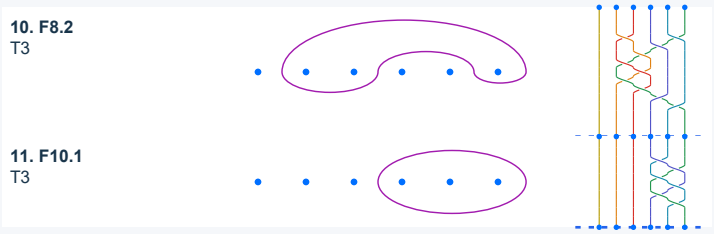

1 - step 005

F10.1 up past F8.2

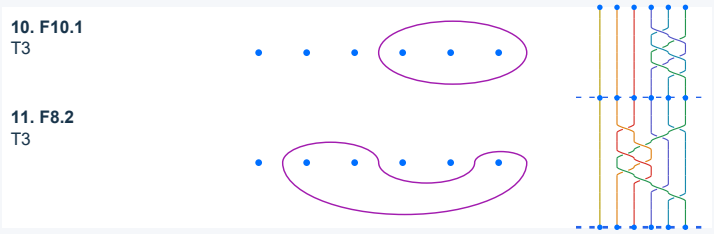

DISK MOVE: exact local free-word, based-action, or supported-class certificate retained.

9 unchanged displayed factors above; 5 below. Only the changed interval is shown.

Before

After

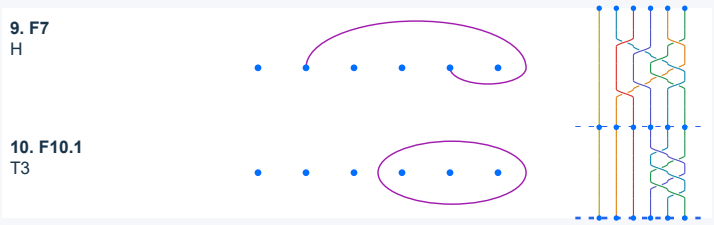

1 - step 006

F10.1 up past F7

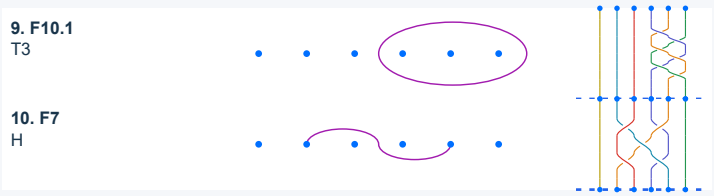

DISK MOVE: exact local free-word, based-action, or supported-class certificate retained.

8 unchanged displayed factors above; 6 below. Only the changed interval is shown.

Before

After

1 - step 007

Use the exact disk equality of the matched arcs

DISK MOVE: exact local free-word, based-action, or supported-class certificate retained.

9 unchanged displayed factors above; 6 below. Only the changed interval is shown.

Before

After

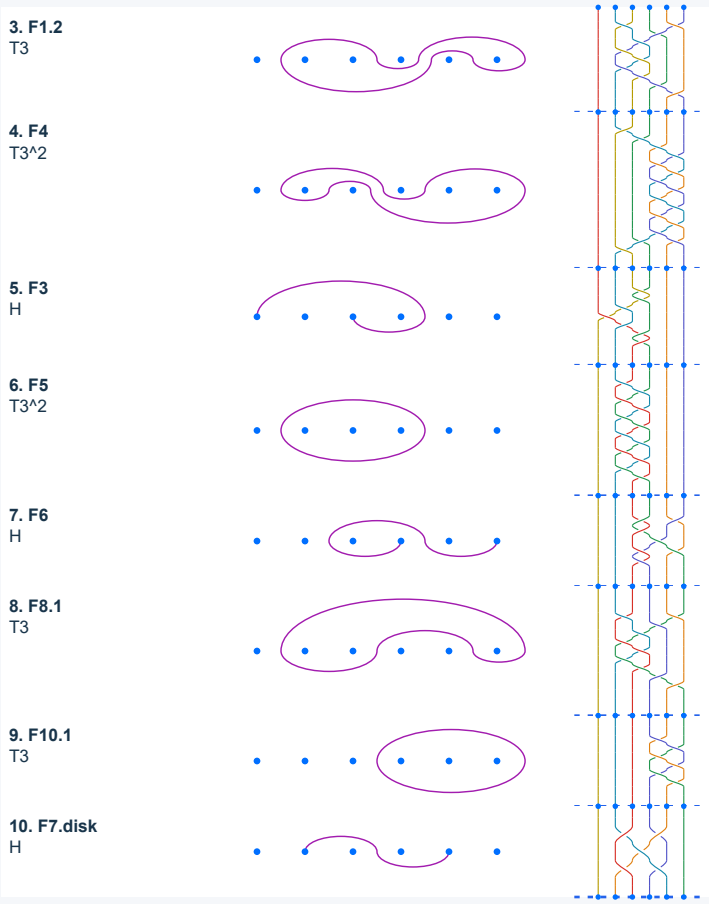

1 - step 008

Drag the matched arc up across SEVEN factors (one Hurwitz drag)

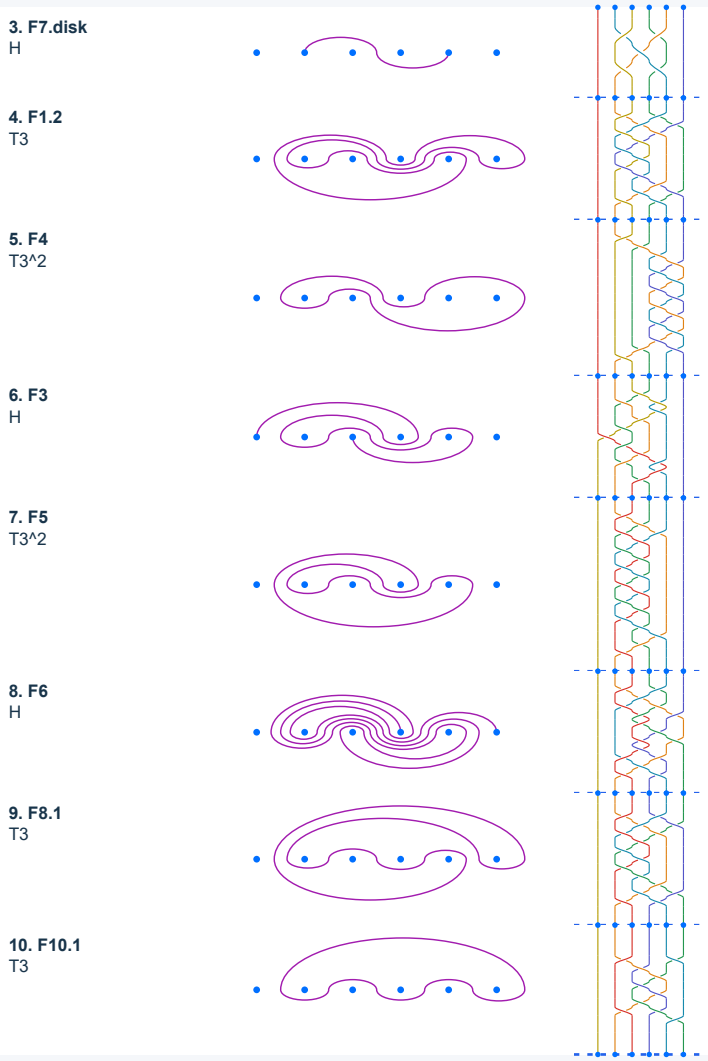

DISK MOVE: exact local free-word, based-action, or supported-class certificate retained.

2 unchanged displayed factors above; 6 below. Only the changed interval is shown.

Before

After

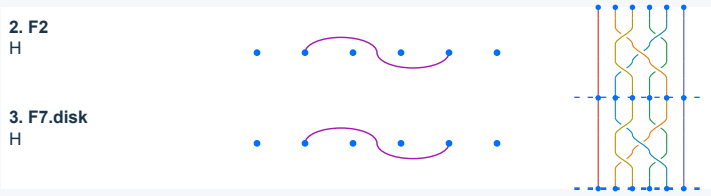

1 - step 009

Combine the two matched half twists

DISK MOVE: exact local free-word, based-action, or supported-class certificate retained.

1 unchanged displayed factors above; 13 below. Only the changed interval is shown.

Before

After

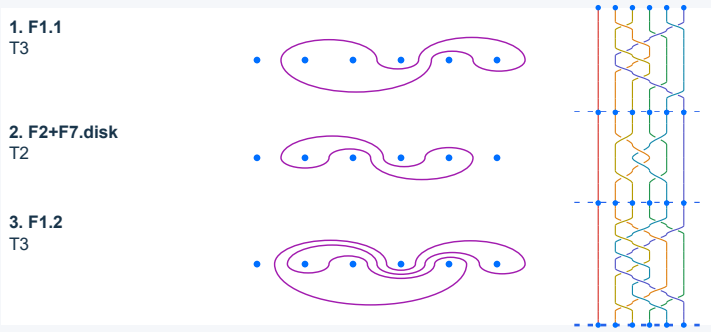

1 - step 010

Disk lantern: retain the actual four-point outer curve

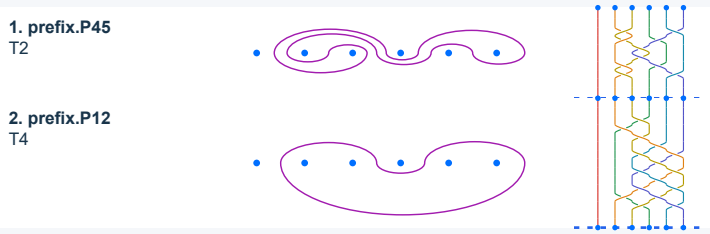

DISK MOVE: exact local free-word, based-action, or supported-class certificate retained.

0 unchanged displayed factors above; 12 below. Only the changed interval is shown.

Before

After

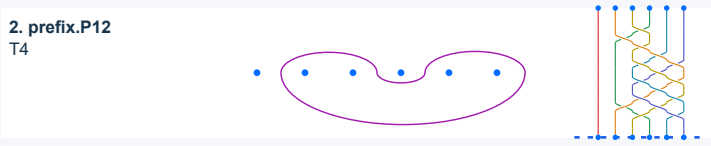

1 - step 011

Redraw ONE outer curve from its complementary side

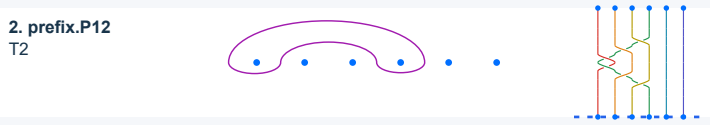

SPHERE REDRAW ONLY: the same curve or arc, with the same factor and power. Framing ledger retained separately.

1 unchanged displayed factors above; 12 below. Only the changed interval is shown. REDRAW ONLY: factor identity, position, power and sphere curve are retained.

Before

After

II. Sphere redraws and the separate framing ledger

Every substitution and sphere redraw is separate. Independent moves share a step number; their individual diagrams remain visible.

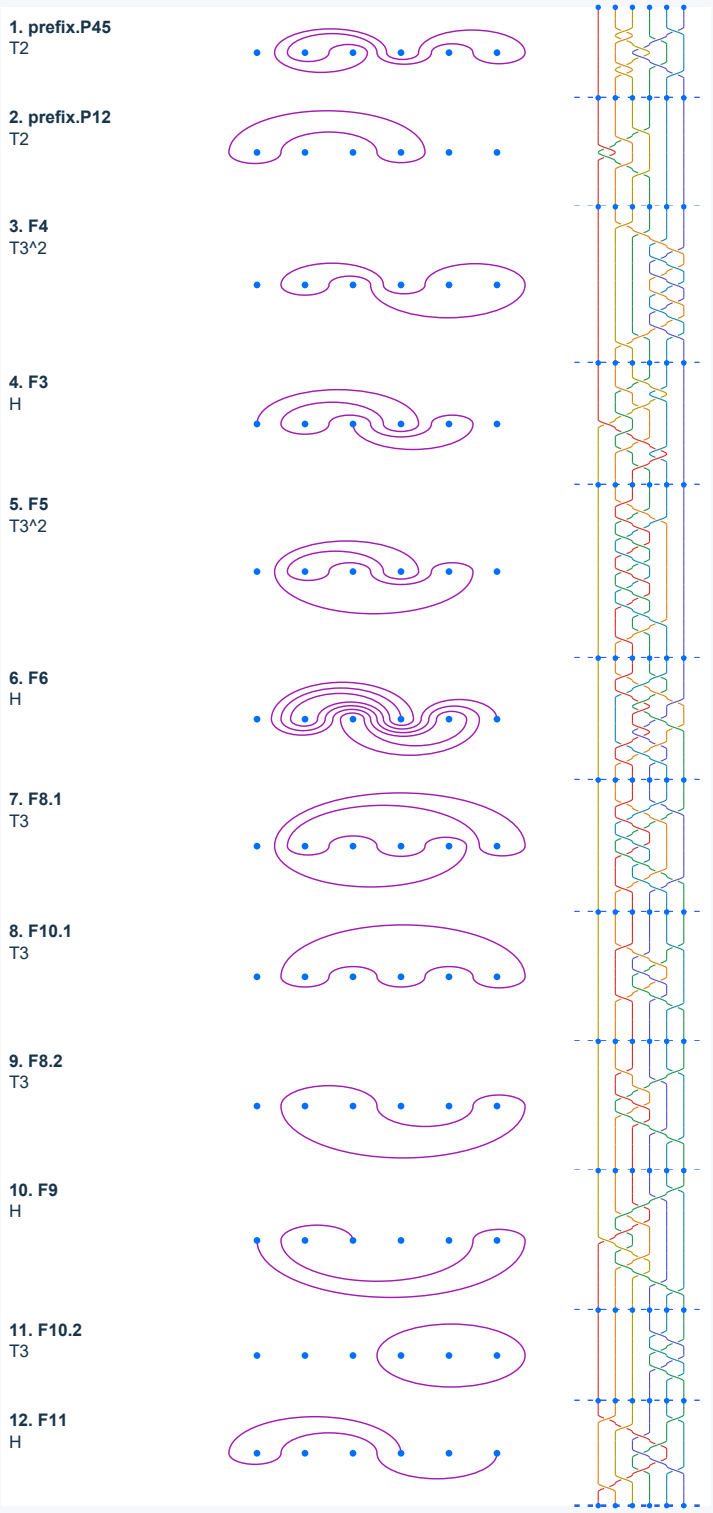

2 - step 012

Global frame: fixed working point 2 becomes displayed point 6

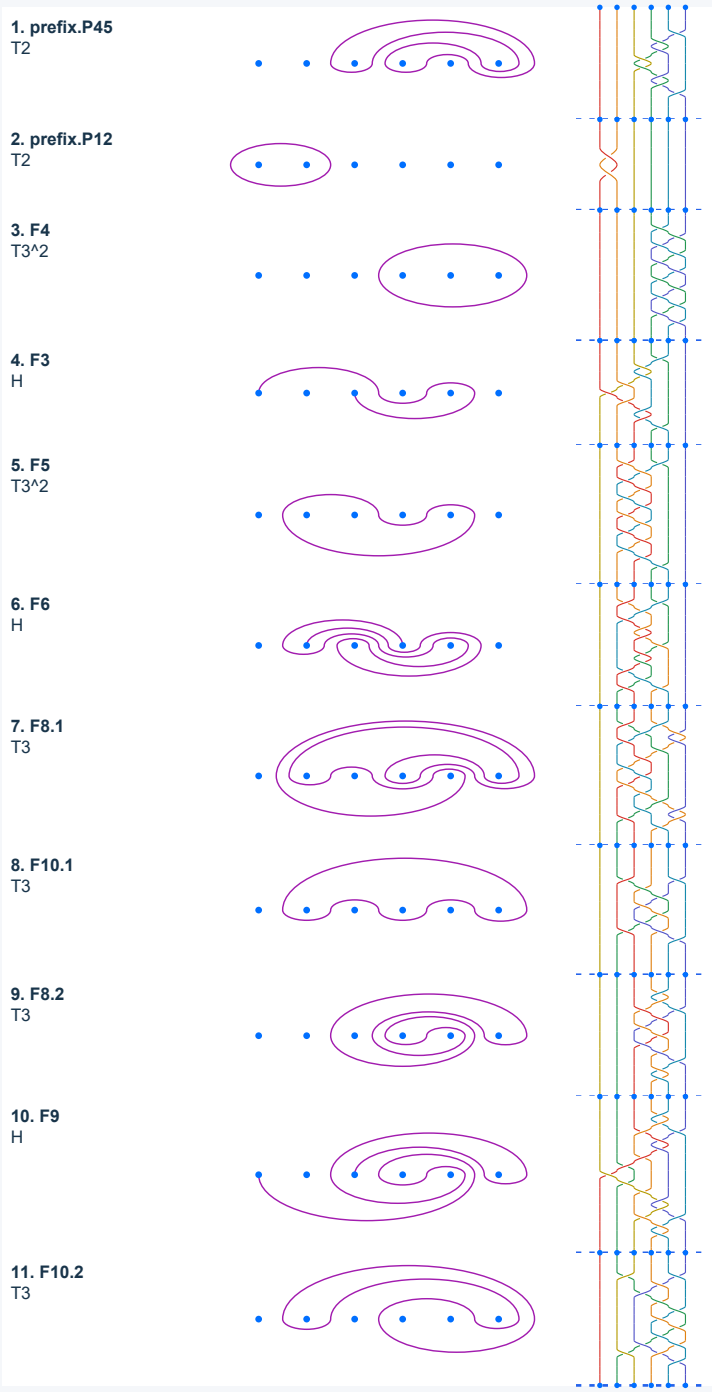

EXPLICIT GLOBAL CONJUGATION: a change of the whole product by the recorded frame.

0 unchanged displayed factors above; 0 below. Only the changed interval is shown.

Before

After

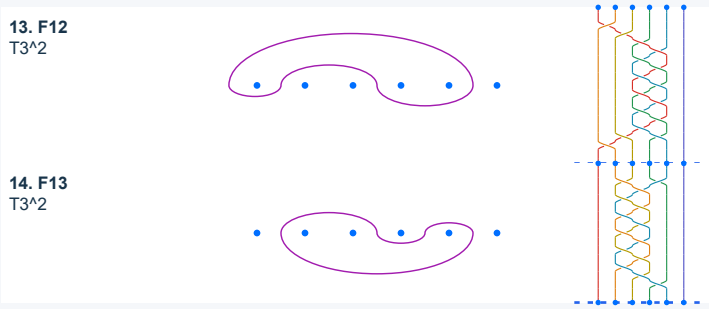

2 - step 012 - continued

Global frame: fixed working point 2 becomes displayed point 6

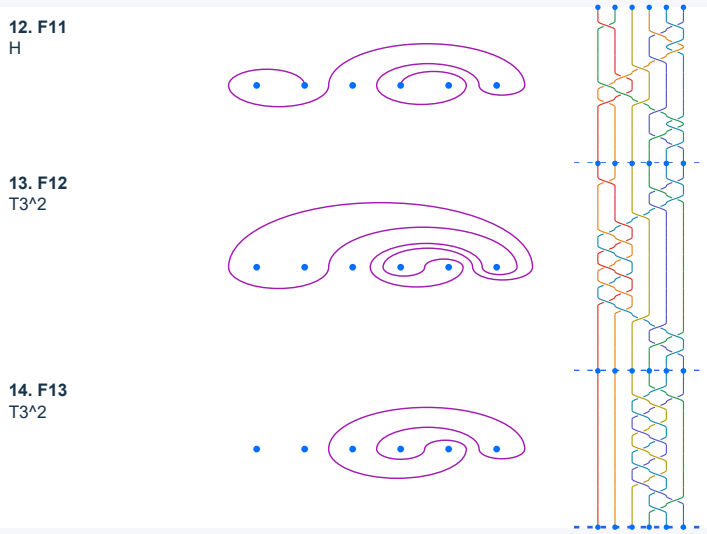

EXPLICIT GLOBAL CONJUGATION: a change of the whole product by the recorded frame.

0 unchanged displayed factors above; 0 below. Only the changed interval is shown.

Before

After

2 - step 013a

Redraw prefix.P45 in the five-point chart

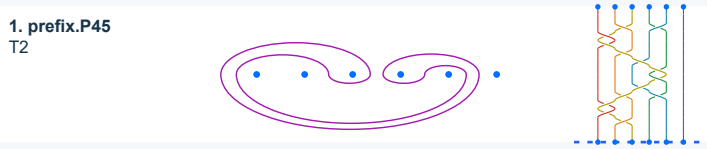

SPHERE REDRAW ONLY: the same curve or arc, with the same factor and power. Framing ledger retained separately.

0 unchanged displayed factors above; 13 below. Only the changed interval is shown. PARALLEL STEP 13: moves a, b, c, d, e, f, g, h, i, j, k, l, m, n are independent and each starts from the SAME input. Both orders are certified. REDRAW ONLY: factor identity, position, power and sphere curve are retained.

Before

After

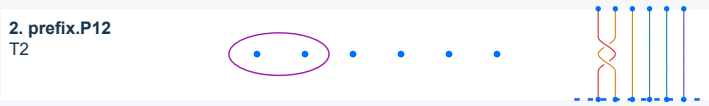

2 - step 013b

Redraw prefix.P12 in the five-point chart

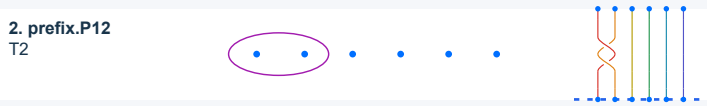

DISK MOVE: exact local free-word, based-action, or supported-class certificate retained.

1 unchanged displayed factors above; 12 below. Only the changed interval is shown. PARALLEL STEP 13: moves a, b, c, d, e, f, g, h, i, j, k, l, m, n are independent and each starts from the SAME input. Both orders are certified. REDRAW ONLY: factor identity, position, power and sphere curve are retained.

Before

After

2 - step 013c

Redraw F4 in the five-point chart

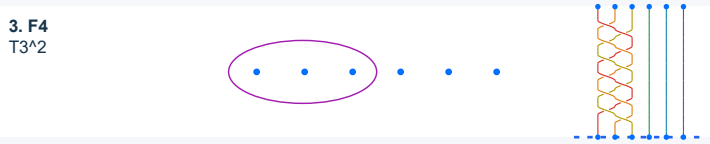

SPHERE REDRAW ONLY: the same curve or arc, with the same factor and power. Framing ledger retained separately.

2 unchanged displayed factors above; 11 below. Only the changed interval is shown. PARALLEL STEP 13: moves a, b, c, d, e, f, g, h, i, j, k, l, m, n are independent and each starts from the SAME input. Both orders are certified. REDRAW ONLY: factor identity, position, power and sphere curve are retained. Separate framing ledger: add 2 boundary twist(s); no factor is inserted into the main diagram. Ledger before: empty; ledger after: T5^2.

Before

After

2 - step 013d

Redraw F3 in the five-point chart

DISK MOVE: exact local free-word, based-action, or supported-class certificate retained.

3 unchanged displayed factors above; 10 below. Only the changed interval is shown. PARALLEL STEP 13: moves a, b, c, d, e, f, g, h, i, j, k, l, m, n are independent and each starts from the SAME input. Both orders are certified. REDRAW ONLY: factor identity, position, power and sphere curve are retained.

Before

After

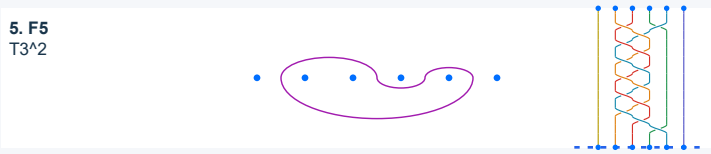

2 - step 013e

Redraw F5 in the five-point chart

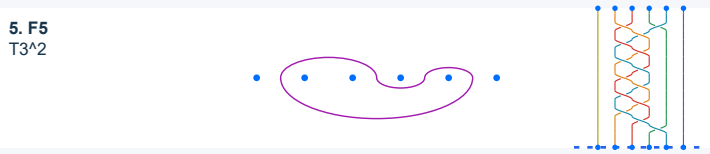

DISK MOVE: exact local free-word, based-action, or supported-class certificate retained.

4 unchanged displayed factors above; 9 below. Only the changed interval is shown. PARALLEL STEP 13: moves a, b, c, d, e, f, g, h, i, j, k, l, m, n are independent and each starts from the SAME input. Both orders are certified. REDRAW ONLY: factor identity, position, power and sphere curve are retained.

Before

After

2 - step 013f

Redraw F6 in the five-point chart

DISK MOVE: exact local free-word, based-action, or supported-class certificate retained.

5 unchanged displayed factors above; 8 below. Only the changed interval is shown. PARALLEL STEP 13: moves a, b, c, d, e, f, g, h, i, j, k, l, m, n are independent and each starts from the SAME input. Both orders are certified. REDRAW ONLY: factor identity, position, power and sphere curve are retained.

Before

After

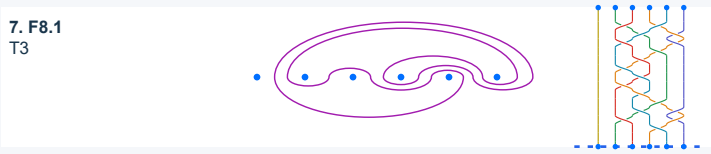

2 - step 013g

Redraw F8.1 in the five-point chart

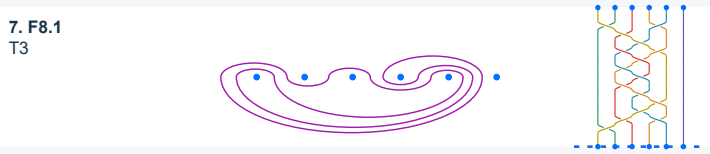

SPHERE REDRAW ONLY: the same curve or arc, with the same factor and power. Framing ledger retained separately.

6 unchanged displayed factors above; 7 below. Only the changed interval is shown. PARALLEL STEP 13: moves a, b, c, d, e, f, g, h, i, j, k, l, m, n are independent and each starts from the SAME input. Both orders are certified. REDRAW ONLY: factor identity, position, power and sphere curve are retained.

Before

After

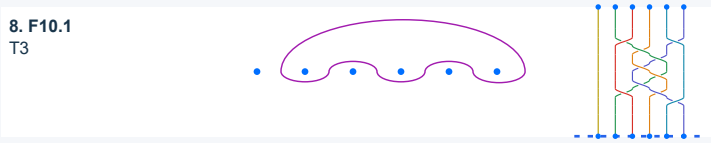

2 - step 013h

Redraw F10.1 in the five-point chart

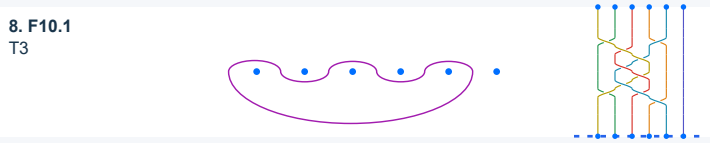

SPHERE REDRAW ONLY: the same curve or arc, with the same factor and power. Framing ledger retained separately.

7 unchanged displayed factors above; 6 below. Only the changed interval is shown. PARALLEL STEP 13: moves a, b, c, d, e, f, g, h, i, j, k, l, m, n are independent and each starts from the SAME input. Both orders are certified. REDRAW ONLY: factor identity, position, power and sphere curve are retained. Separate framing ledger: add 1 boundary twist(s); no factor is inserted into the main diagram. Ledger before: empty; ledger after: T5.

Before

After

2 - step 013i

Redraw F8.2 in the five-point chart

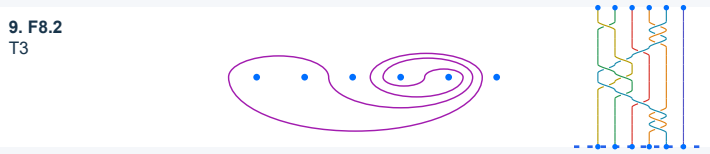

SPHERE REDRAW ONLY: the same curve or arc, with the same factor and power. Framing ledger retained separately.

8 unchanged displayed factors above; 5 below. Only the changed interval is shown. PARALLEL STEP 13: moves a, b, c, d, e, f, g, h, i, j, k, l, m, n are independent and each starts from the SAME input. Both orders are certified. REDRAW ONLY: factor identity, position, power and sphere curve are retained. Separate framing ledger: add 1 boundary twist(s); no factor is inserted into the main diagram. Ledger before: empty; ledger after: T5.

Before

After

2 - step 013j

Redraw F9 in the five-point chart

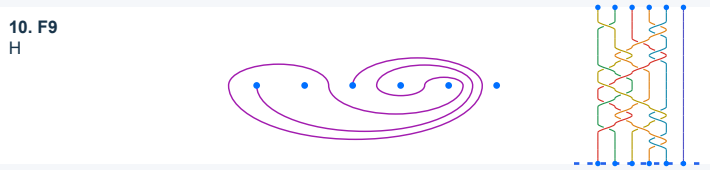

SPHERE REDRAW ONLY: the same curve or arc, with the same factor and power. Framing ledger retained separately.

9 unchanged displayed factors above; 4 below. Only the changed interval is shown. PARALLEL STEP 13: moves a, b, c, d, e, f, g, h, i, j, k, l, m, n are independent and each starts from the SAME input. Both orders are certified. REDRAW ONLY: factor identity, position, power and sphere curve are retained.

Before

After

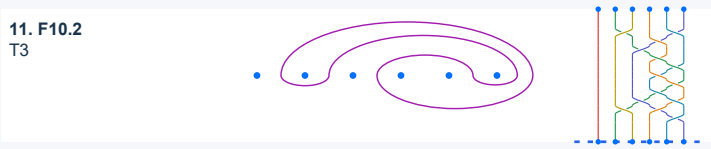

2 - step 013k

Redraw F10.2 in the five-point chart

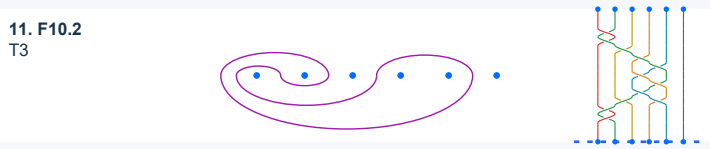

SPHERE REDRAW ONLY: the same curve or arc, with the same factor and power. Framing ledger retained separately.

10 unchanged displayed factors above; 3 below. Only the changed interval is shown. PARALLEL STEP 13: moves a, b, c, d, e, f, g, h, i, j, k, l, m, n are independent and each starts from the SAME input. Both orders are certified. REDRAW ONLY: factor identity, position, power and sphere curve are retained.

Before

After

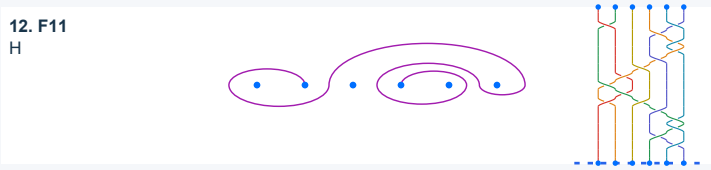

2 - step 013l

Redraw F11 in the five-point chart

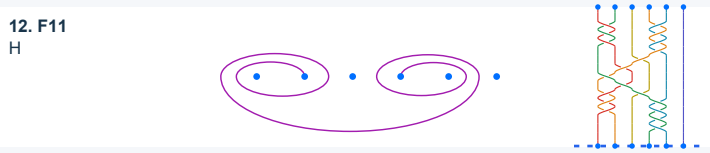

SPHERE REDRAW ONLY: the same curve or arc, with the same factor and power. Framing ledger retained separately.

11 unchanged displayed factors above; 2 below. Only the changed interval is shown. PARALLEL STEP 13: moves a, b, c, d, e, f, g, h, i, j, k, l, m, n are independent and each starts from the SAME input. Both orders are certified. REDRAW ONLY: factor identity, position, power and sphere curve are retained.

Before

After

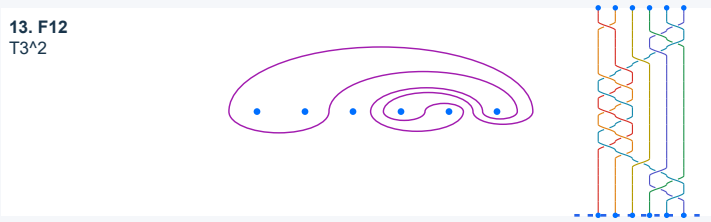

2 - step 013m

Redraw F12 in the five-point chart

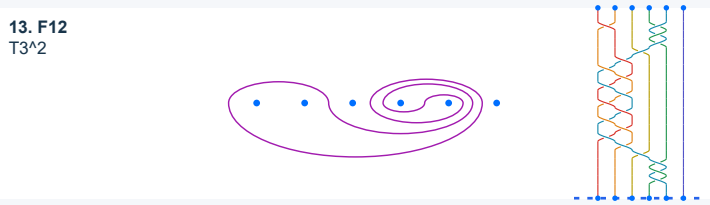

SPHERE REDRAW ONLY: the same curve or arc, with the same factor and power. Framing ledger retained separately.

12 unchanged displayed factors above; 1 below. Only the changed interval is shown. PARALLEL STEP 13: moves a, b, c, d, e, f, g, h, i, j, k, l, m, n are independent and each starts from the SAME input. Both orders are certified. REDRAW ONLY: factor identity, position, power and sphere curve are retained.

Before

After

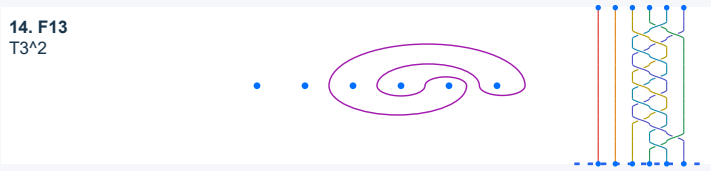

2 - step 013n

Redraw F13 in the five-point chart

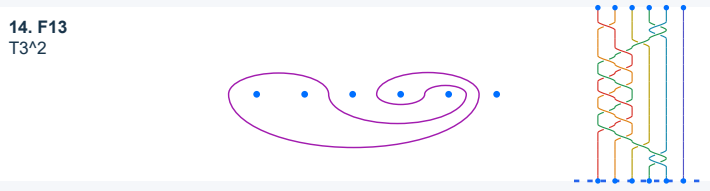

SPHERE REDRAW ONLY: the same curve or arc, with the same factor and power. Framing ledger retained separately.

13 unchanged displayed factors above; 0 below. Only the changed interval is shown. PARALLEL STEP 13: moves a, b, c, d, e, f, g, h, i, j, k, l, m, n are independent and each starts from the SAME input. Both orders are certified. REDRAW ONLY: factor identity, position, power and sphere curve are retained. Separate framing ledger: add 2 boundary twist(s); no factor is inserted into the main diagram. Ledger before: empty; ledger after: T5^2.

Before

After

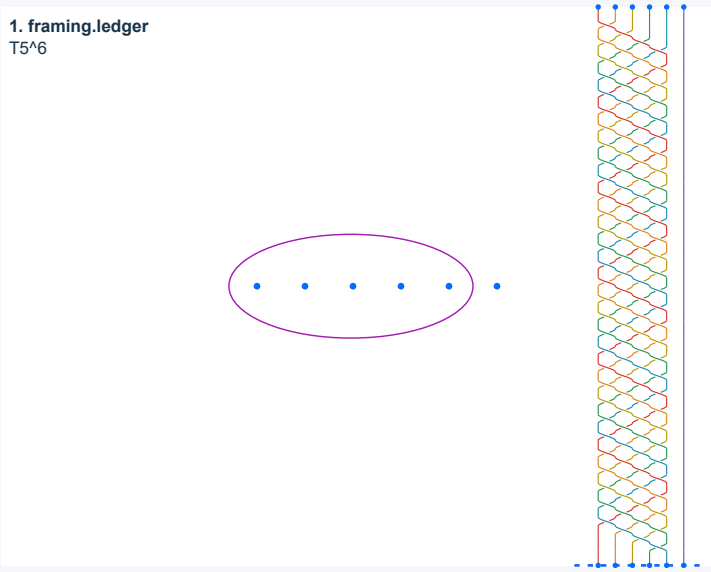

2 - step 014

Redraw the SIX-correction ledger curve around point6

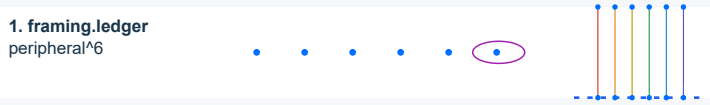

SPHERE REDRAW ONLY: the same curve or arc, with the same factor and power. Framing ledger retained separately.

0 unchanged displayed factors above; 0 below. Only the changed interval is shown. REDRAW ONLY: factor identity, position, power and sphere curve are retained. THIS ROW IS THE SEPARATE FRAMING LEDGER; the main factor list is unchanged.

Before

After

2 - step 015

Clear the already-peripheral SIX-correction ledger

PERIPHERAL CLEANUP: the curve has already been redrawn around one point; its even powered twist is trivial in the chosen lift.

0 unchanged displayed factors above; 0 below. Only the changed interval is shown. THIS ROW IS THE SEPARATE FRAMING LEDGER; the main factor list is unchanged.

Before

After

Identity / no factors in this interval.

III. Positive disk transports and named relations

Every substitution and sphere redraw is separate. Independent moves share a step number; their individual diagrams remain visible.

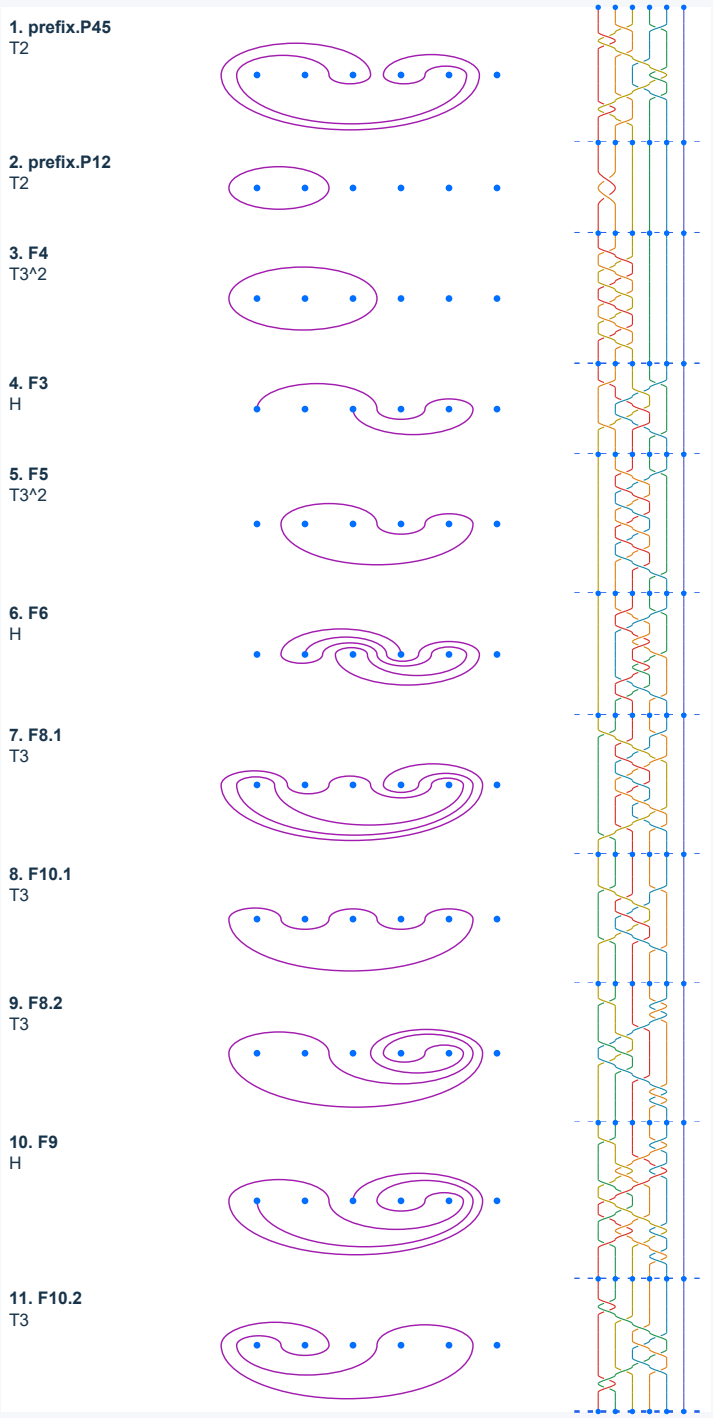

3 - step 016

Cyclic start at the WHOLE original124 square

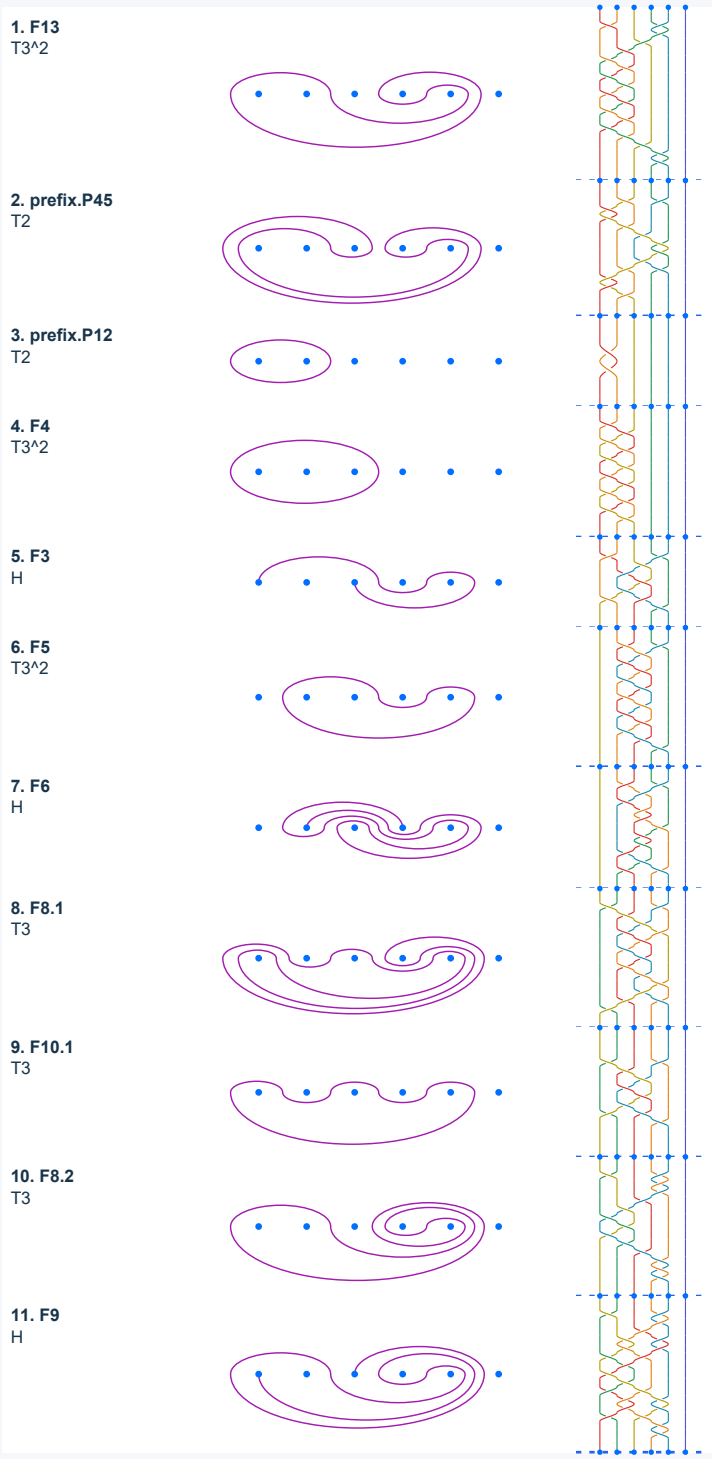

DISK MOVE: exact local free-word, based-action, or supported-class certificate retained.

0 unchanged displayed factors above; 0 below. Only the changed interval is shown.

Before

After

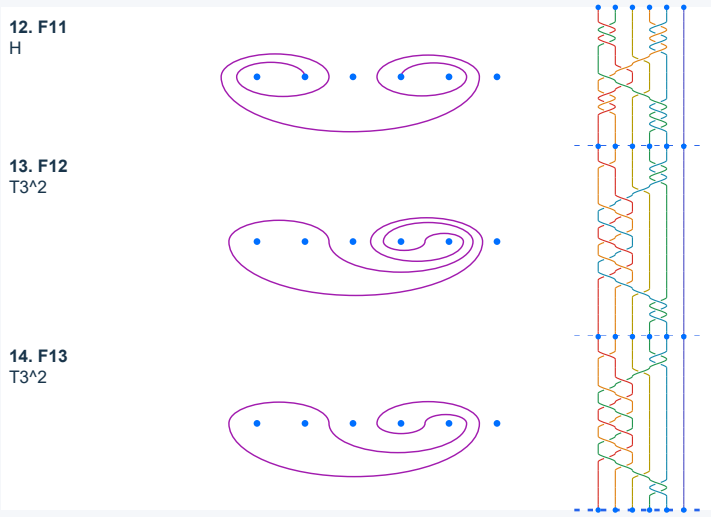

3 - step 016 - continued

Cyclic start at the WHOLE original124 square

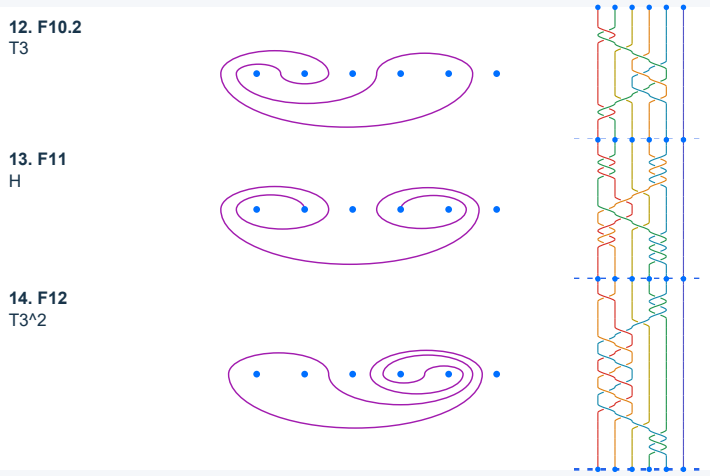

DISK MOVE: exact local free-word, based-action, or supported-class certificate retained.

0 unchanged displayed factors above; 0 below. Only the changed interval is shown.

Before

After

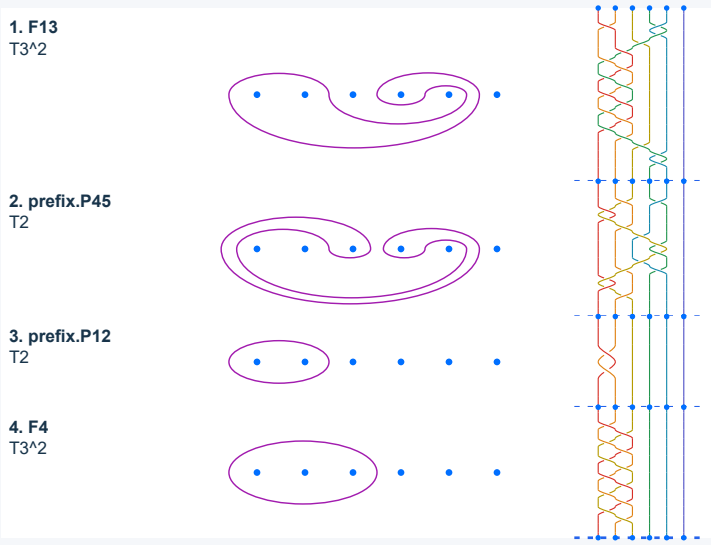

3 - step 017

Powered cabled PC lantern keeps both root squares intact and absorbs12

DISK MOVE: exact local free-word, based-action, or supported-class certificate retained.

0 unchanged displayed factors above; 10 below. Only the changed interval is shown.

Before

After

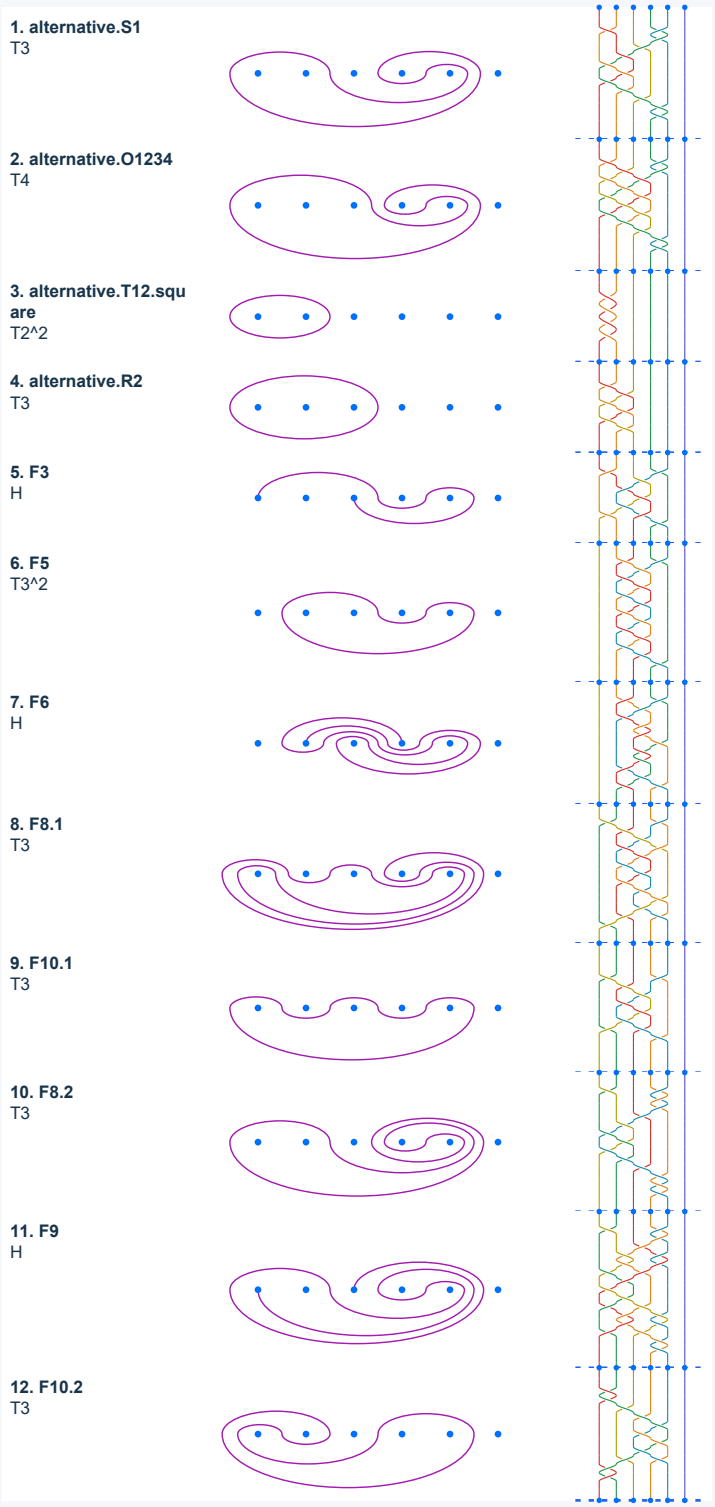

3 - step 018

Cyclic start after the retained actual124 unit

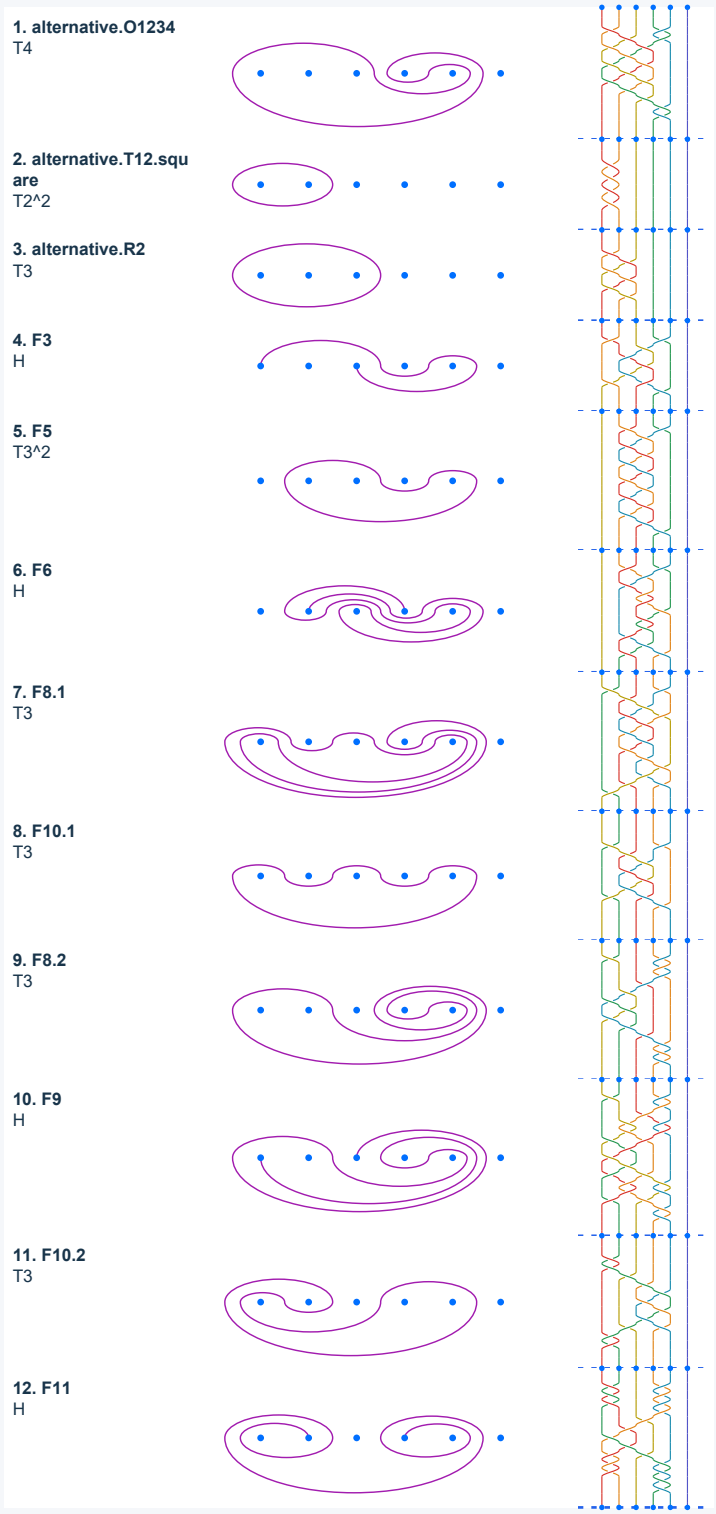

DISK MOVE: exact local free-word, based-action, or supported-class certificate retained.

0 unchanged displayed factors above; 0 below. Only the changed interval is shown.

Before

After

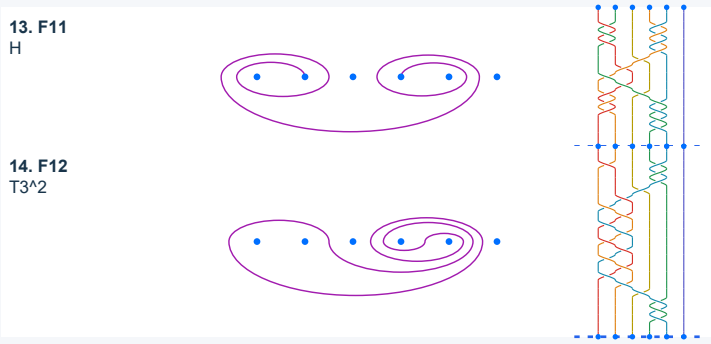

3 - step 018 - continued

Cyclic start after the retained actual124 unit

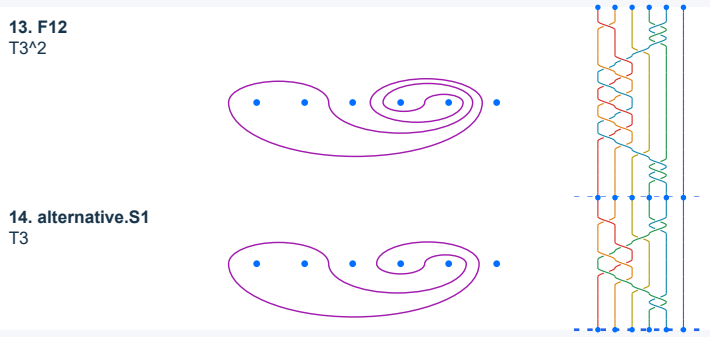

DISK MOVE: exact local free-word, based-action, or supported-class certificate retained.

0 unchanged displayed factors above; 0 below. Only the changed interval is shown.

Before

After

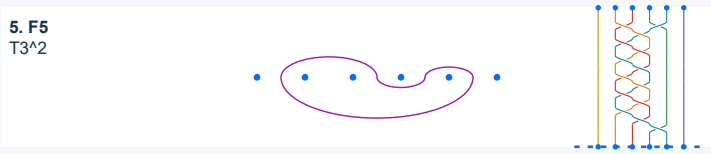

3 - step 019

Split F5 into its two positive units

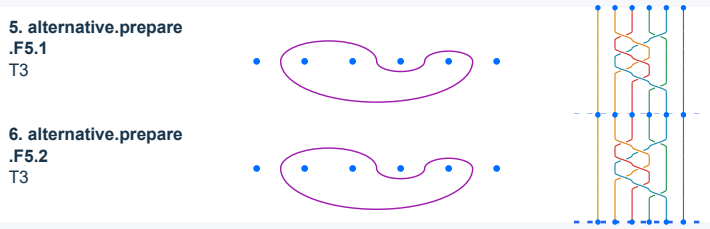

DISK MOVE: exact local free-word, based-action, or supported-class certificate retained.

4 unchanged displayed factors above; 9 below. Only the changed interval is shown.

Before

After

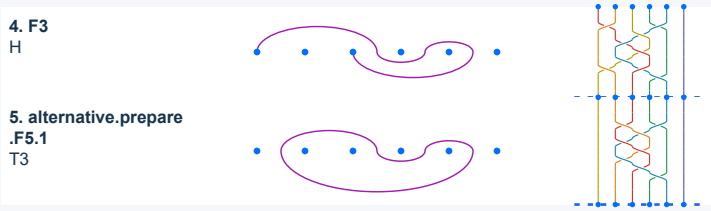

3 - step 020a

One 235 root up over F3

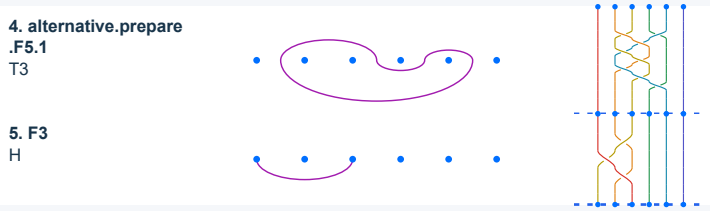

DISK MOVE: exact local free-word, based-action, or supported-class certificate retained.

3 unchanged displayed factors above; 10 below. Only the changed interval is shown. PARALLEL STEP 20: moves a, b, c are independent and each starts from the SAME input. Both orders are certified.

Before

After

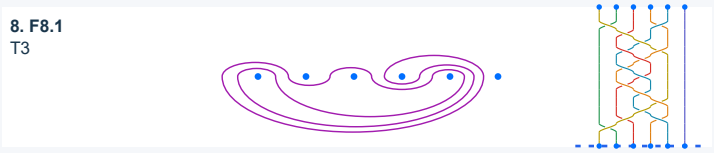

3 - step 020b

Original 345 daisy supplies actual P35

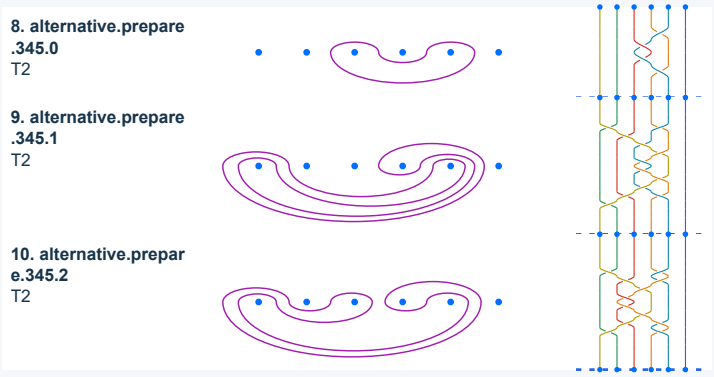

DISK MOVE: exact local free-word, based-action, or supported-class certificate retained.

7 unchanged displayed factors above; 7 below. Only the changed interval is shown. PARALLEL STEP 20: moves a, b, c are independent and each starts from the SAME input. Both orders are certified.

Before

After

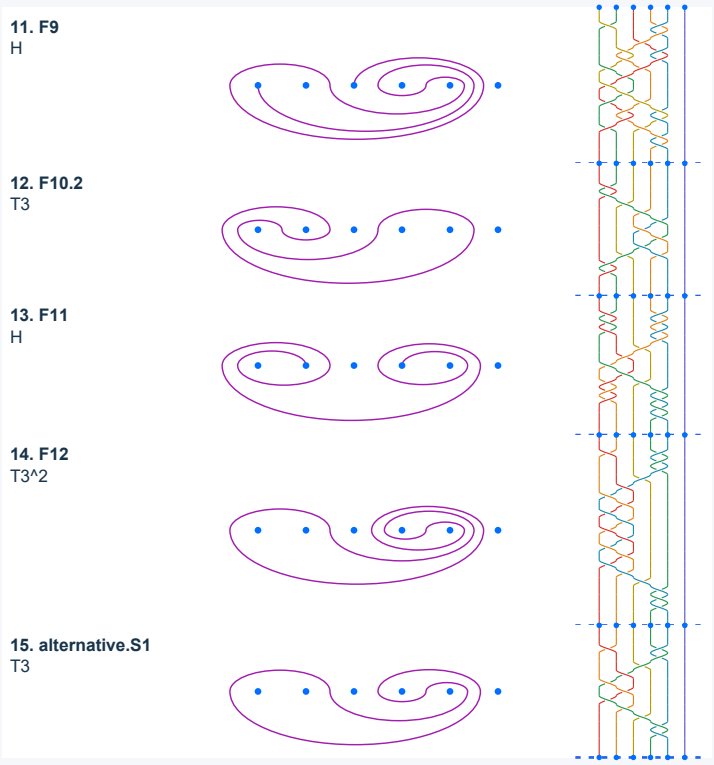

3 - step 020c

Remaining 124 root up over F9

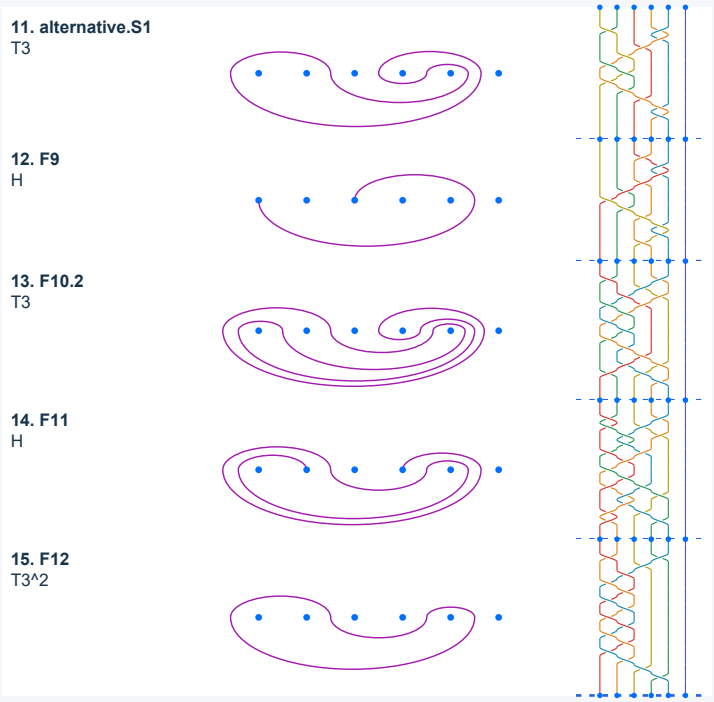

DISK MOVE: exact local free-word, based-action, or supported-class certificate retained.

10 unchanged displayed factors above; 0 below. Only the changed interval is shown. PARALLEL STEP 20: moves a, b, c are independent and each starts from the SAME input. Both orders are certified.

Before

After

3 - step 021a

Carry P35 up over F3; a Q14 transport is still needed

DISK MOVE: exact local free-word, based-action, or supported-class certificate retained.

4 unchanged displayed factors above; 9 below. Only the changed interval is shown. PARALLEL STEP 21: moves a, b are independent and each starts from the SAME input. Both orders are certified.

Before

After

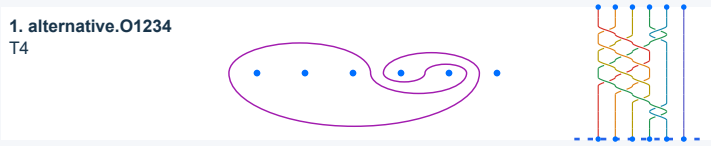

3 - step 021b

PC daisy lends its actual Q14 petal

DISK MOVE: exact local free-word, based-action, or supported-class certificate retained.

0 unchanged displayed factors above; 16 below. Only the changed interval is shown. PARALLEL STEP 21: moves a, b are independent and each starts from the SAME input. Both orders are certified.

Before

After

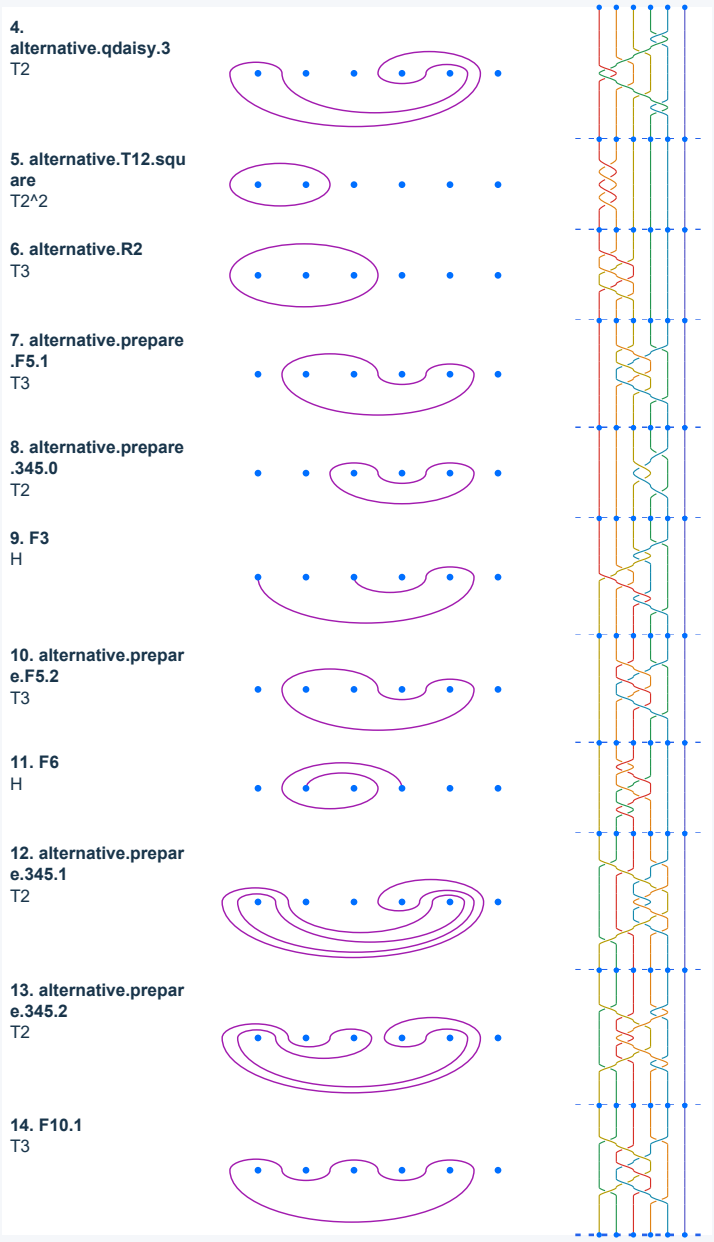

3 - step 022

Carry Q14 down across F3 and the remaining 345 petals

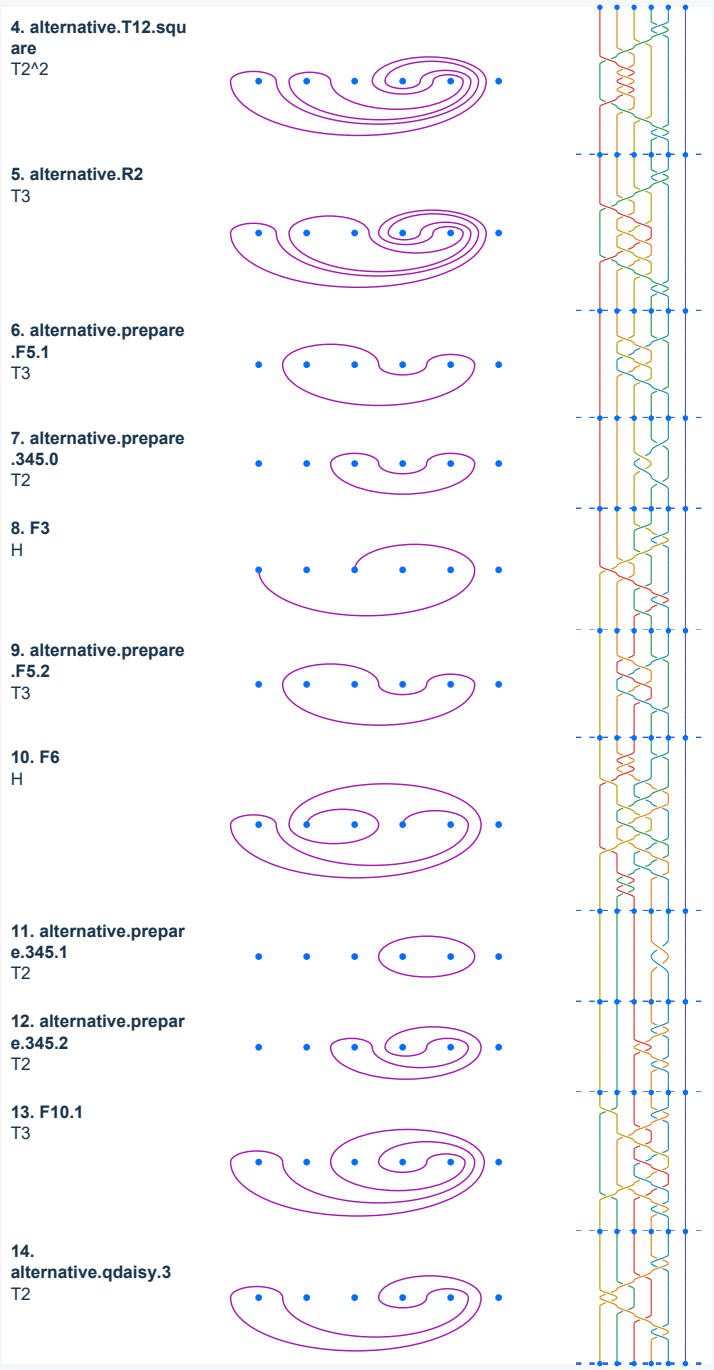

DISK MOVE: exact local free-word, based-action, or supported-class certificate retained.

3 unchanged displayed factors above; 6 below. Only the changed interval is shown.

Before

After

3 - step 023

PC daisy contracts the ACTUAL transported petals to O1345

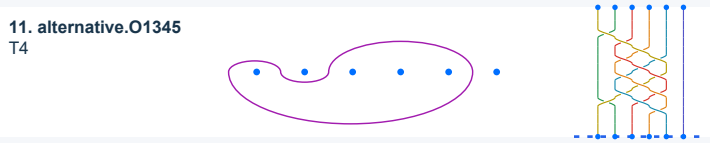

DISK MOVE: exact local free-word, based-action, or supported-class certificate retained.

10 unchanged displayed factors above; 6 below. Only the changed interval is shown.

Before

After

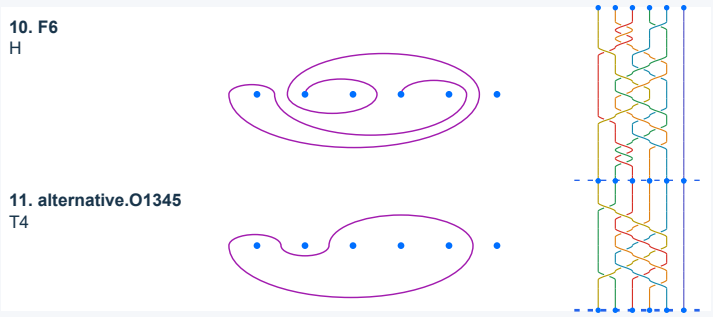

3 - step 024

Carry O1345 up across F6 before the matching-half gather

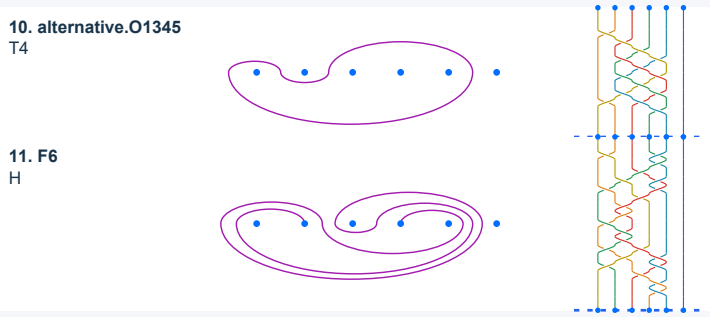

DISK MOVE: exact local free-word, based-action, or supported-class certificate retained.

9 unchanged displayed factors above; 6 below. Only the changed interval is shown.

Before

After

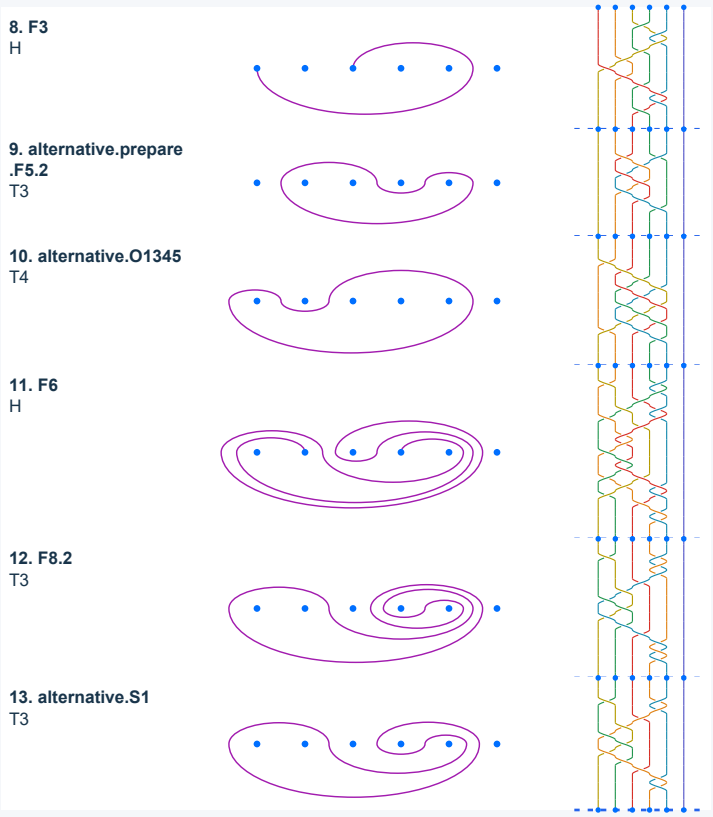

3 - step 025

Carry the matched F3 down to F9; F6 unwinds

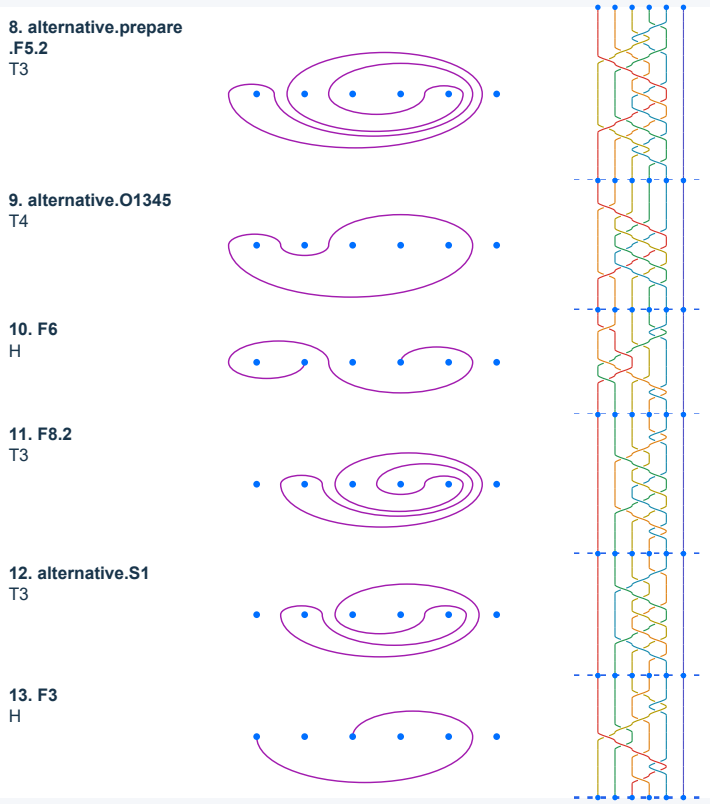

DISK MOVE: exact local free-word, based-action, or supported-class certificate retained.

7 unchanged displayed factors above; 4 below. Only the changed interval is shown.

Before

After

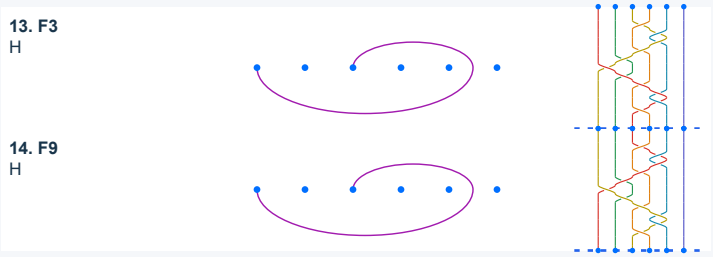

3 - step 026a

Combine the matching F3 and F9

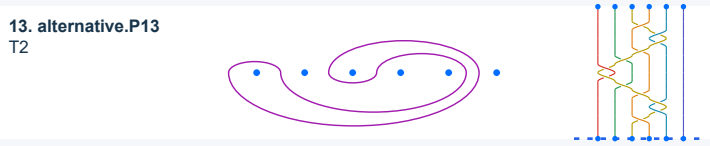

DISK MOVE: exact local free-word, based-action, or supported-class certificate retained.

12 unchanged displayed factors above; 3 below. Only the changed interval is shown. PARALLEL STEP 26: moves a, b are independent and each starts from the SAME input. Both orders are certified.

Before

After

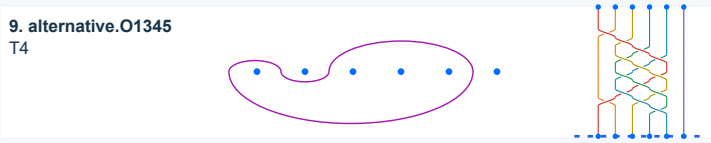

3 - step 026b

The O1345 daisy returns EXACTLY the borrowed Q14

DISK MOVE: exact local free-word, based-action, or supported-class certificate retained.

8 unchanged displayed factors above; 8 below. Only the changed interval is shown. PARALLEL STEP 26: moves a, b are independent and each starts from the SAME input. Both orders are certified.

Before

After

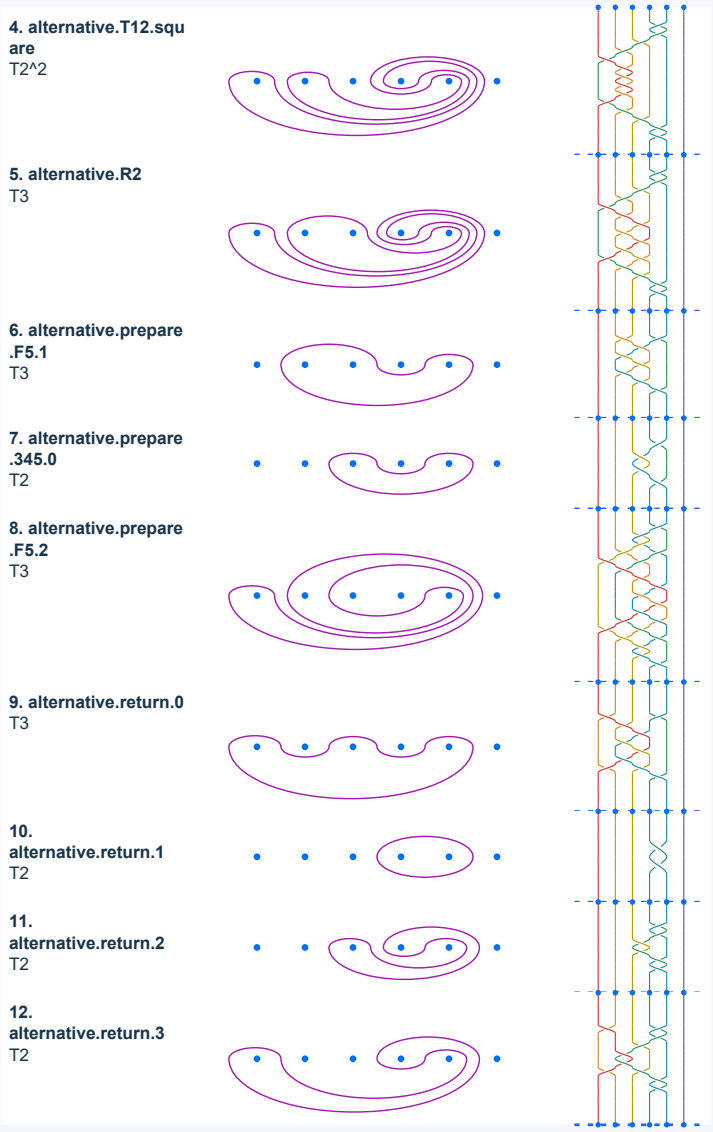

3 - step 027

Return Q14 up to restore the round T12 square and T123

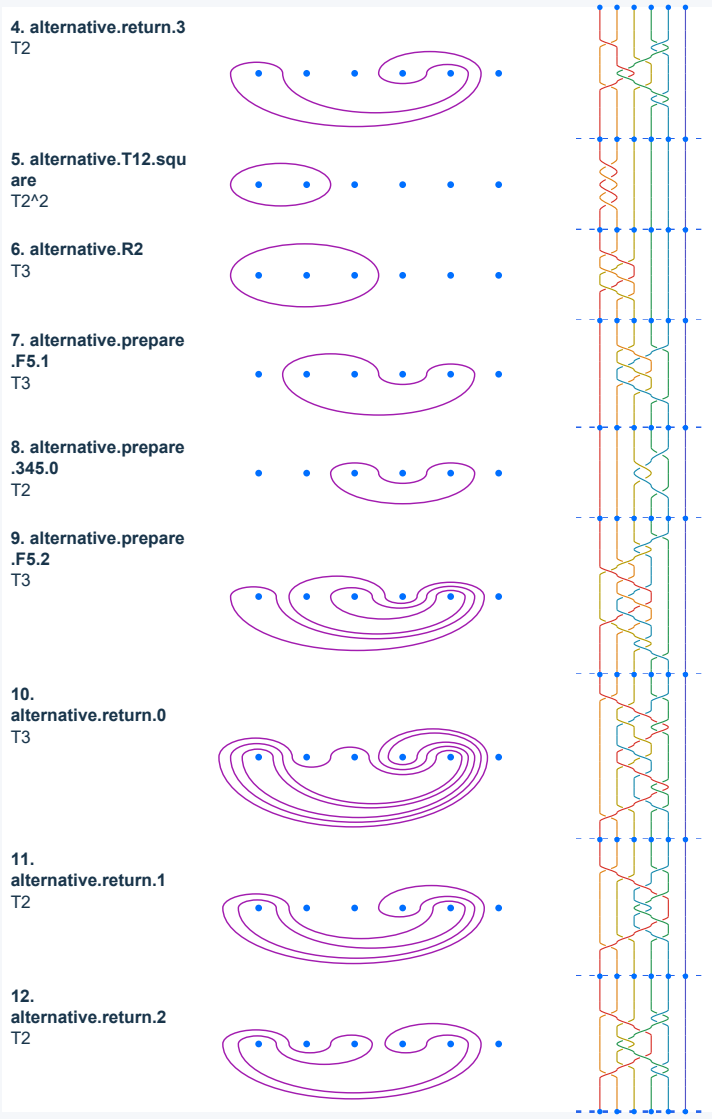

DISK MOVE: exact local free-word, based-action, or supported-class certificate retained.

3 unchanged displayed factors above; 7 below. Only the changed interval is shown.

Before

After

3 - step 028a

Close the original daisy after its actual Q14 returns

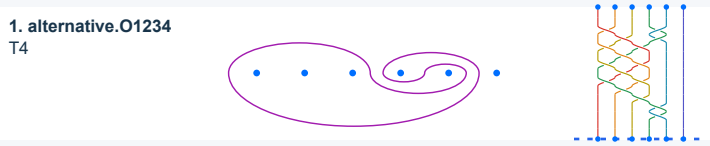

DISK MOVE: exact local free-word, based-action, or supported-class certificate retained.

0 unchanged displayed factors above; 15 below. Only the changed interval is shown. PARALLEL STEP 28: moves a, b are independent and each starts from the SAME input. Both orders are certified.

Before

After

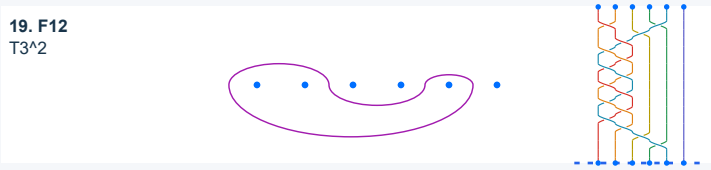

3 - step 028b

Split F12 into its two positive units

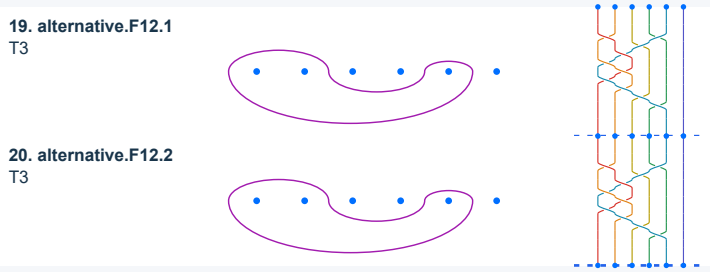

DISK MOVE: exact local free-word, based-action, or supported-class certificate retained.

18 unchanged displayed factors above; 0 below. Only the changed interval is shown. PARALLEL STEP 28: moves a, b are independent and each starts from the SAME input. Both orders are certified.

Before

After

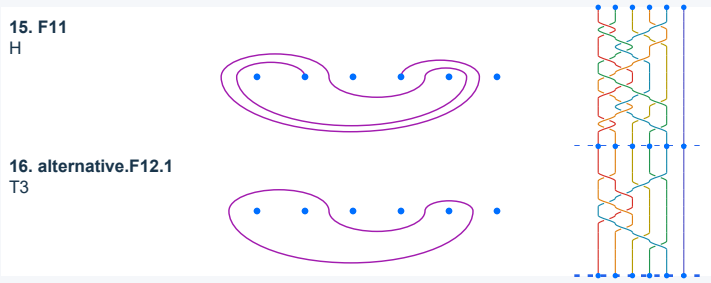

3 - step 029

One C12 root shortens F11

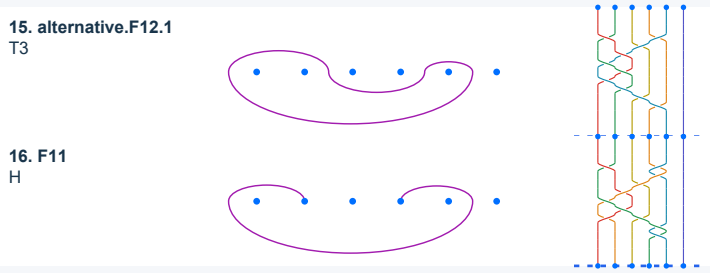

DISK MOVE: exact local free-word, based-action, or supported-class certificate retained.

14 unchanged displayed factors above; 1 below. Only the changed interval is shown.

Before

After

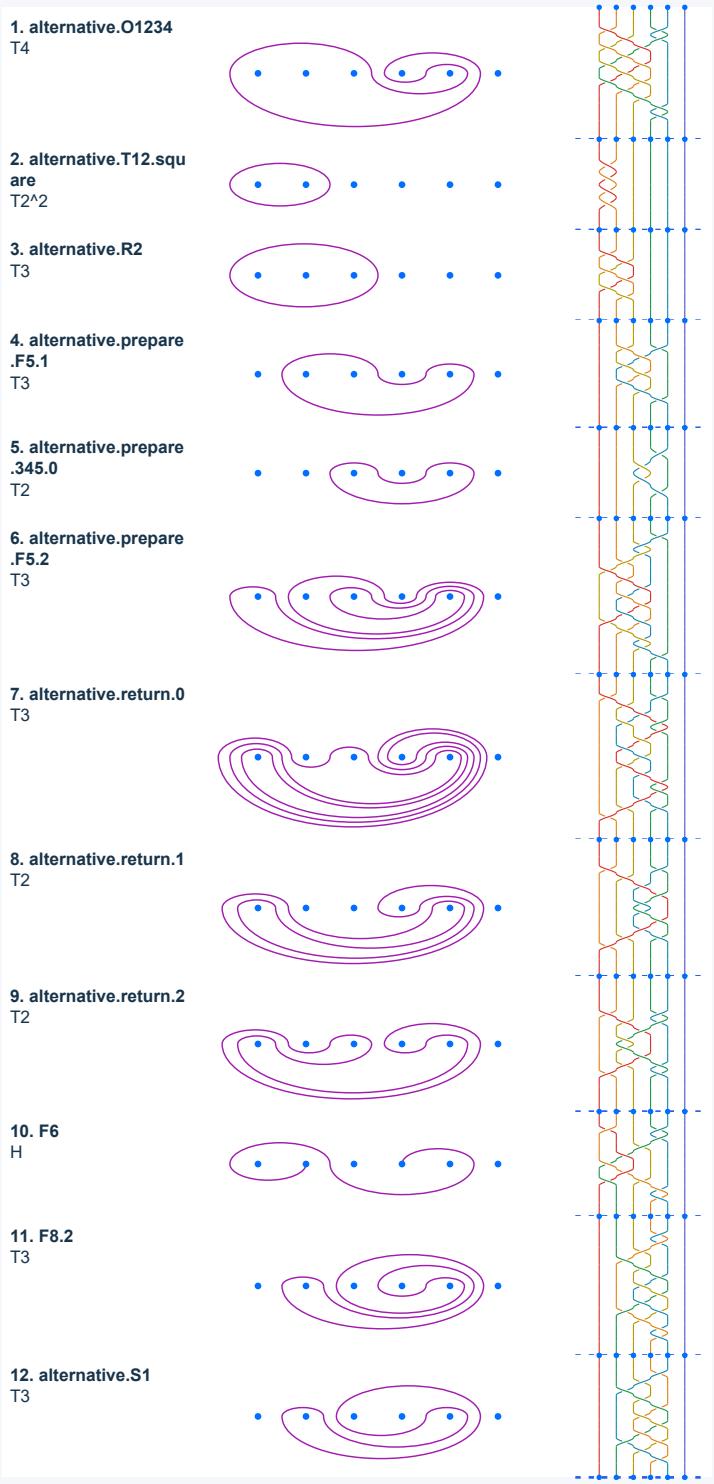

3 - step 030

Cyclic start after BOTH the square and its commuting outer

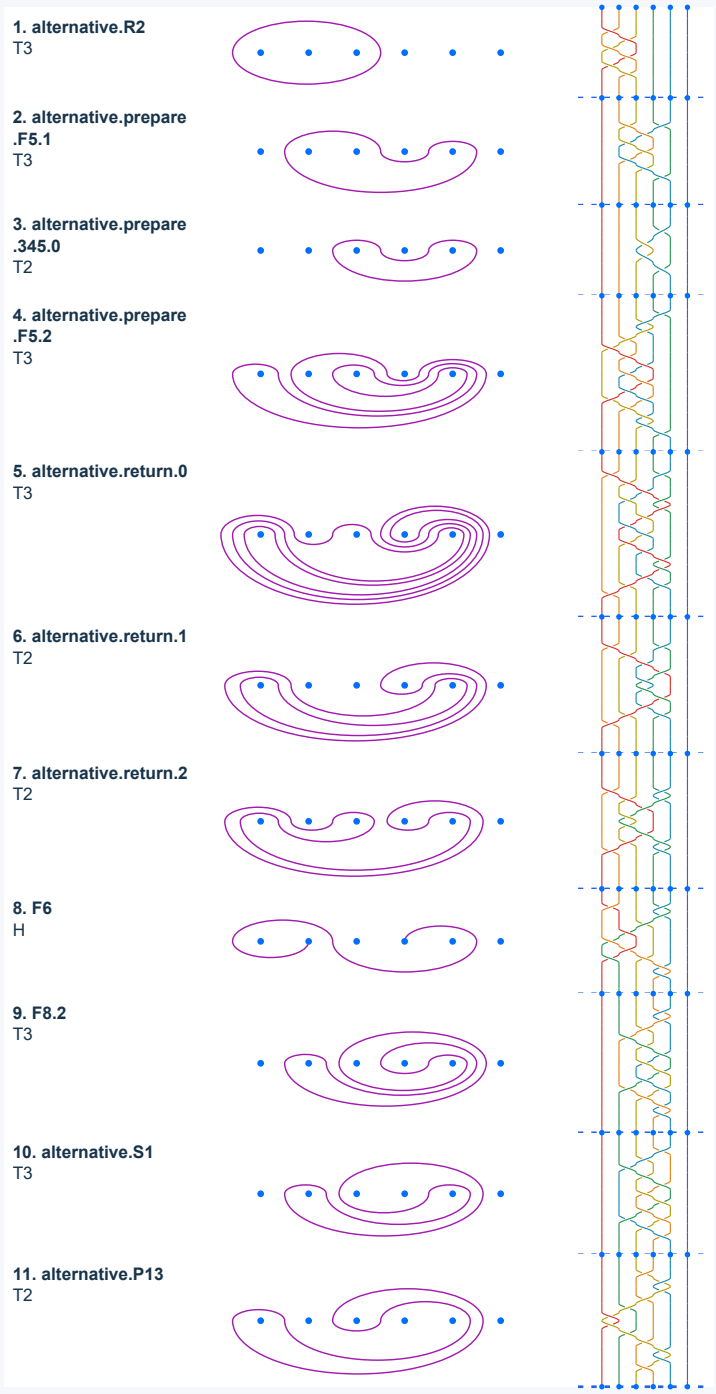

DISK MOVE: exact local free-word, based-action, or supported-class certificate retained.

0 unchanged displayed factors above; 0 below. Only the changed interval is shown.

Before

After

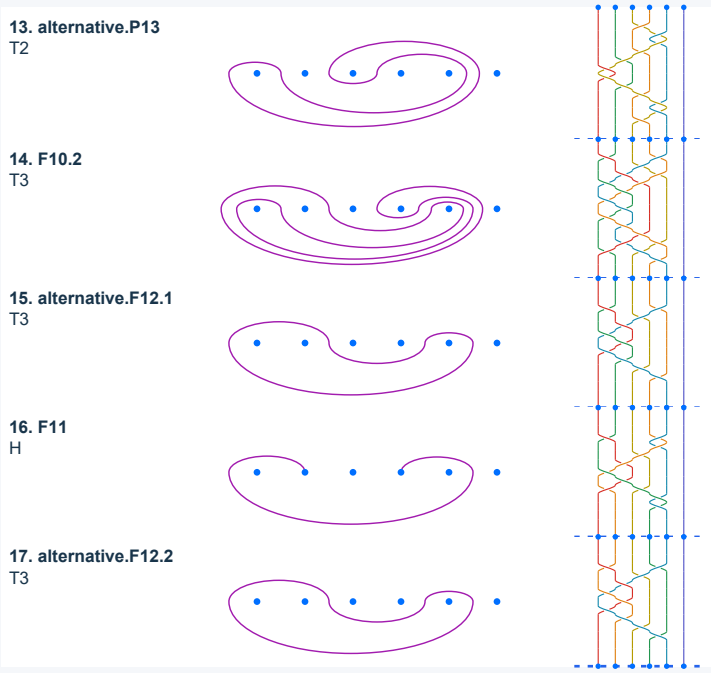

3 - step 030 - continued

Cyclic start after BOTH the square and its commuting outer

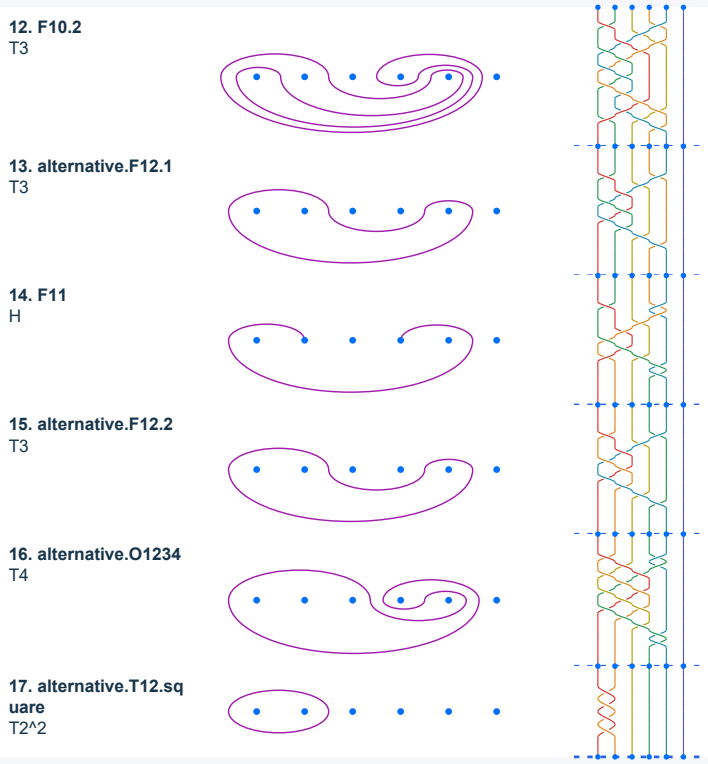

DISK MOVE: exact local free-word, based-action, or supported-class certificate retained.

0 unchanged displayed factors above; 0 below. Only the changed interval is shown.

Before

After

3 - step 031

One short-side square drag includes its commuting outer

DISK MOVE: exact local free-word, based-action, or supported-class certificate retained.

13 unchanged displayed factors above; 0 below. Only the changed interval is shown.

Before

After

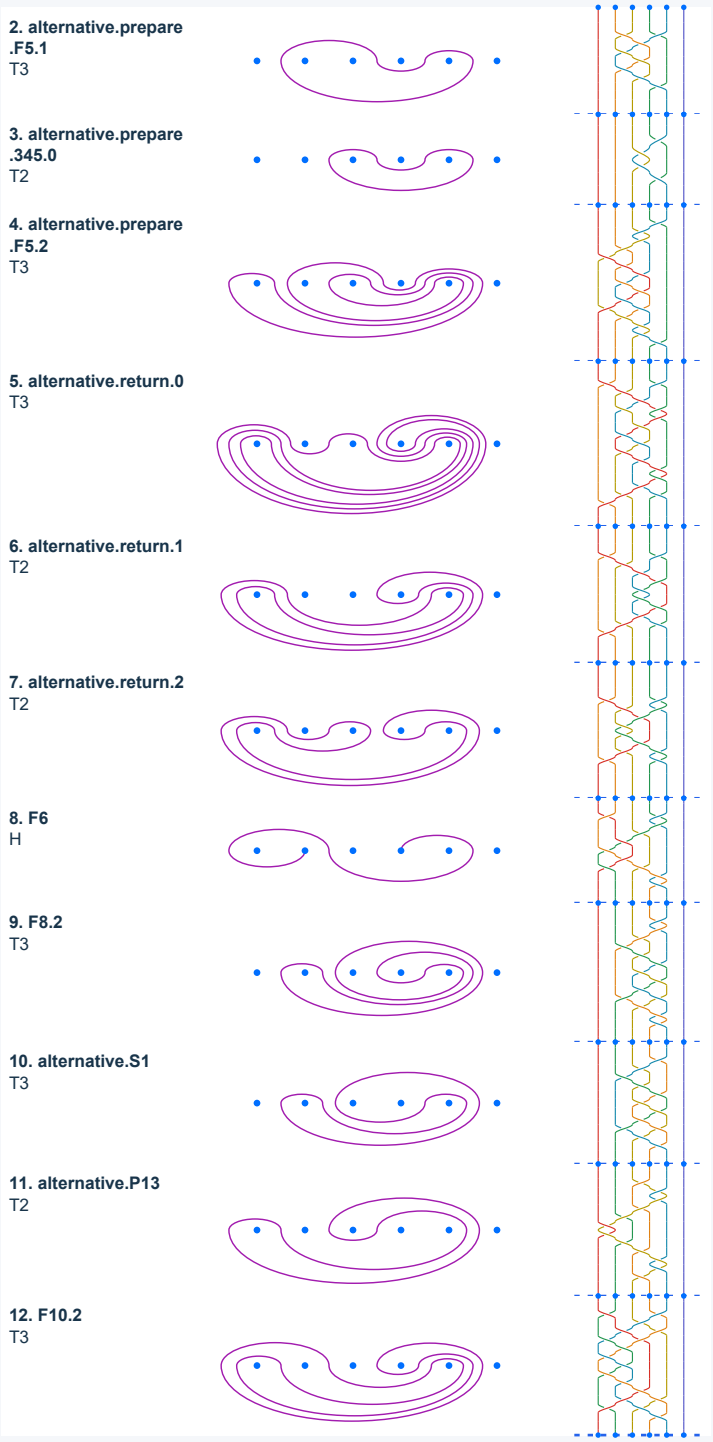

3 - step 032

The same composed sigma4 common frame

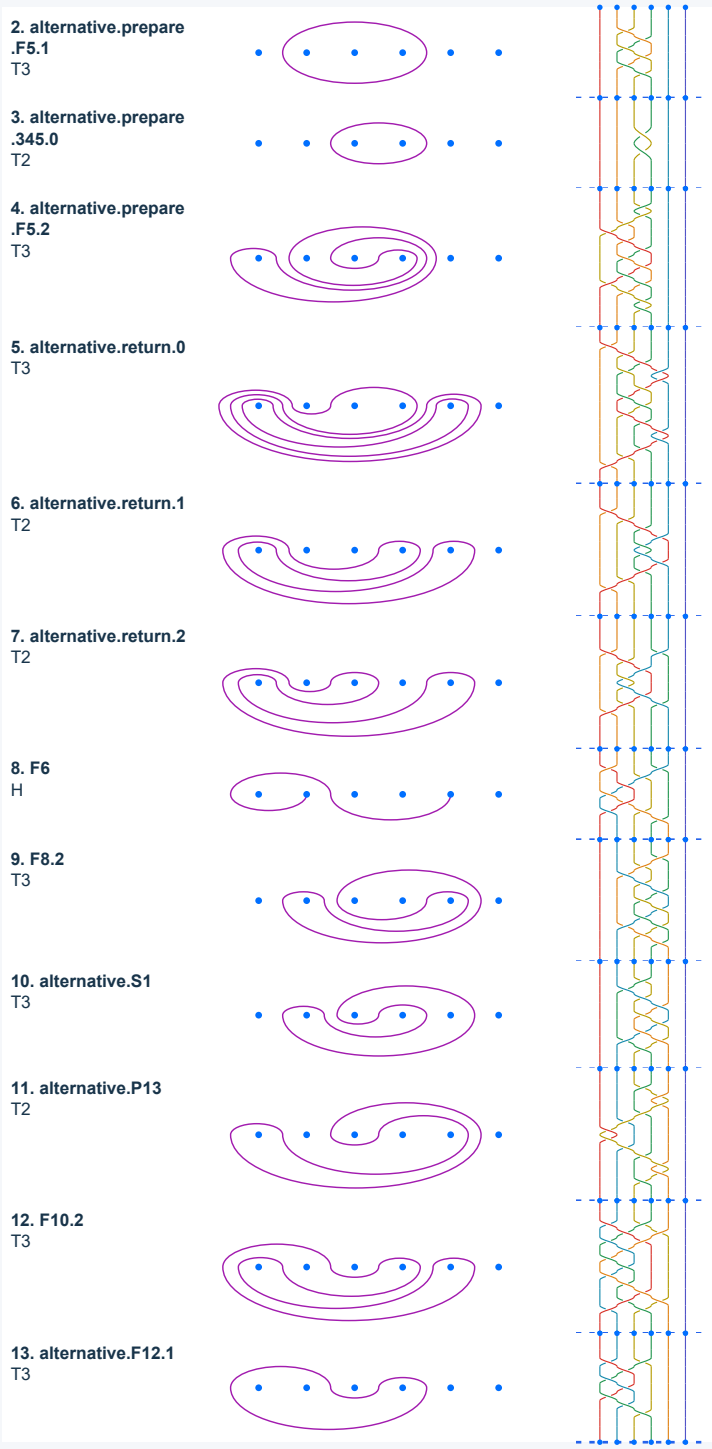

EXPLICIT GLOBAL CONJUGATION: a change of the whole product by the recorded frame.

1 unchanged displayed factors above; 0 below. Only the changed interval is shown.

Before

After

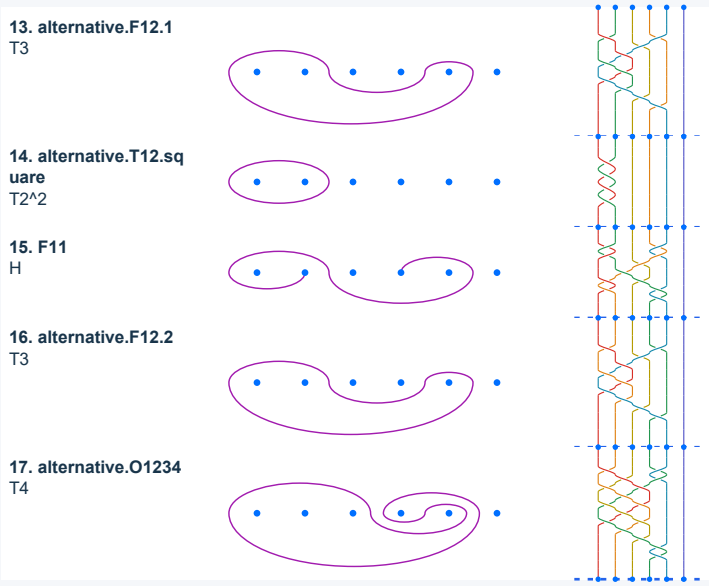

3 - step 032 - continued

The same composed sigma4 common frame

EXPLICIT GLOBAL CONJUGATION: a change of the whole product by the recorded frame.

1 unchanged displayed factors above; 0 below. Only the changed interval is shown.

Before

After

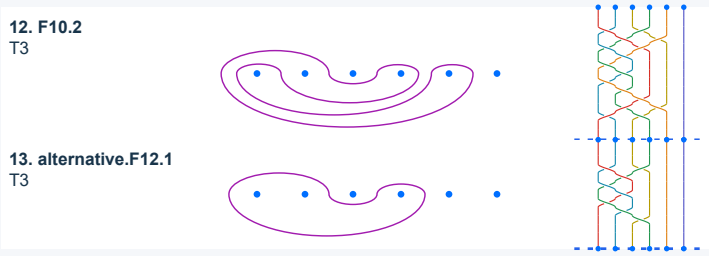

3 - step 033

Reorder C12 before the matching-half gather

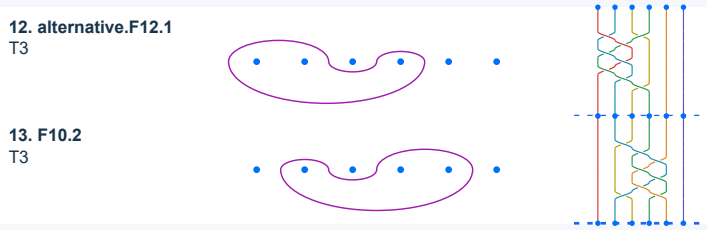

DISK MOVE: exact local free-word, based-action, or supported-class certificate retained.

11 unchanged displayed factors above; 4 below. Only the changed interval is shown.

Before

After

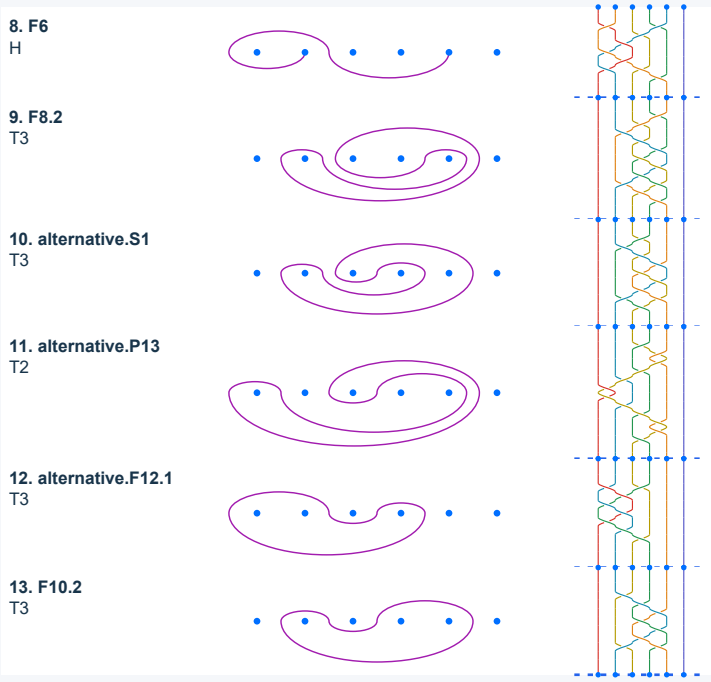

3 - step 034a

Carry F6 DOWN over the first five neighbors; keep F6 fixed

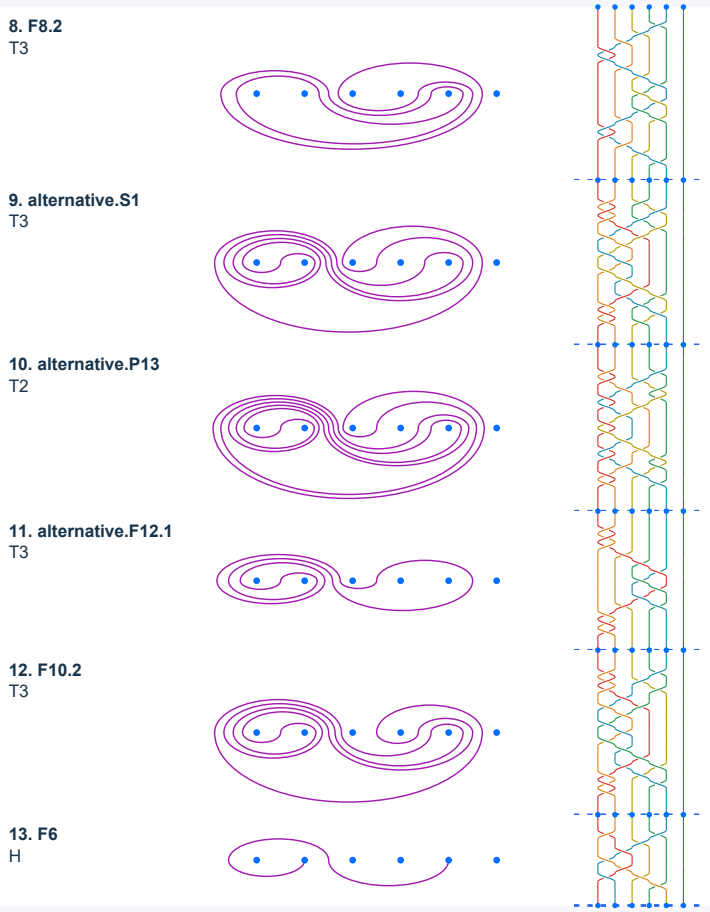

DISK MOVE: exact local free-word, based-action, or supported-class certificate retained.

7 unchanged displayed factors above; 4 below. Only the changed interval is shown. PARALLEL STEP 34: moves a, b are independent and each starts from the SAME input. Both orders are certified.

Before

After

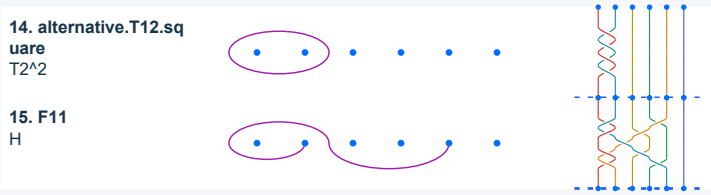

3 - step 034b

Carry F11 UP over the squared pair; keep F11 fixed

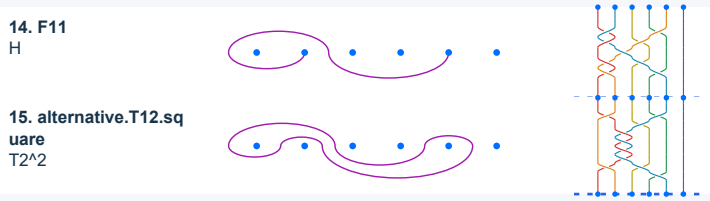

DISK MOVE: exact local free-word, based-action, or supported-class certificate retained.

13 unchanged displayed factors above; 2 below. Only the changed interval is shown. PARALLEL STEP 34: moves a, b are independent and each starts from the SAME input. Both orders are certified.

Before

After

3 - step 035

Combine the unchanged half twists where they meet

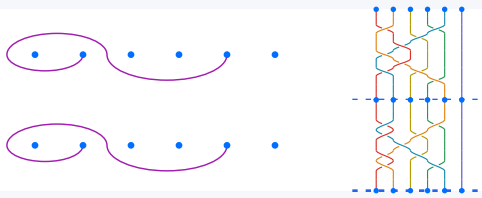

DISK MOVE: exact local free-word, based-action, or supported-class certificate retained.

12 unchanged displayed factors above; 3 below. Only the changed interval is shown.

Before

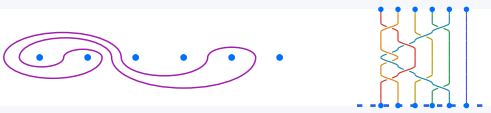

13. F6
H

14. F11
H

After

13. alternative.P24
T2

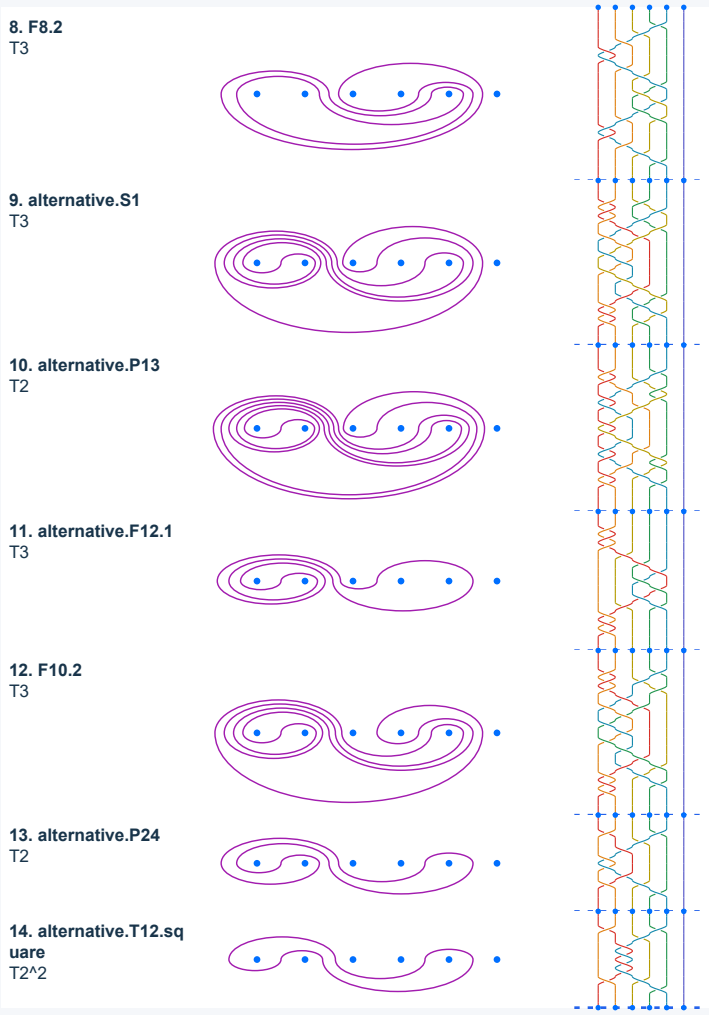

3 - step 036

Carry the combined full twist UP over five neighbors; the lower square stays fixed

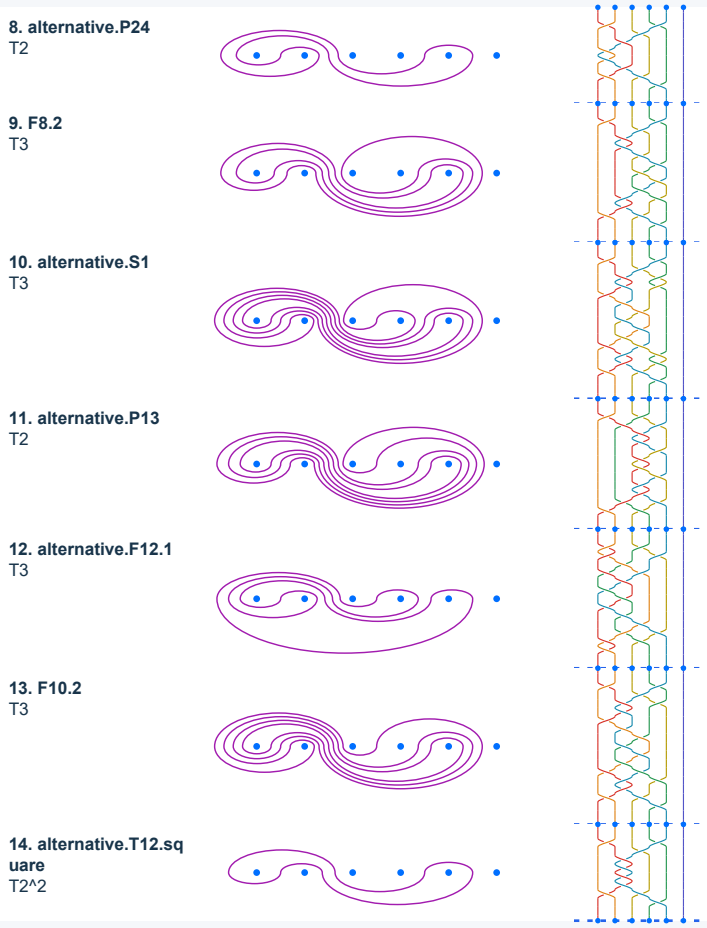

DISK MOVE: exact local free-word, based-action, or supported-class certificate retained.

7 unchanged displayed factors above; 2 below. Only the changed interval is shown.

Before

After

3 - step 037

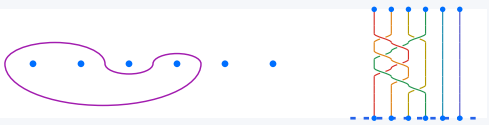

Expand the retained three-point root after the half twists combine

DISK MOVE: exact local free-word, based-action, or supported-class certificate retained.

14 unchanged displayed factors above; 1 below. Only the changed interval is shown.

3 - step 038

Cyclic start at Q15 REJOINS the unchanged route

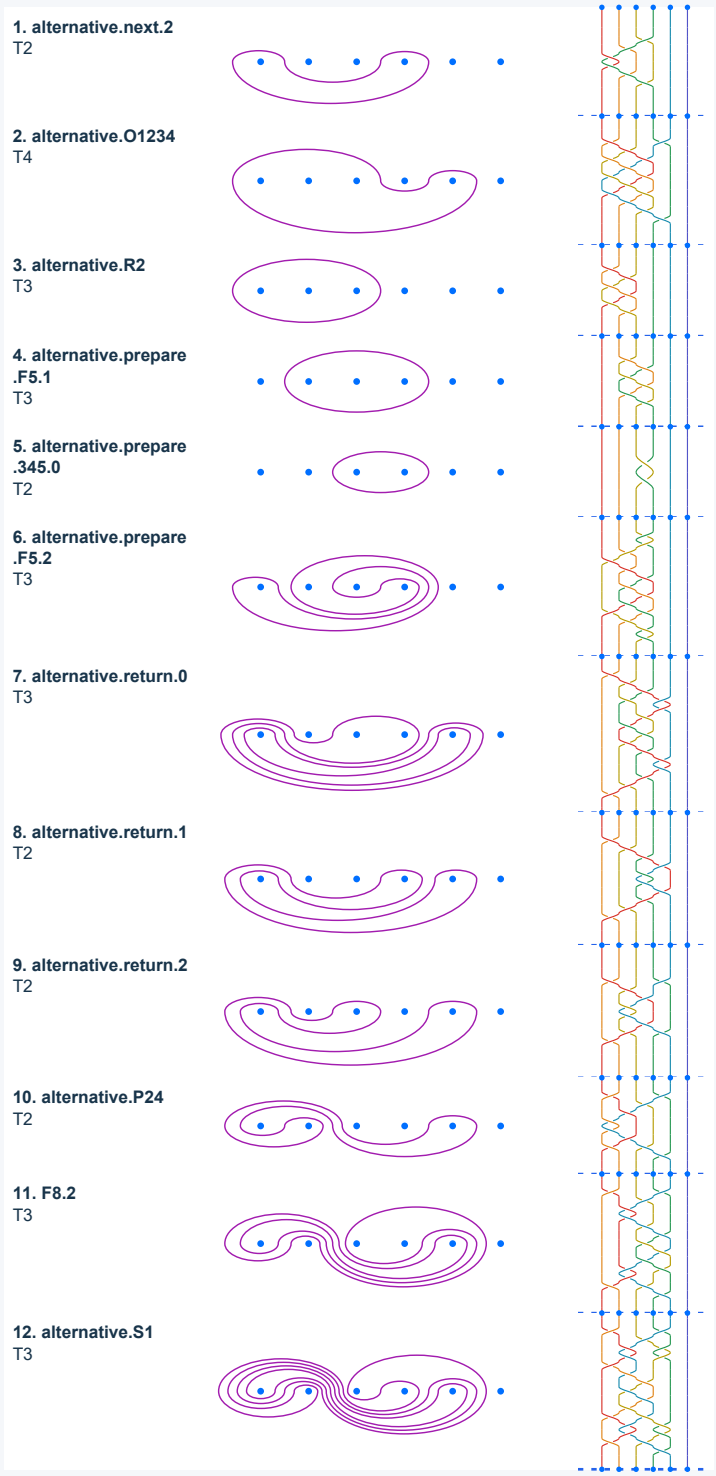

DISK MOVE: exact local free-word, based-action, or supported-class certificate retained.

0 unchanged displayed factors above; 0 below. Only the changed interval is shown.

Before

After

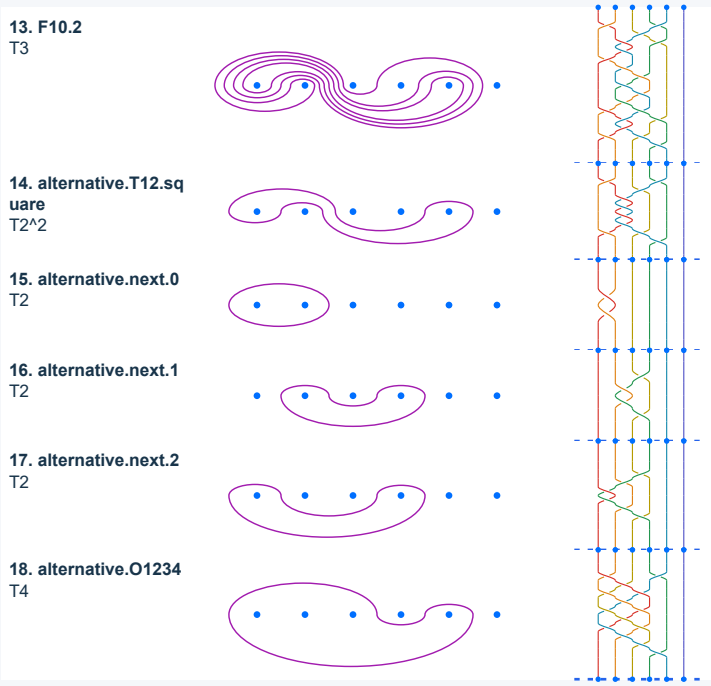

3 - step 038 - continued

Cyclic start at Q15 REJOINS the unchanged route

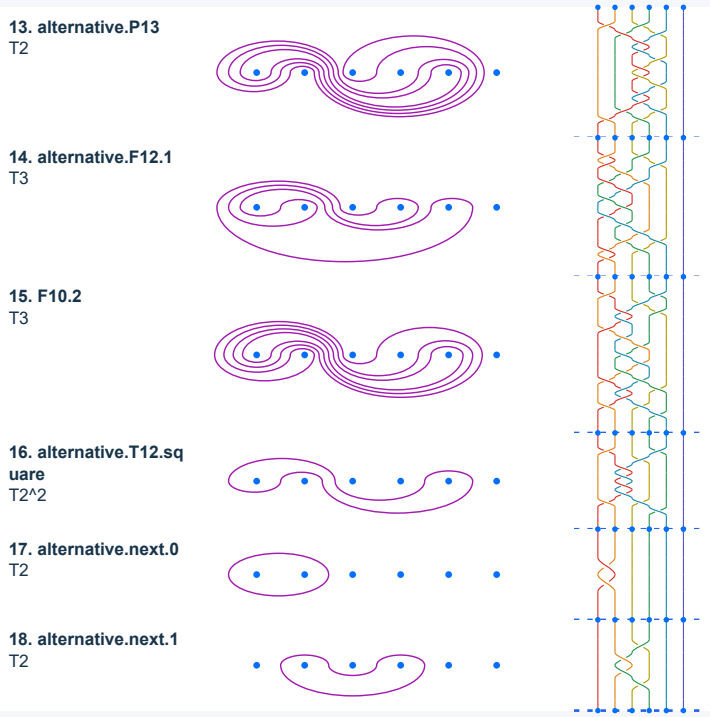

DISK MOVE: exact local free-word, based-action, or supported-class certificate retained.

0 unchanged displayed factors above; 0 below. Only the changed interval is shown.

Before

After

3 - step 039

Carry Q15 through the combined four-point prefix and the two roots

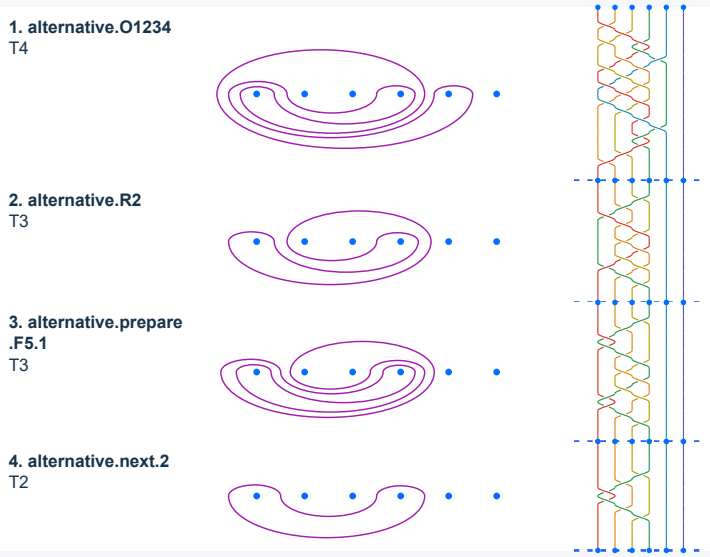

DISK MOVE: exact local free-word, based-action, or supported-class certificate retained.

0 unchanged displayed factors above; 14 below. Only the changed interval is shown.

Before

After

3 - step 040

PC cluster lantern gives the second four-point twist

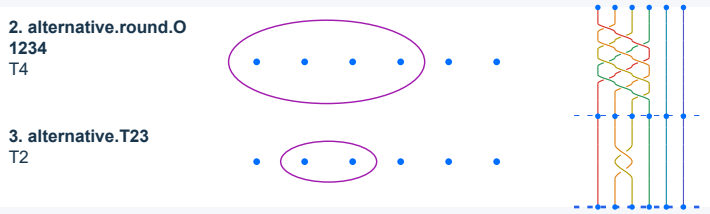

DISK MOVE: exact local free-word, based-action, or supported-class certificate retained.

1 unchanged displayed factors above; 14 below. Only the changed interval is shown.

Before

After

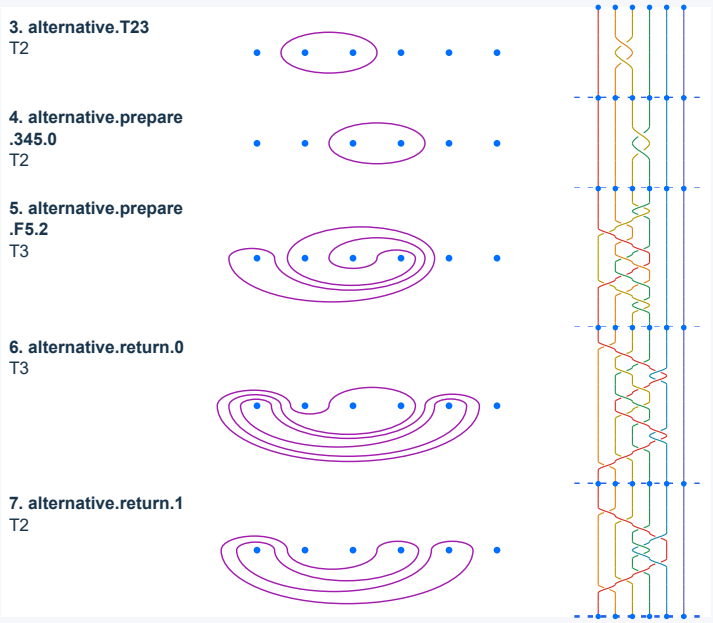

3 - step 041

Gather the ACTUAL missing 45 petal by the short side

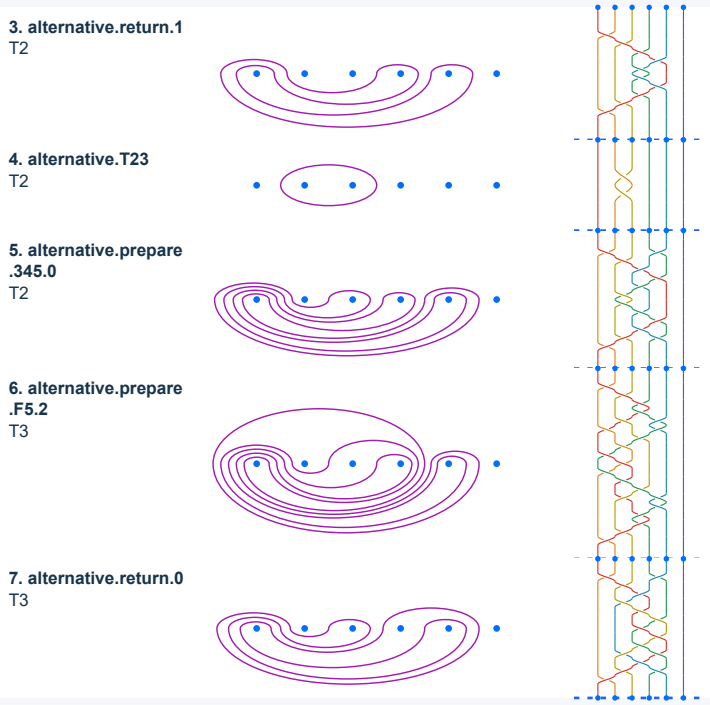

DISK MOVE: exact local free-word, based-action, or supported-class certificate retained.

2 unchanged displayed factors above; 10 below. Only the changed interval is shown.

Before

After

3 - step 042a

Cabled PC lantern on the ACTUAL two four-point curves and supplied 45 petal

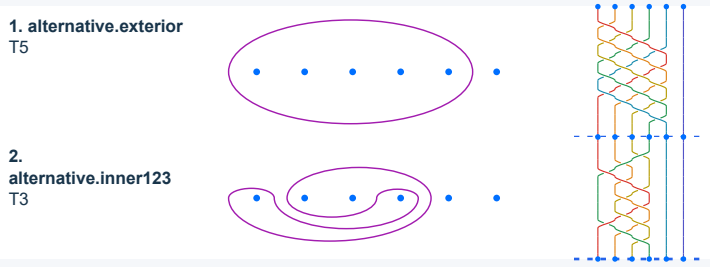

DISK MOVE: exact local free-word, based-action, or supported-class certificate retained.

0 unchanged displayed factors above; 14 below. Only the changed interval is shown. PARALLEL STEP 42: moves a, b are independent and each starts from the SAME input. Both orders are certified.

Before

After

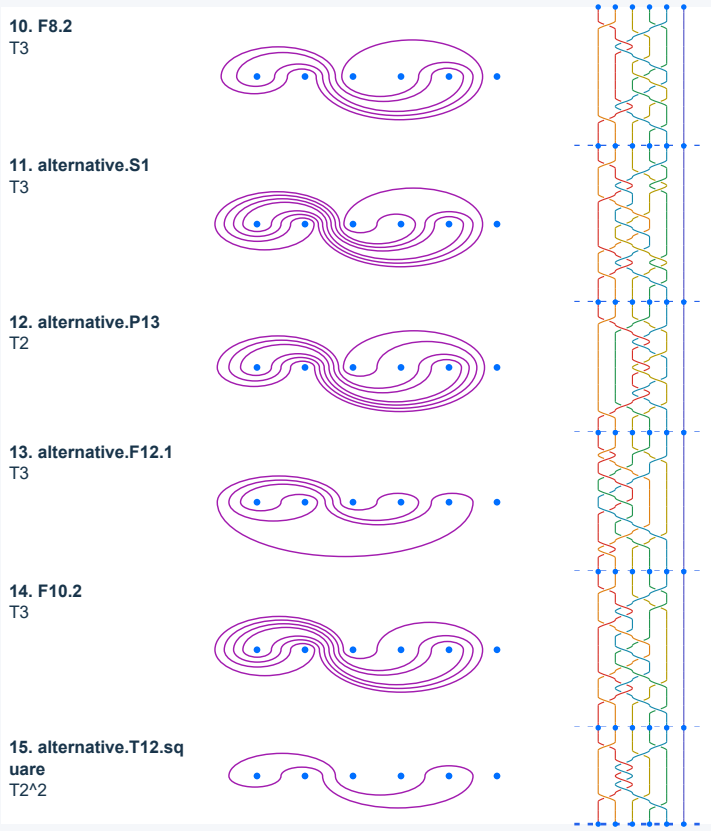

3 - step 042b

Unwind five actual residual curves with the fixed positive square

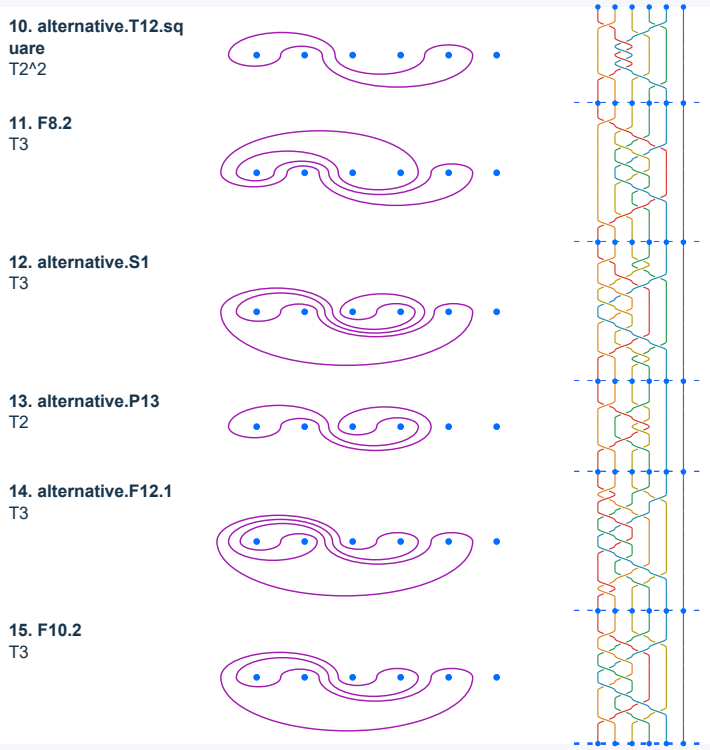

DISK MOVE: exact local free-word, based-action, or supported-class certificate retained.

9 unchanged displayed factors above; 2 below. Only the changed interval is shown. PARALLEL STEP 42: moves a, b are independent and each starts from the SAME input. Both orders are certified.

Before

After

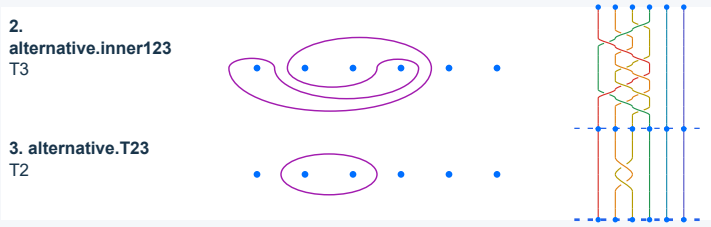

3 - step 043

Commute the 123 root past T23 to its actual 34 and 124 companions

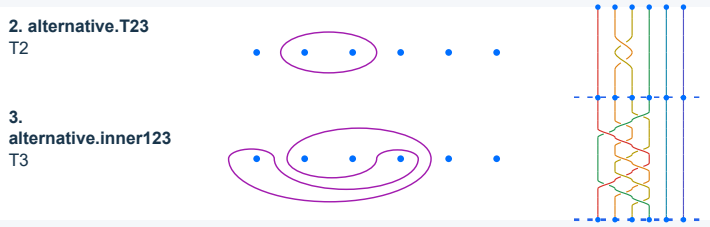

DISK MOVE: exact local free-word, based-action, or supported-class certificate retained.

1 unchanged displayed factors above; 13 below. Only the changed interval is shown.

Before

After

3 - step 044a

Cabled PC lantern contracts the ACTUAL 123, 34 and 124 curves

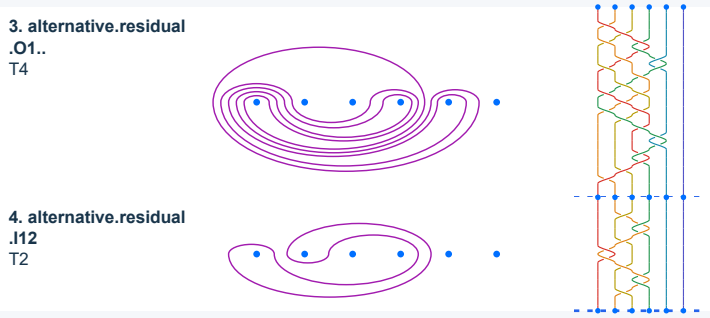

DISK MOVE: exact local free-word, based-action, or supported-class certificate retained.

2 unchanged displayed factors above; 11 below. Only the changed interval is shown. PARALLEL STEP 44: moves a, b, c are independent and each starts from the SAME input. Both orders are certified.

Before

After

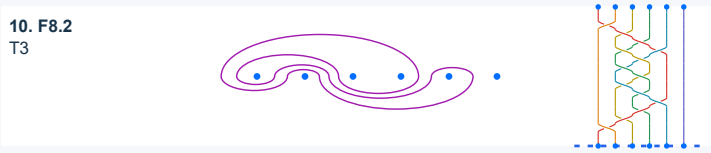

3 - step 044b

The actual 345 daisy lends its round 34 petal

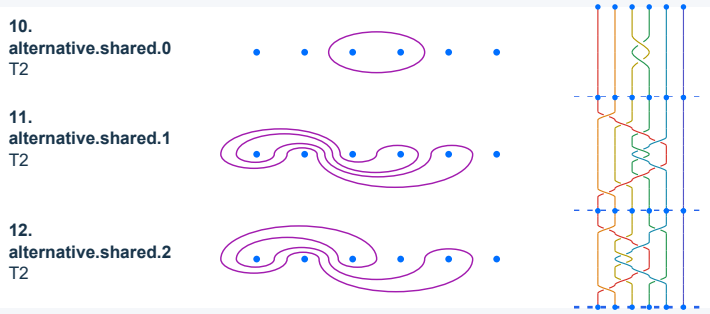

DISK MOVE: exact local free-word, based-action, or supported-class certificate retained.

9 unchanged displayed factors above; 6 below. Only the changed interval is shown. PARALLEL STEP 44: moves a, b, c are independent and each starts from the SAME input. Both orders are certified.

Before

After

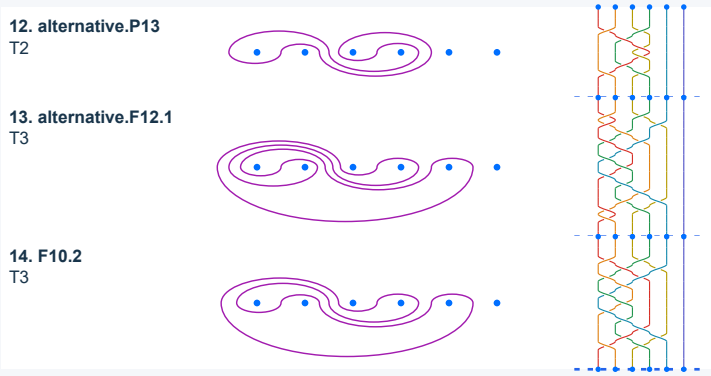

3 - step 044c

Carry the 245 root up across the 145 root and the 13 pair

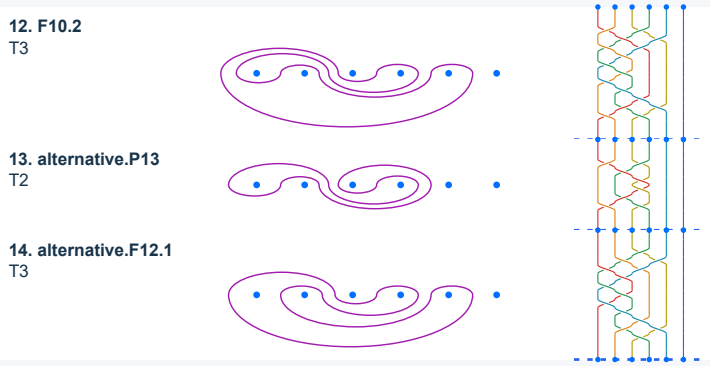

DISK MOVE: exact local free-word, based-action, or supported-class certificate retained.

11 unchanged displayed factors above; 2 below. Only the changed interval is shown. PARALLEL STEP 44: moves a, b, c are independent and each starts from the SAME input. Both orders are certified.

Before

After

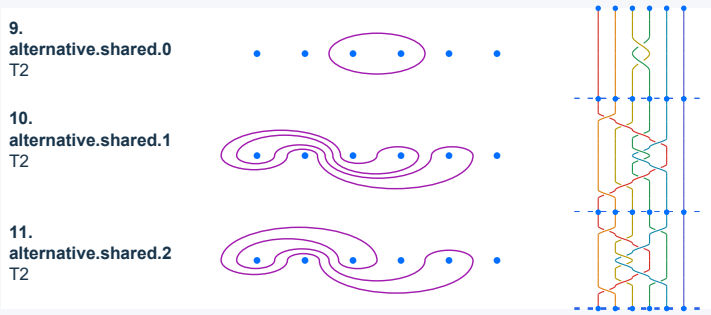

3 - step 045

Carry round 34 down through its own two remaining petals

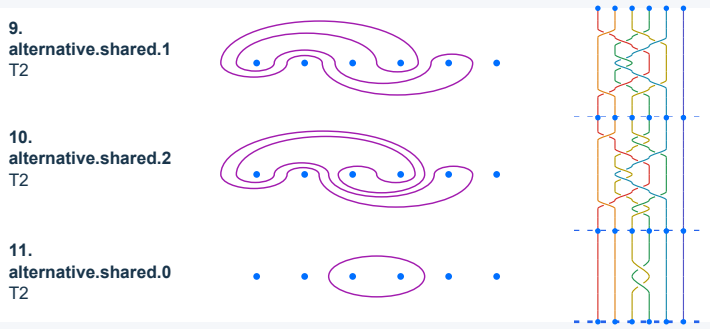

DISK MOVE: exact local free-word, based-action, or supported-class certificate retained.

8 unchanged displayed factors above; 6 below. Only the changed interval is shown.

Before

After

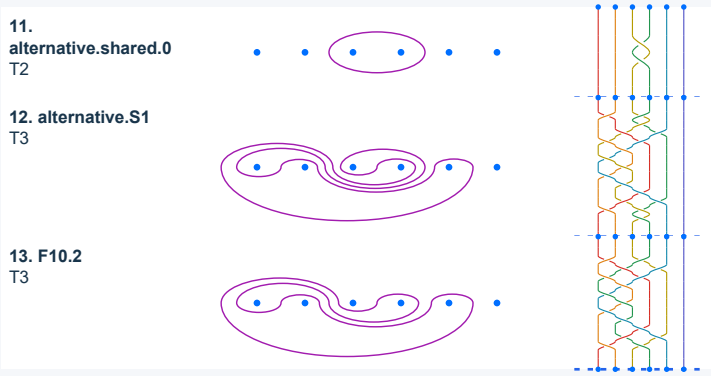

3 - step 046a

Cabled PC lantern closes the actual 34, 235 and 245 cluster

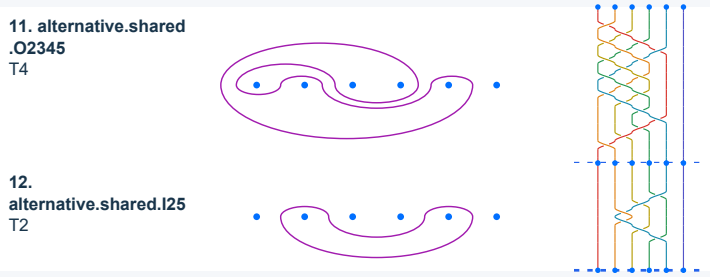

DISK MOVE: exact local free-word, based-action, or supported-class certificate retained.

10 unchanged displayed factors above; 4 below. Only the changed interval is shown. PARALLEL STEP 46: moves a, b are independent and each starts from the SAME input. Both orders are certified.

Before

After

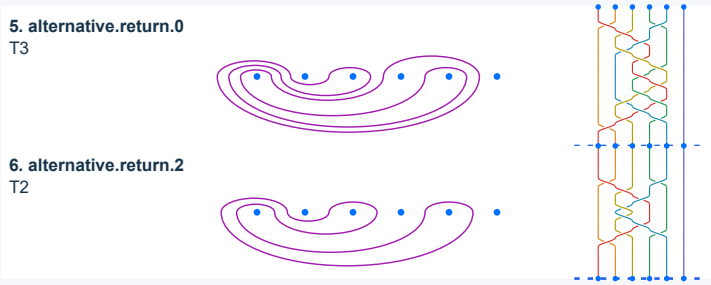

3 - step 046b

The actual 35 pair unwinds the 134 root to a short chart

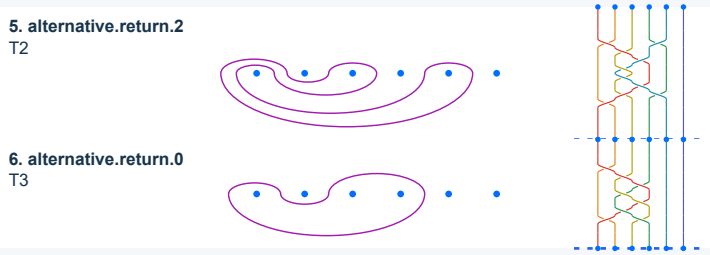

DISK MOVE: exact local free-word, based-action, or supported-class certificate retained.

4 unchanged displayed factors above; 11 below. Only the changed interval is shown. PARALLEL STEP 46: moves a, b are independent and each starts from the SAME input. Both orders are certified.

Before

After

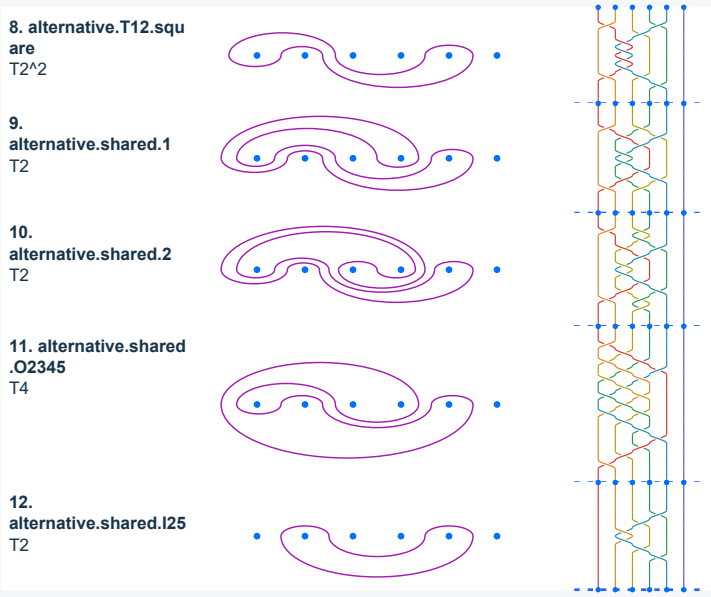

3 - step 047

Carry the shared 25 pair up; unwind the square and its two petals

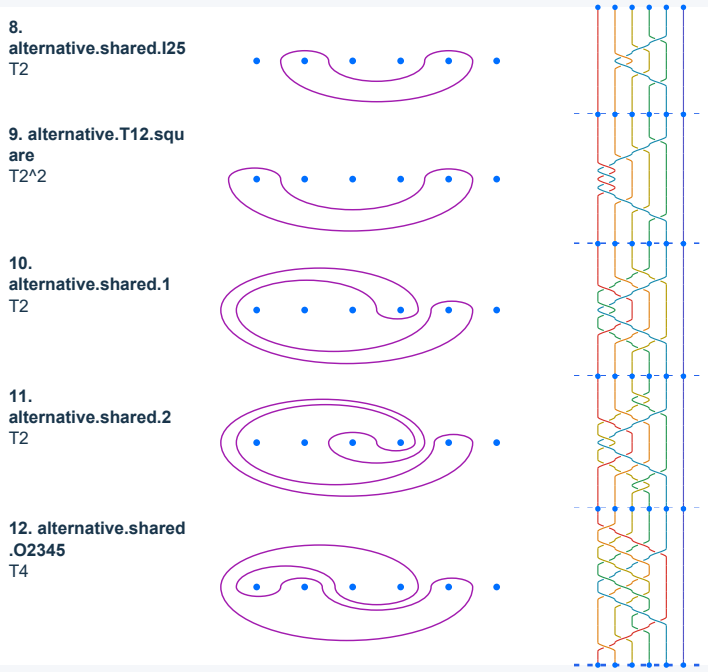

DISK MOVE: exact local free-word, based-action, or supported-class certificate retained.

7 unchanged displayed factors above; 4 below. Only the changed interval is shown.

Before

After

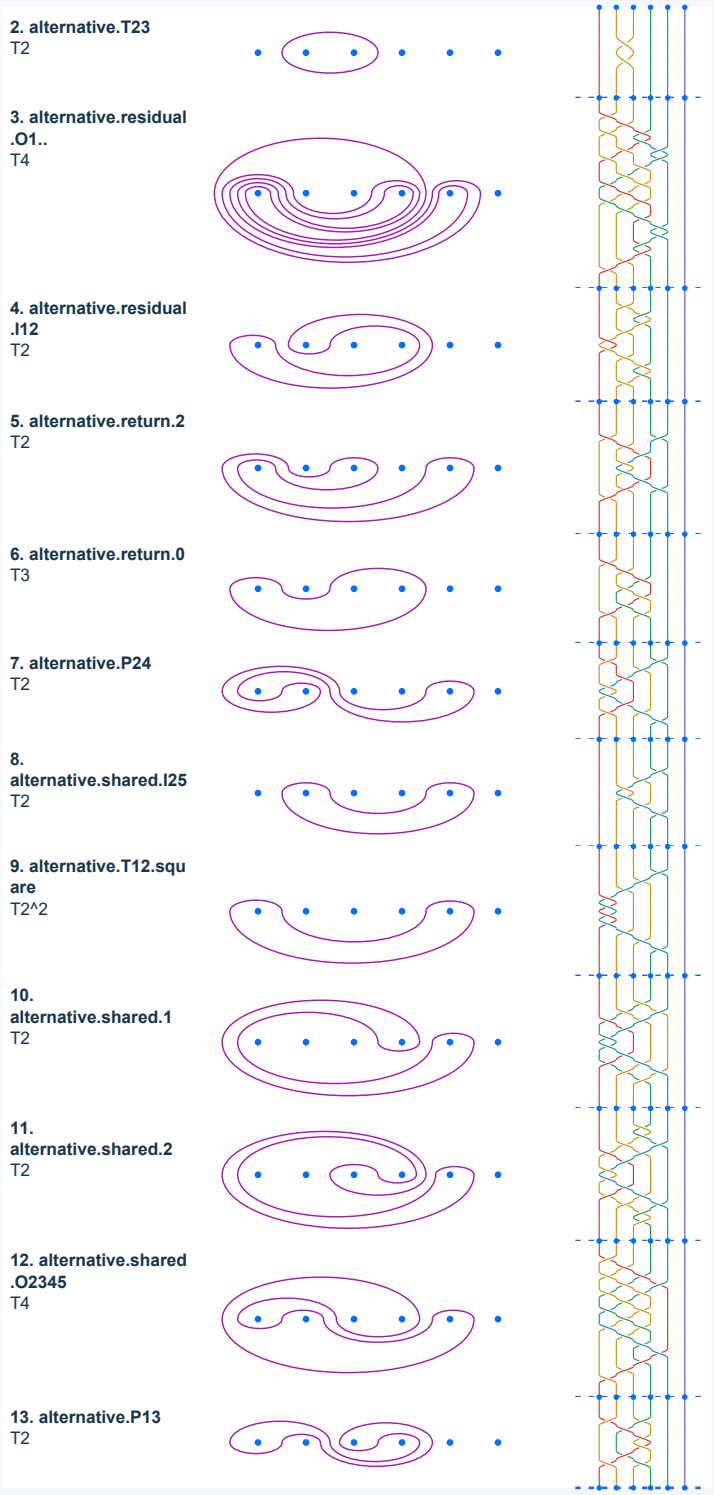

3 - step 048

Common disk frame keeps the inside-four daisy readable

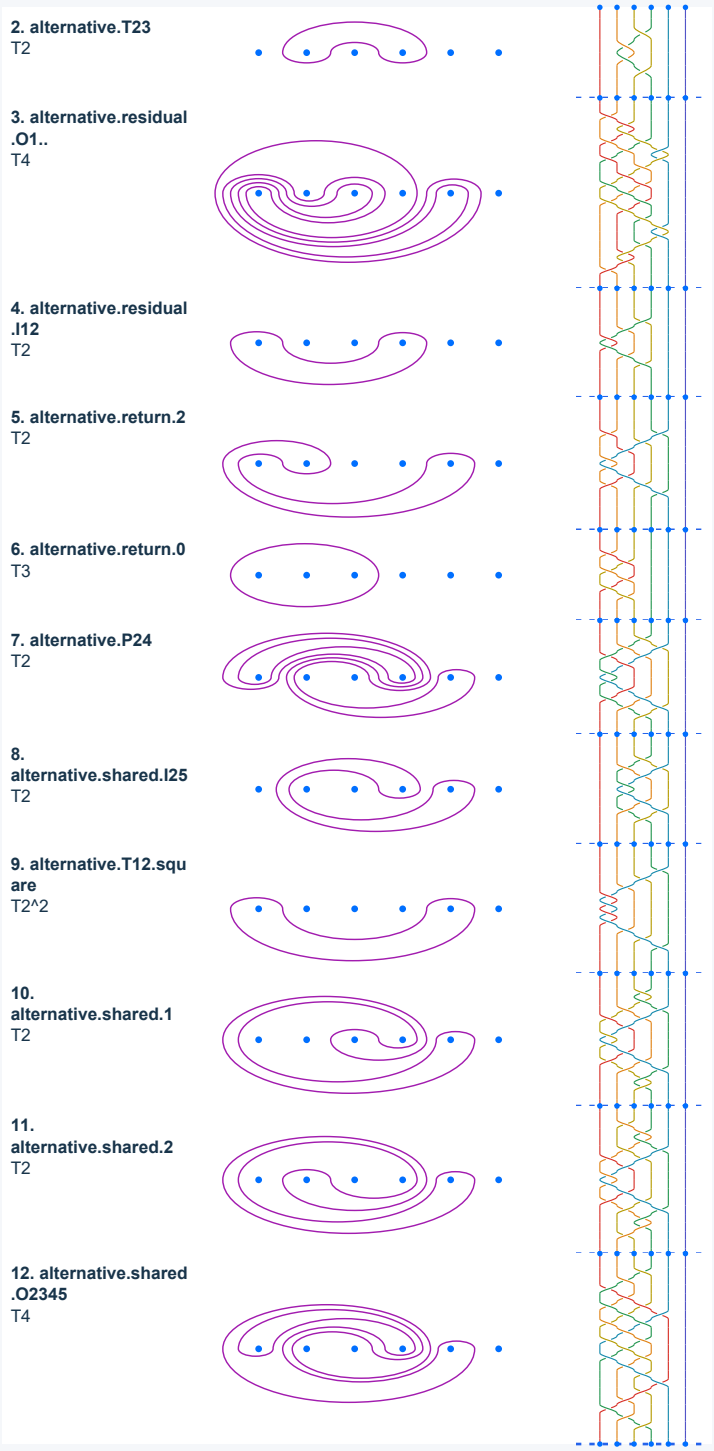

EXPLICIT GLOBAL CONJUGATION: a change of the whole product by the recorded frame.

1 unchanged displayed factors above; 0 below. Only the changed interval is shown.

Before

After

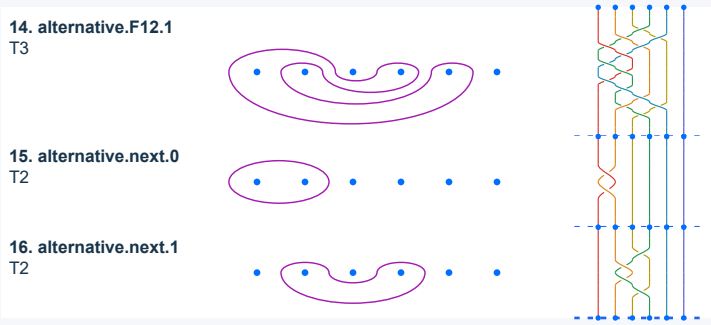

3 - step 048 - continued

Common disk frame keeps the inside-four daisy readable

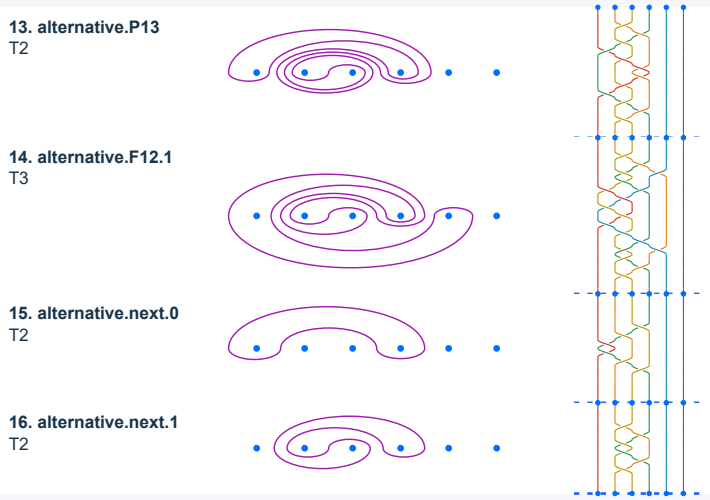

EXPLICIT GLOBAL CONJUGATION: a change of the whole product by the recorded frame.

1 unchanged displayed factors above; 0 below. Only the changed interval is shown.

Before

After

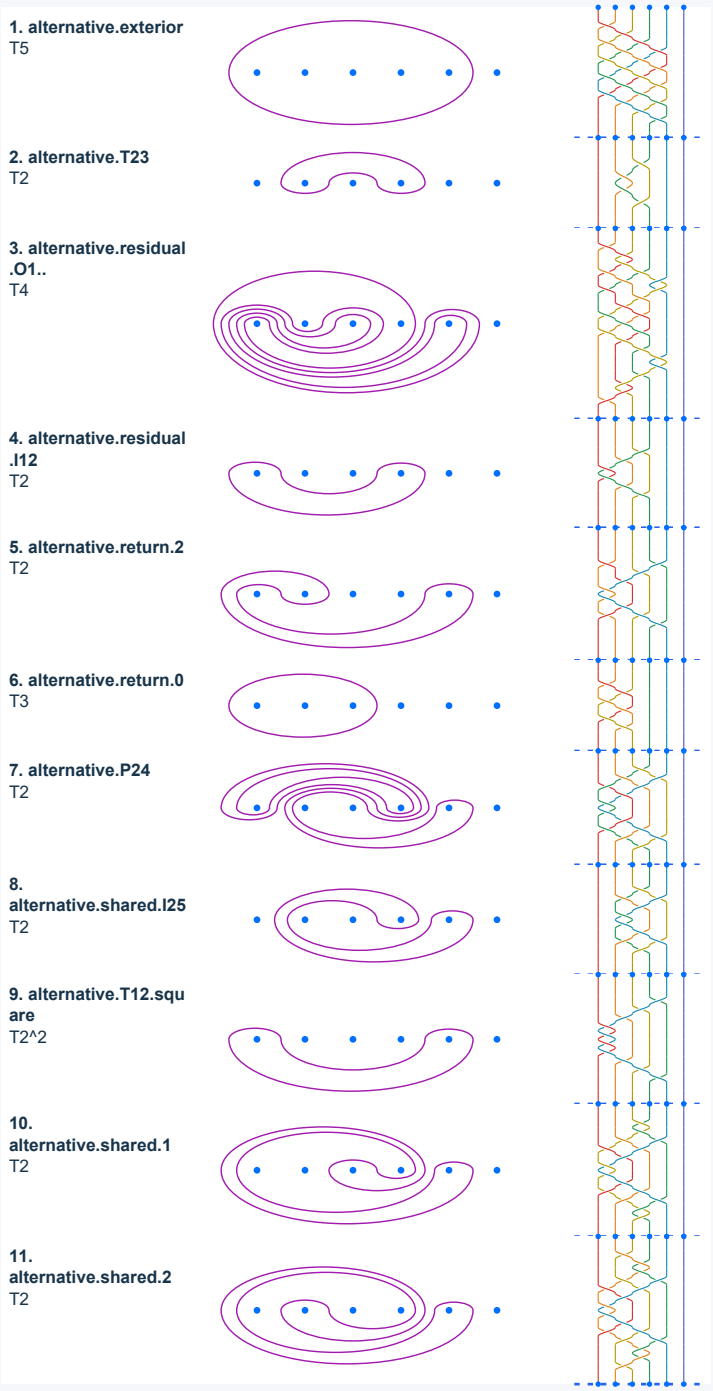

3 - step 049

Choose the cyclic start at the actual three-point root

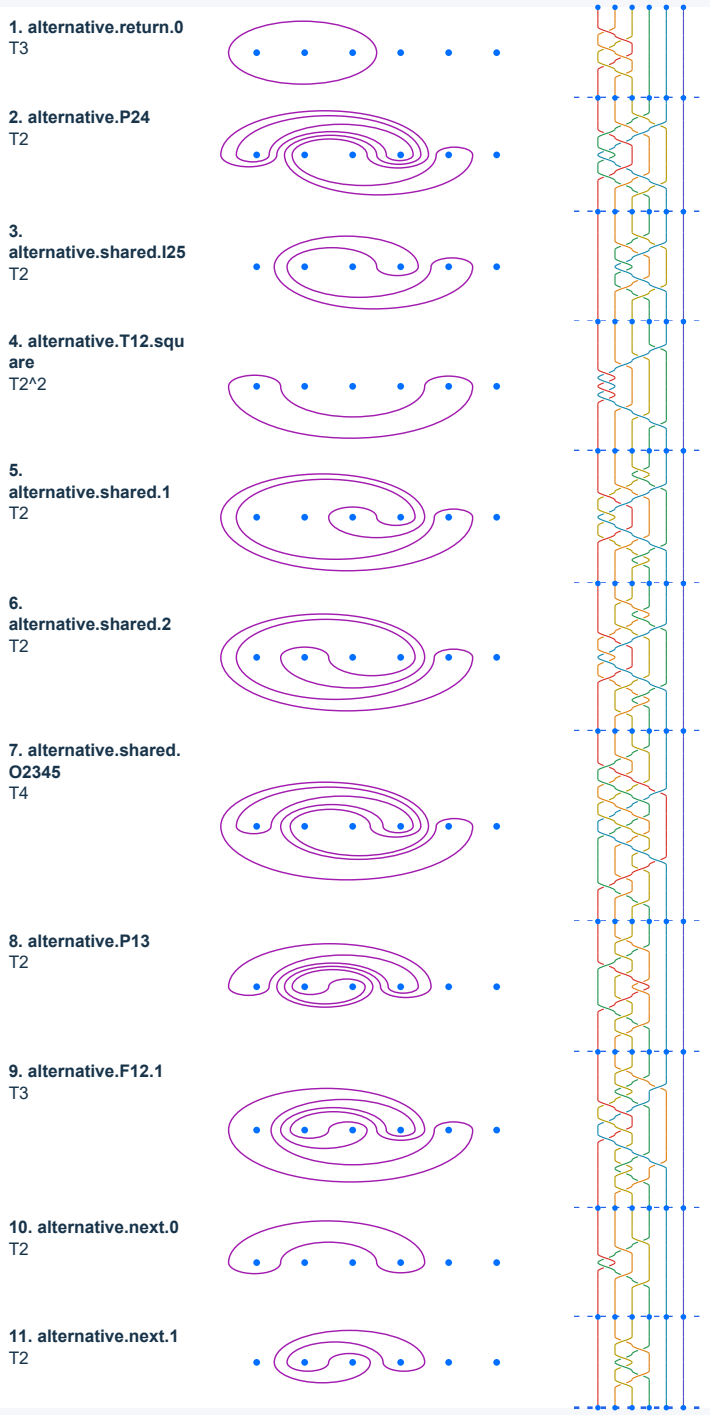

DISK MOVE: exact local free-word, based-action, or supported-class certificate retained.

0 unchanged displayed factors above; 0 below. Only the changed interval is shown.

Before

After

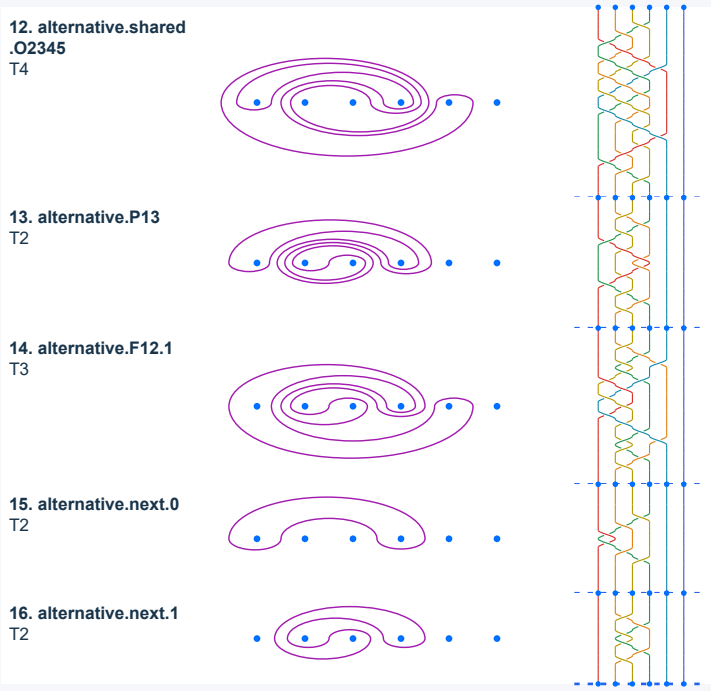

3 - step 049 - continued

Choose the cyclic start at the actual three-point root

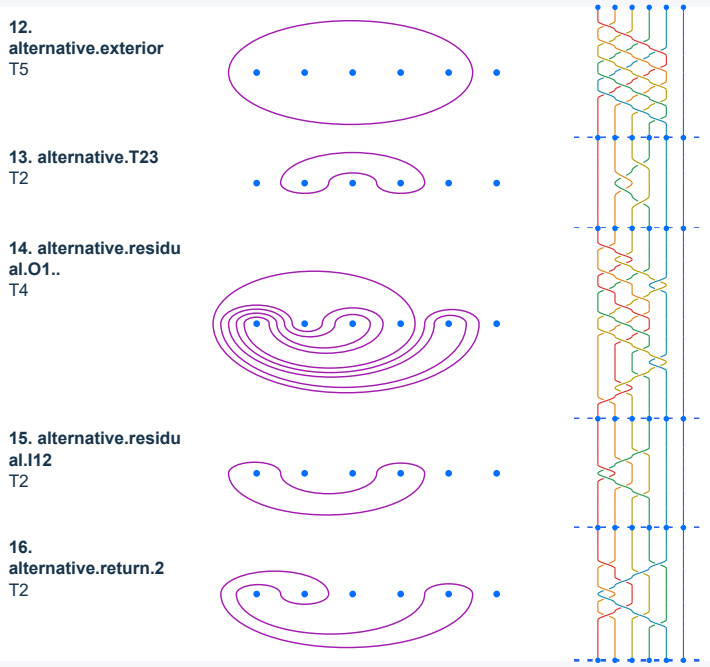

DISK MOVE: exact local free-word, based-action, or supported-class certificate retained.

0 unchanged displayed factors above; 0 below. Only the changed interval is shown.

Before

After

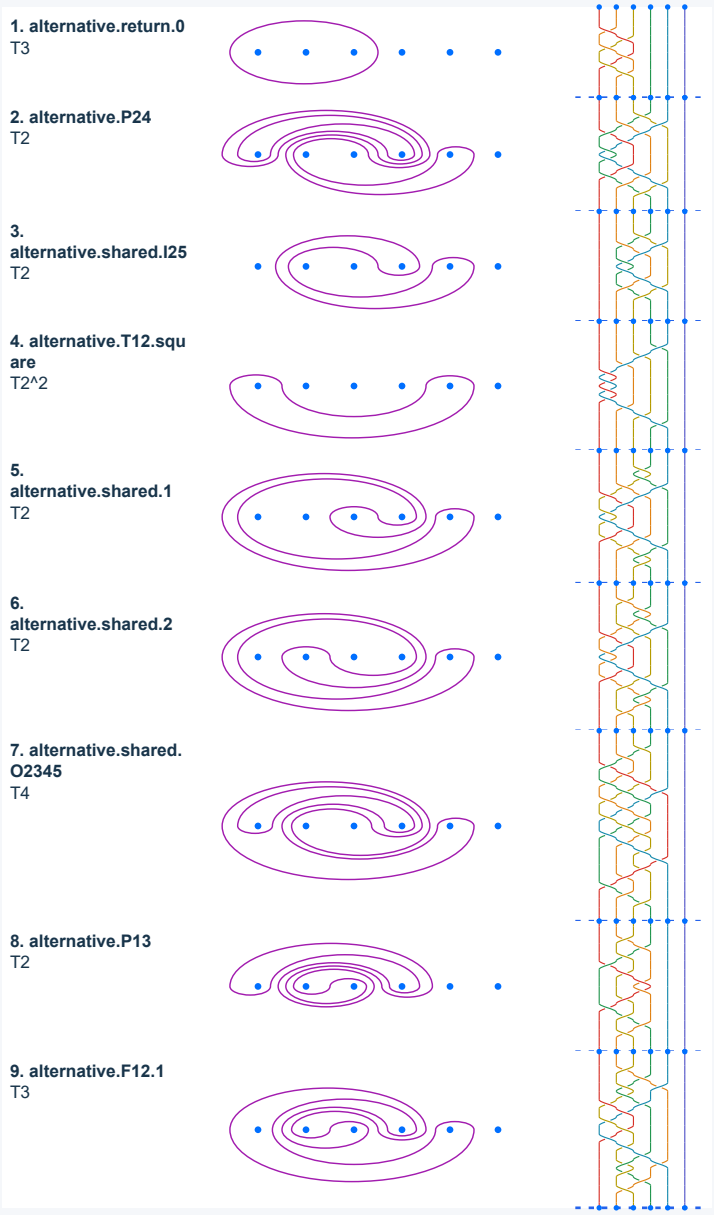

3 - step 050a

Carry the three-point root down through the eight residual factors

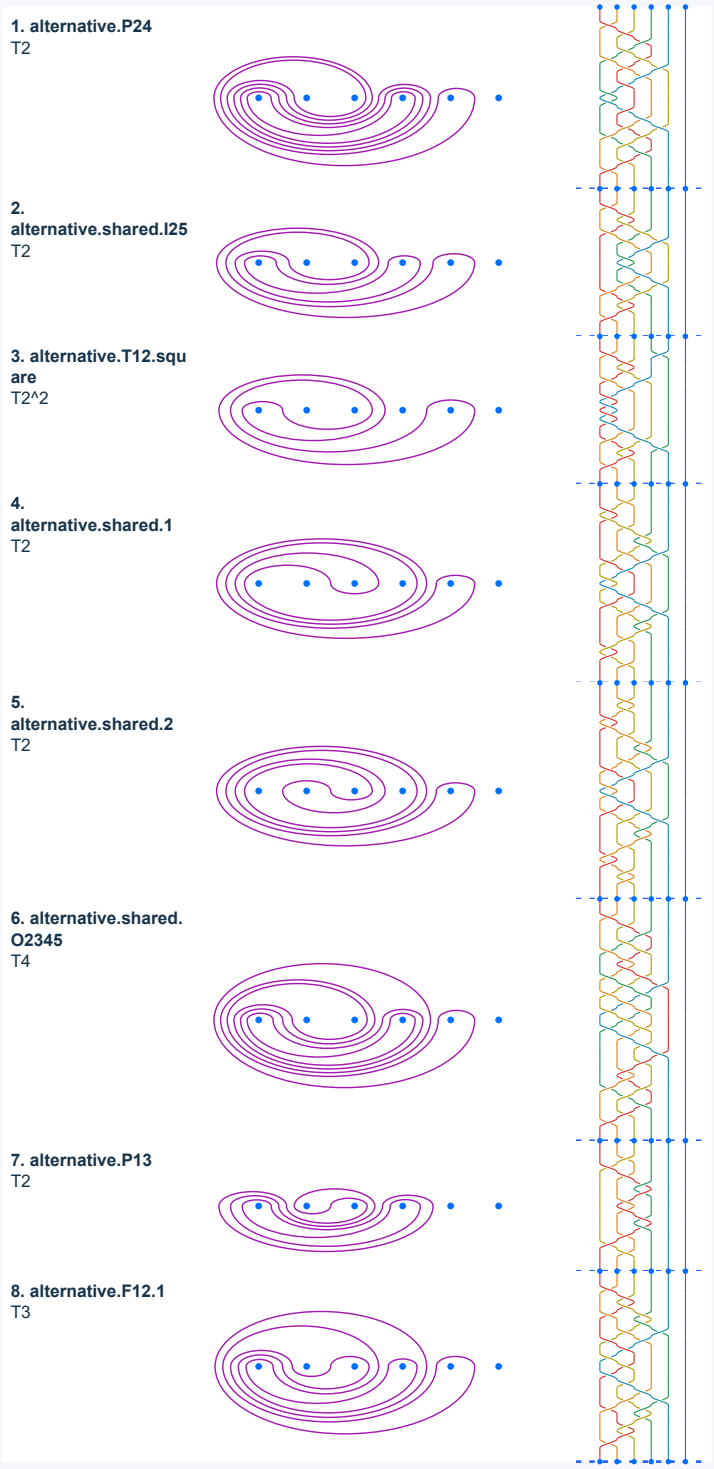

DISK MOVE: exact local free-word, based-action, or supported-class certificate retained.

0 unchanged displayed factors above; 7 below. Only the changed interval is shown. PARALLEL STEP 50: moves a, b are independent and each starts from the SAME input. Both orders are certified.

Before

After

3 - step 050a - continued

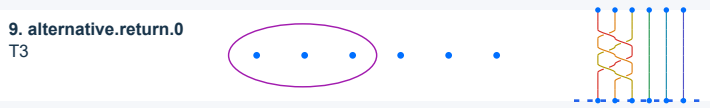

Carry the three-point root down through the eight residual factors

DISK MOVE: exact local free-word, based-action, or supported-class certificate retained.

0 unchanged displayed factors above; 7 below. Only the changed interval is shown. PARALLEL STEP 50: moves a, b are independent and each starts from the SAME input. Both orders are certified.

Before

After

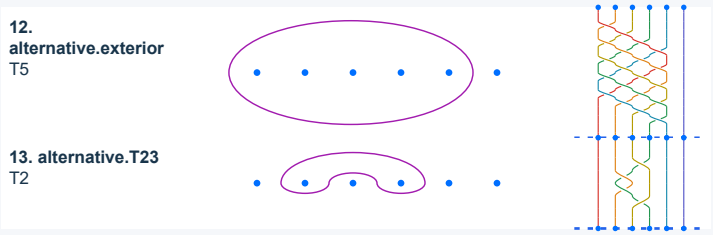

3 - step 050b

Commute the final pair petal past the visible exterior

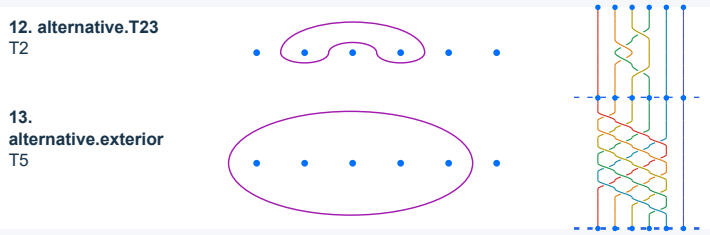

DISK MOVE: exact local free-word, based-action, or supported-class certificate retained.

11 unchanged displayed factors above; 3 below. Only the changed interval is shown. PARALLEL STEP 50: moves a, b are independent and each starts from the SAME input. Both orders are certified.

Before

After

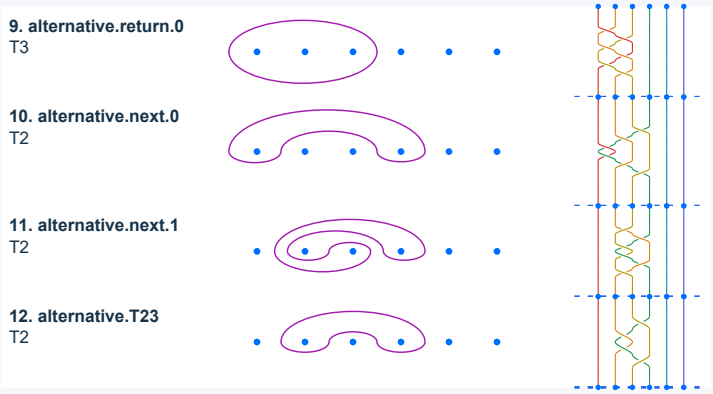

3 - step 051

Transported PC daisy closes the actual root and its three pair petals

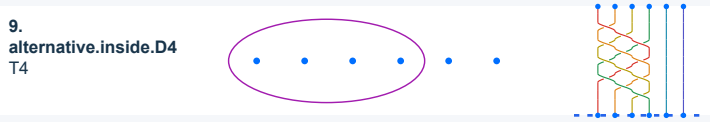

DISK MOVE: exact local free-word, based-action, or supported-class certificate retained.

8 unchanged displayed factors above; 4 below. Only the changed interval is shown.

Before

After

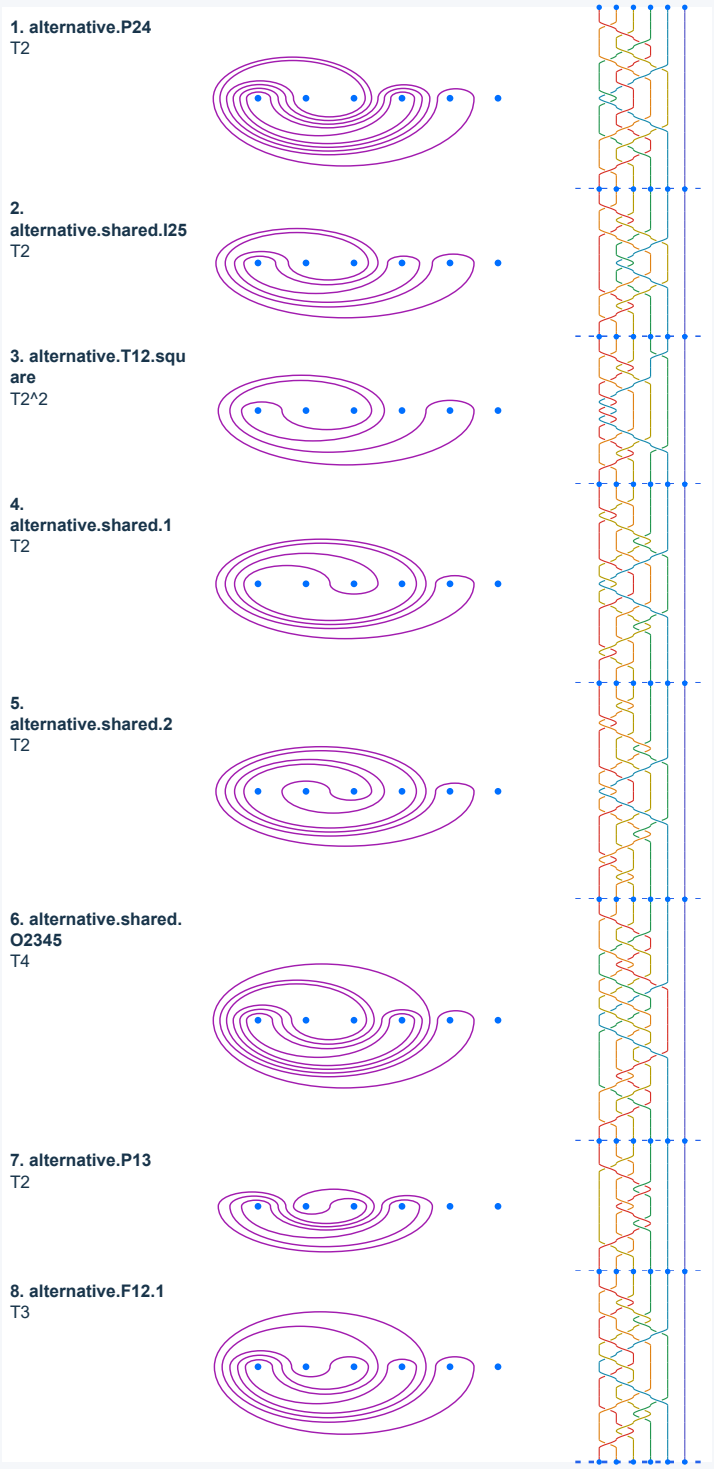

3 - step 052

Carry the new round four-point twist up to unwind the residual block

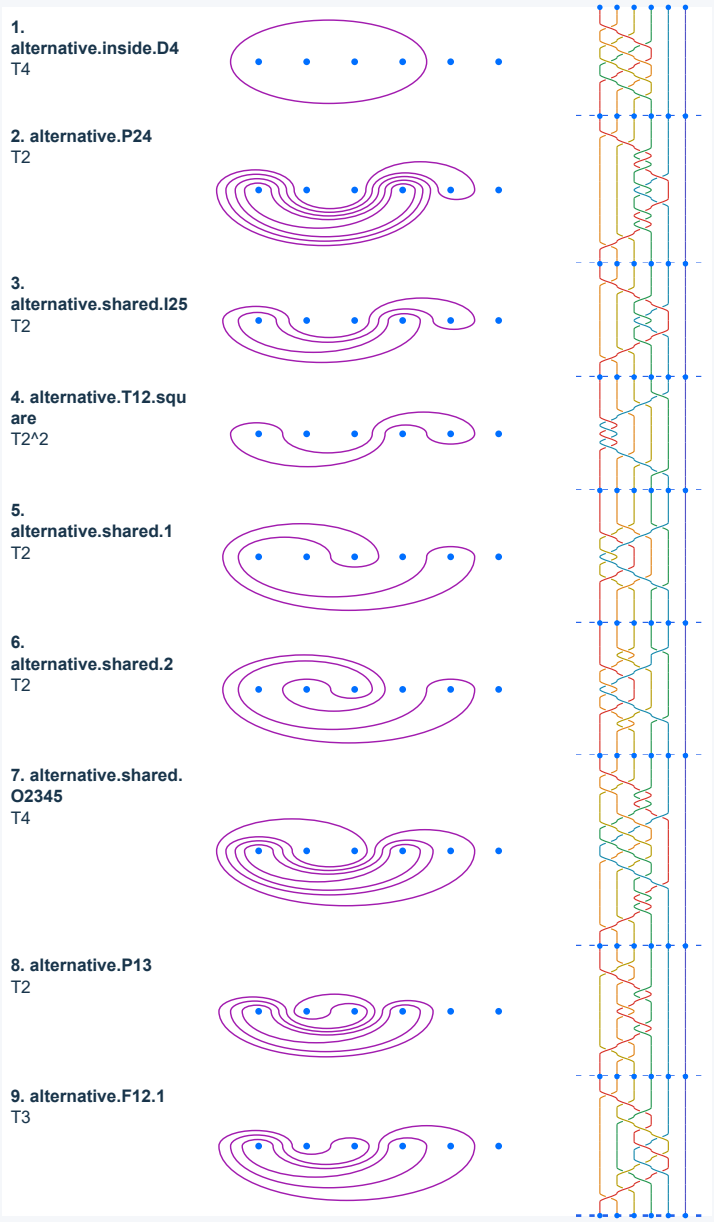

DISK MOVE: exact local free-word, based-action, or supported-class certificate retained.

0 unchanged displayed factors above; 4 below. Only the changed interval is shown.

Before

After

3 - step 052 - continued

Carry the new round four-point twist up to unwind the residual block

DISK MOVE: exact local free-word, based-action, or supported-class certificate retained.

0 unchanged displayed factors above; 4 below. Only the changed interval is shown.

Before

9.
alternative.inside.D4
T4

After

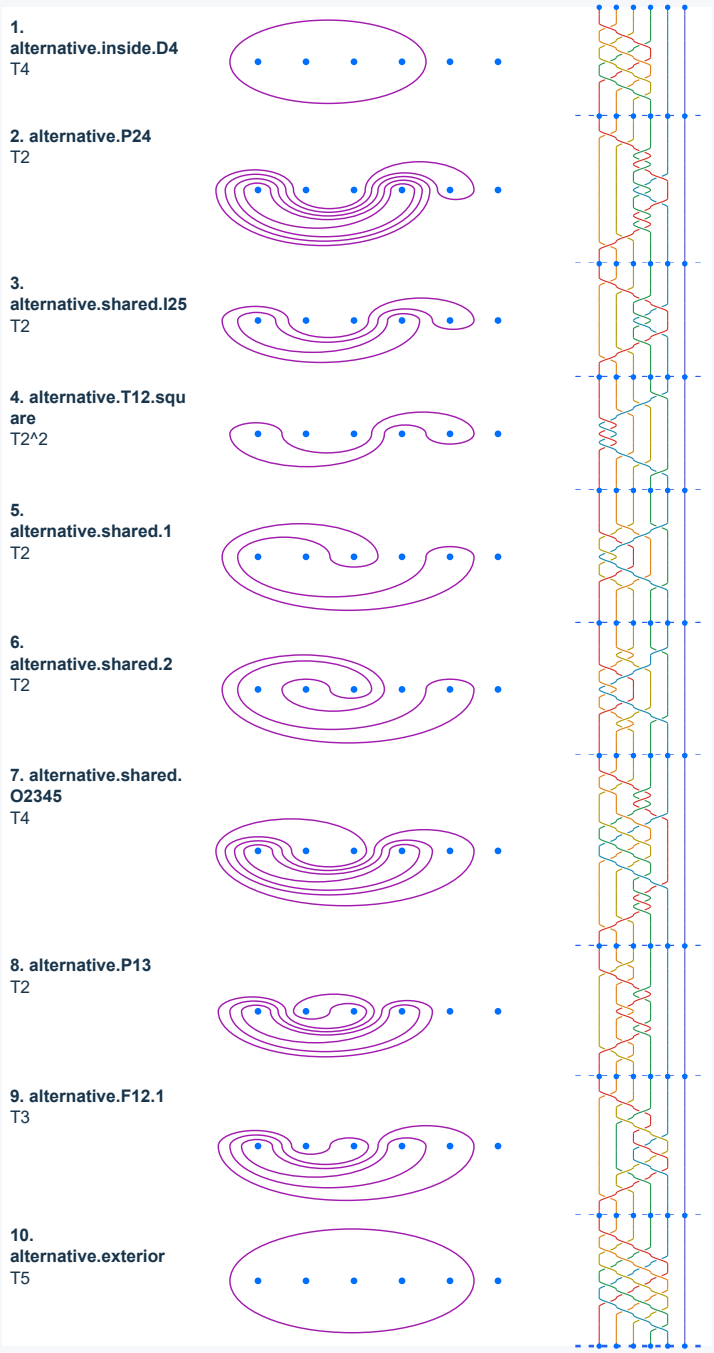

3 - step 053

ONE positive T45 lantern chart replaces the two former frames

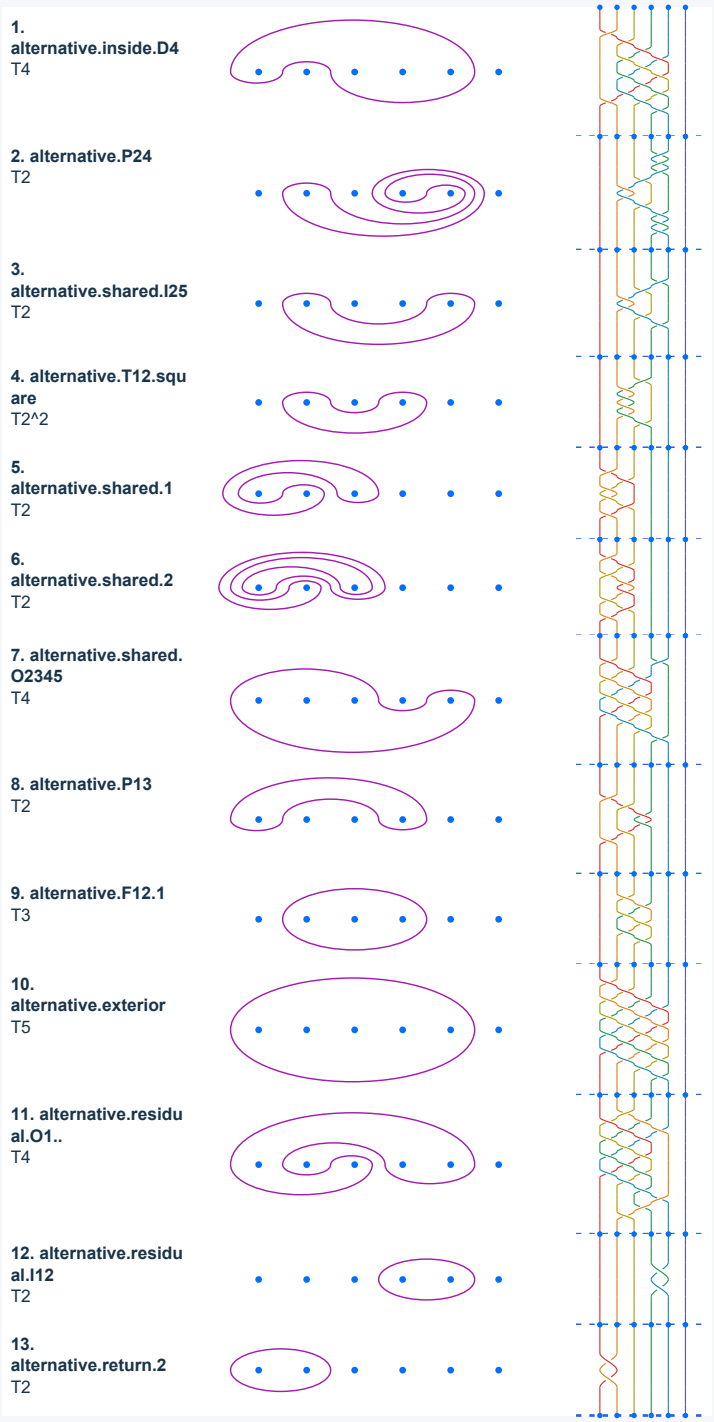

EXPLICIT GLOBAL CONJUGATION: a change of the whole product by the recorded frame.

0 unchanged displayed factors above; 0 below. Only the changed interval is shown.

Before

After

3 - step 053 - continued

ONE positive T45 lantern chart replaces the two former frames

EXPLICIT GLOBAL CONJUGATION: a change of the whole product by the recorded frame.

0 unchanged displayed factors above; 0 below. Only the changed interval is shown.

Before

After

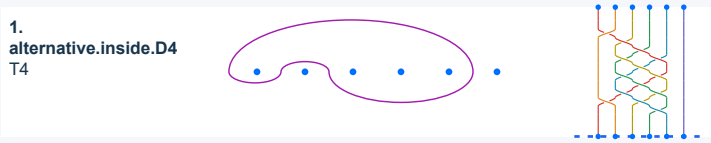

3 - step 054

The four-point PC daisy lends its actual three-point root

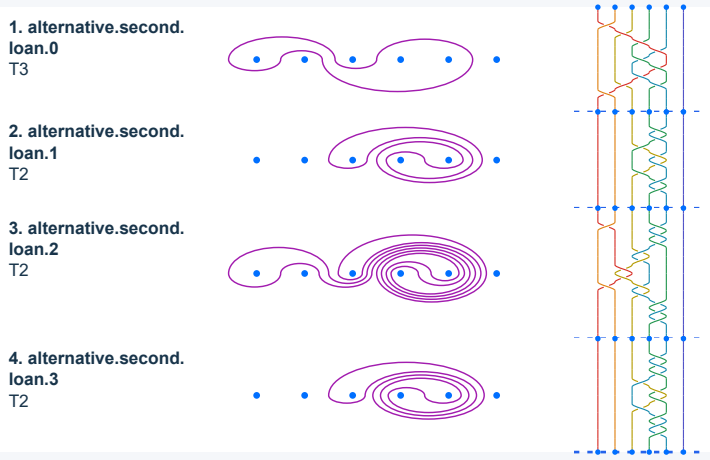

DISK MOVE: exact local free-word, based-action, or supported-class certificate retained.

0 unchanged displayed factors above; 12 below. Only the changed interval is shown.

Before

After

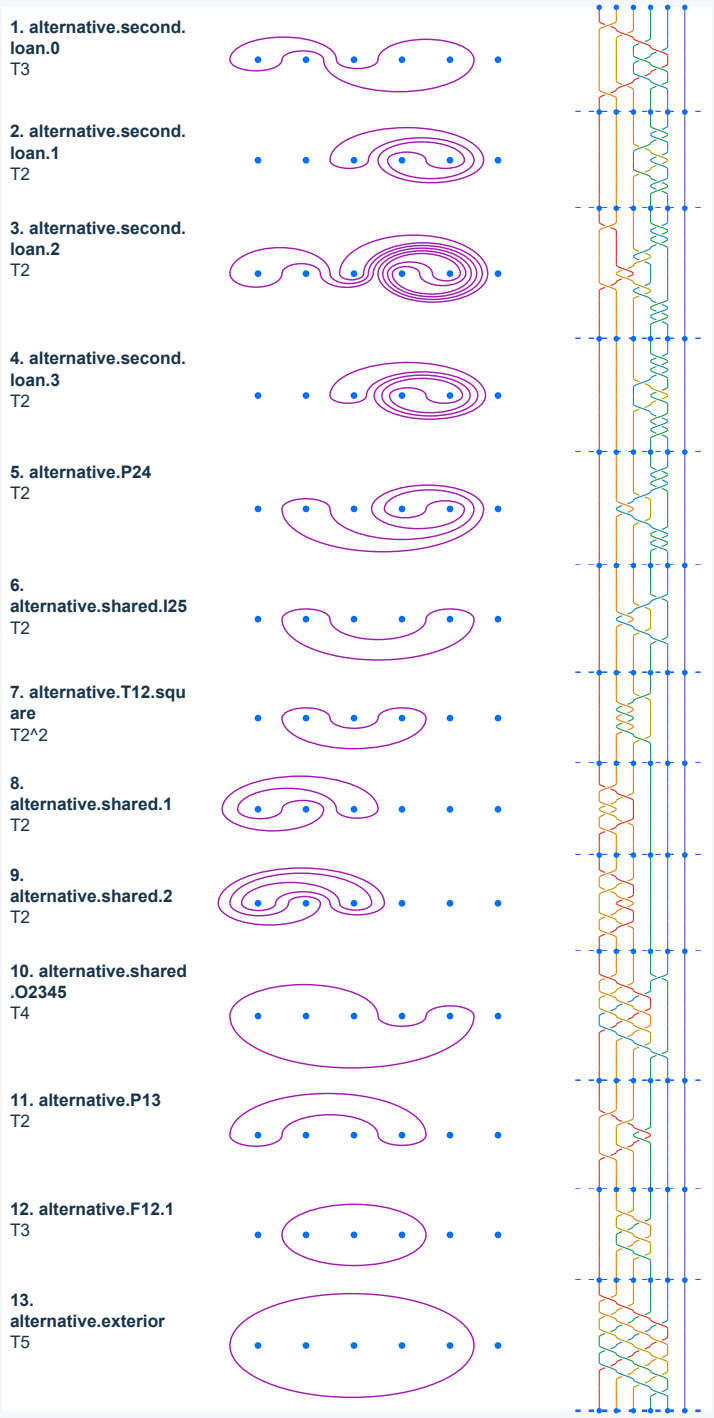

3 - step 055

Cyclic start at the actual pair that transports the borrowed root

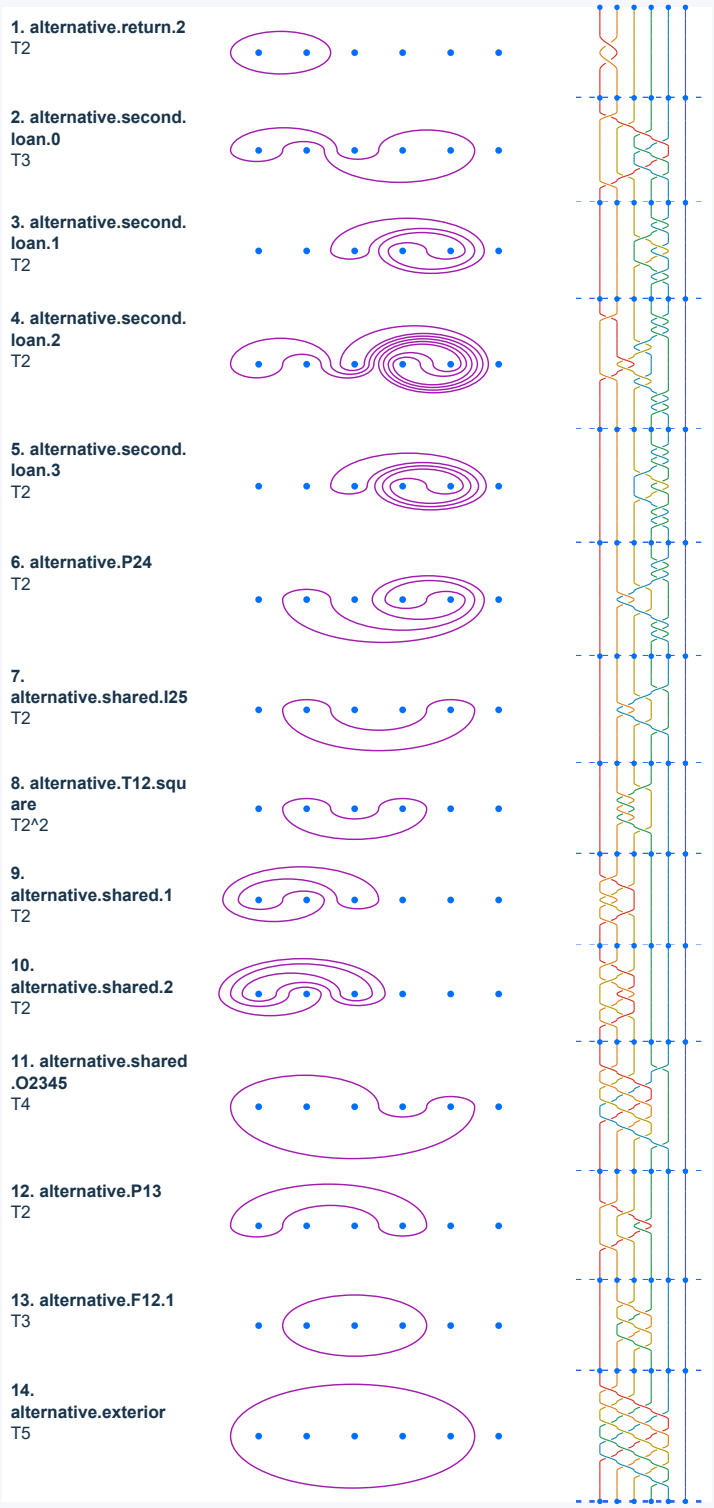

DISK MOVE: exact local free-word, based-action, or supported-class certificate retained.

0 unchanged displayed factors above; 0 below. Only the changed interval is shown.

Before

After

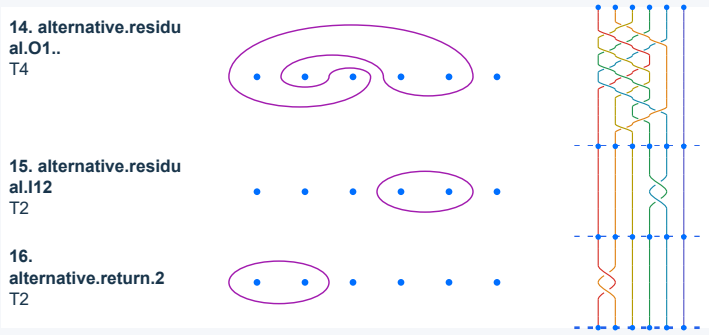

3 - step 055 - continued

Cyclic start at the actual pair that transports the borrowed root

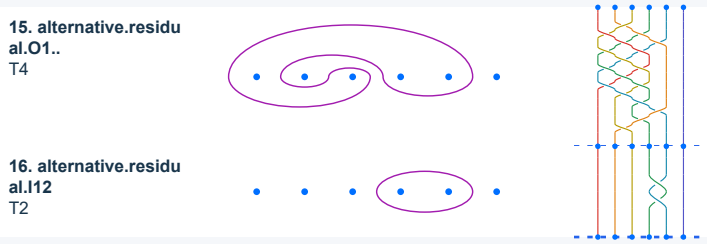

DISK MOVE: exact local free-word, based-action, or supported-class certificate retained.

0 unchanged displayed factors above; 0 below. Only the changed interval is shown.

Before

After

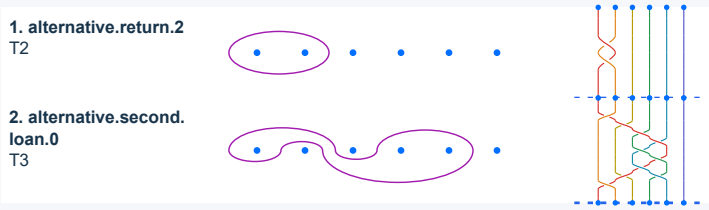

3 - step 056a

The actual pair carries the borrowed root to the exact missing class

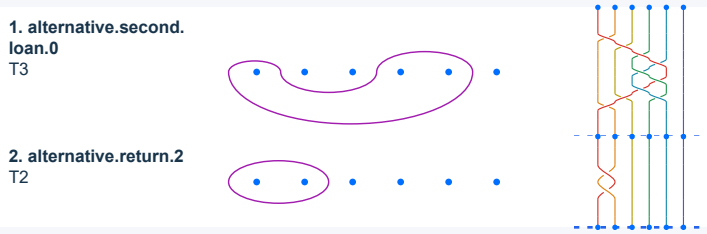

DISK MOVE: exact local free-word, based-action, or supported-class certificate retained.

0 unchanged displayed factors above; 14 below. Only the changed interval is shown. PARALLEL STEP 56: moves a, b are independent and each starts from the SAME input. Both orders are certified.

Before

After

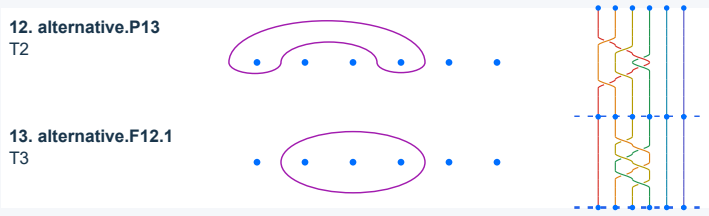

3 - step 056b

Bring the three-point curve up across one neighboring pair

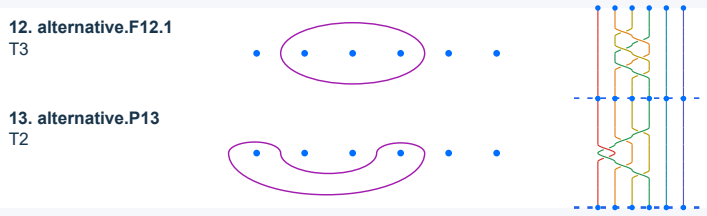

DISK MOVE: exact local free-word, based-action, or supported-class certificate retained.

11 unchanged displayed factors above; 3 below. Only the changed interval is shown. PARALLEL STEP 56: moves a, b are independent and each starts from the SAME input. Both orders are certified.

Before

After

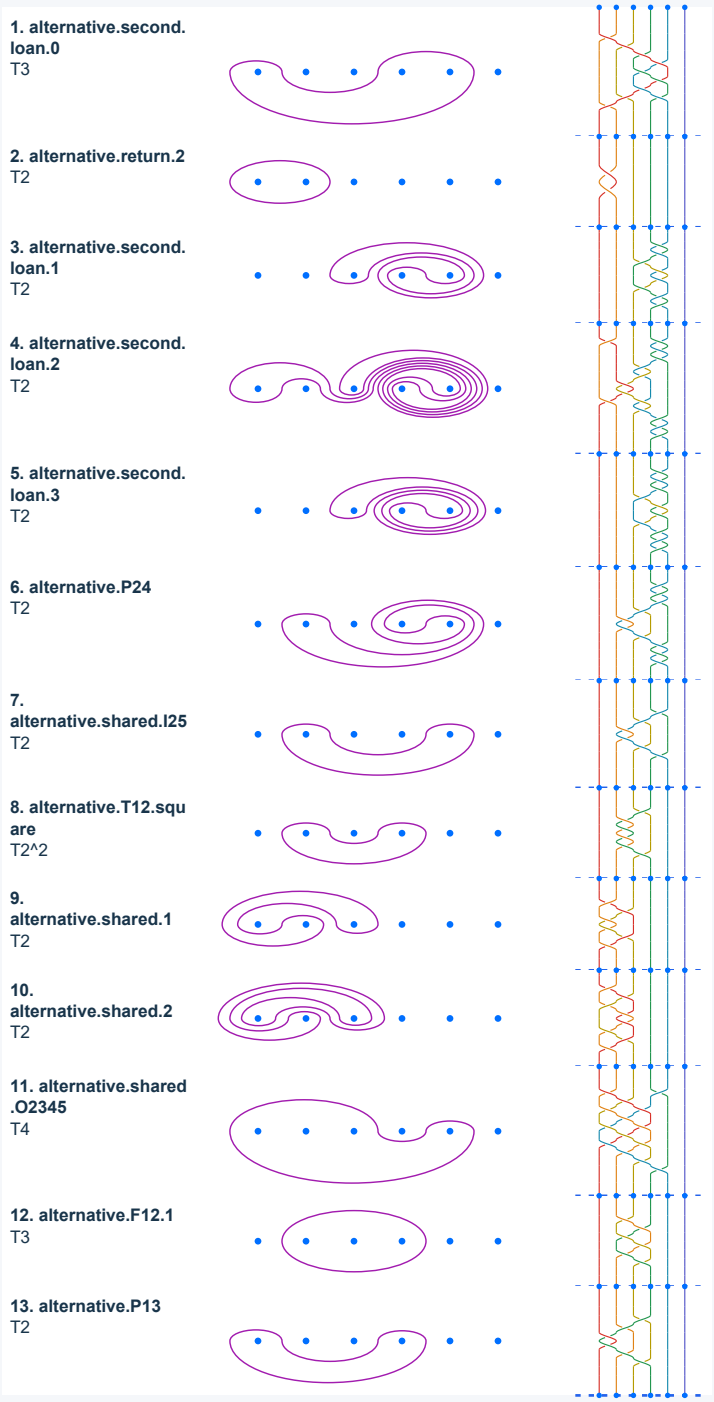

3 - step 057

Cyclic start at the matched four-point curve

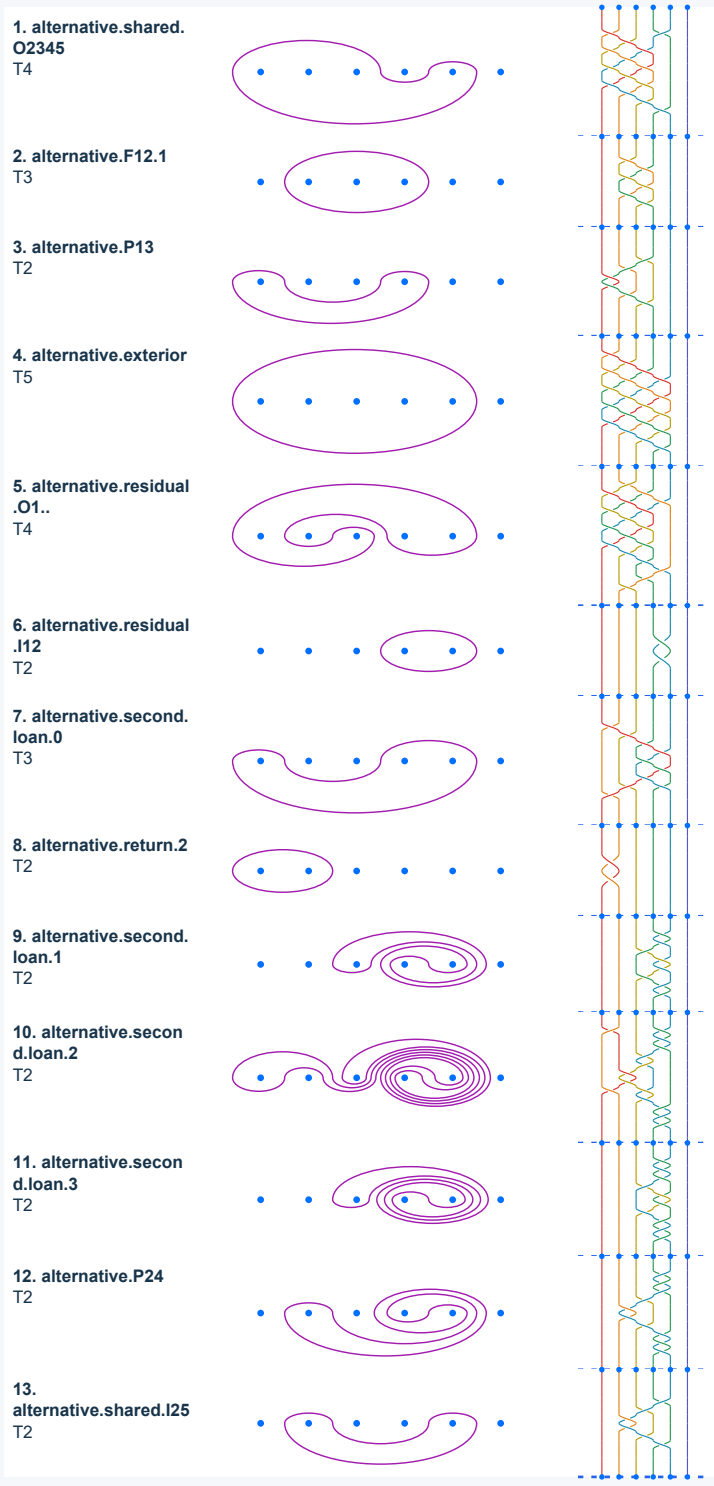

DISK MOVE: exact local free-word, based-action, or supported-class certificate retained.

0 unchanged displayed factors above; 0 below. Only the changed interval is shown.

Before

After

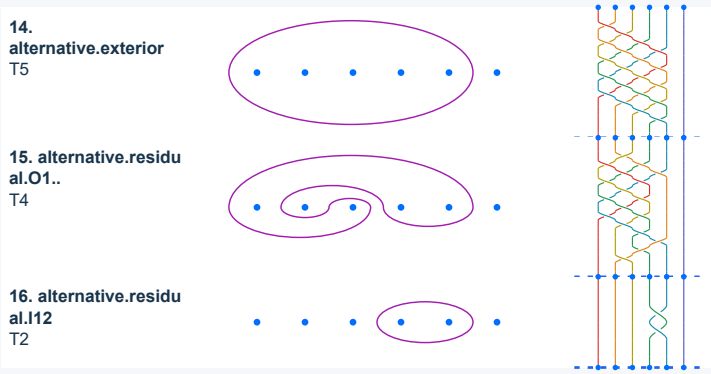

3 - step 057 - continued

Cyclic start at the matched four-point curve

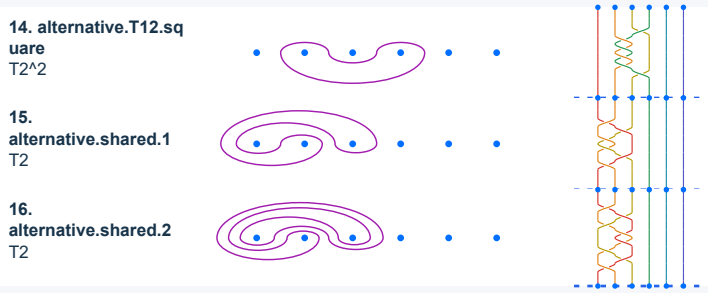

DISK MOVE: exact local free-word, based-action, or supported-class certificate retained.

0 unchanged displayed factors above; 0 below. Only the changed interval is shown.

Before

After

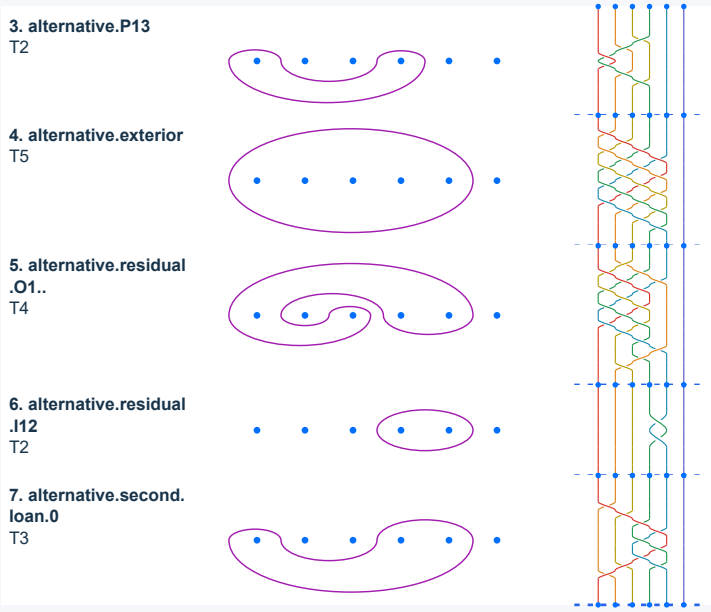

3 - step 058

Gather the borrowed root up the four-neighbor short side

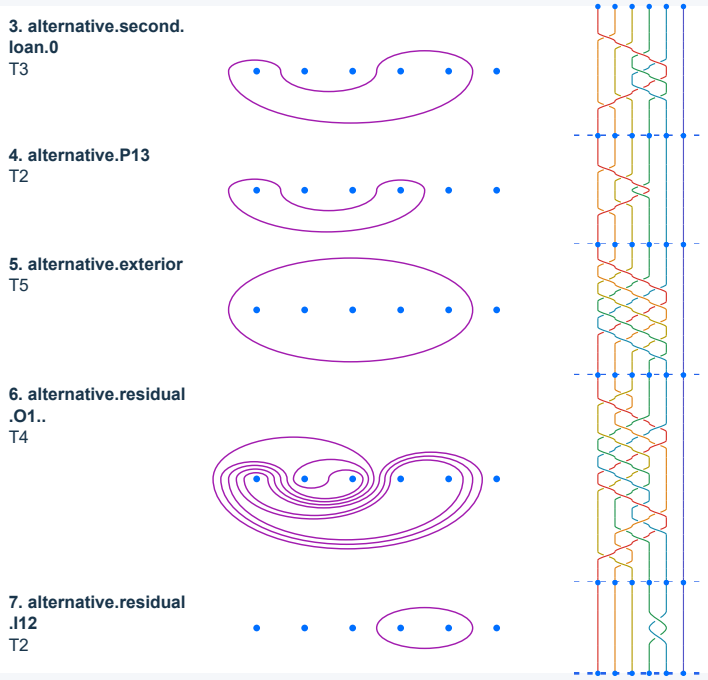

DISK MOVE: exact local free-word, based-action, or supported-class certificate retained.

2 unchanged displayed factors above; 9 below. Only the changed interval is shown.

Before

After

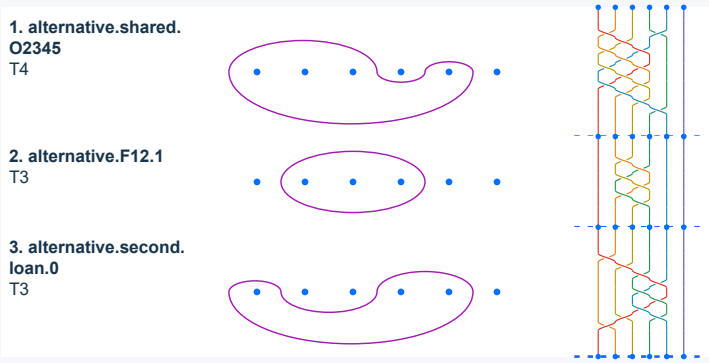

3 - step 059

Cabled PC lantern reaches a SECOND visible exterior twist

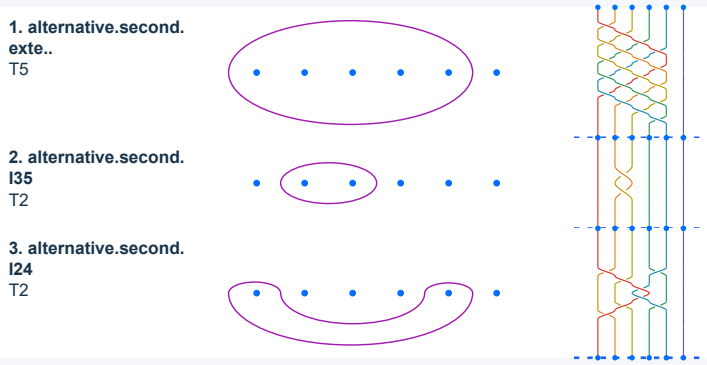

DISK MOVE: exact local free-word, based-action, or supported-class certificate retained.

0 unchanged displayed factors above; 13 below. Only the changed interval is shown.

Before

After

3 - step 060

Commute the exterior out of the expanded loan

DISK MOVE: exact local free-word, based-action, or supported-class certificate retained.

1 unchanged displayed factors above; 11 below. Only the changed interval is shown.

Before

After

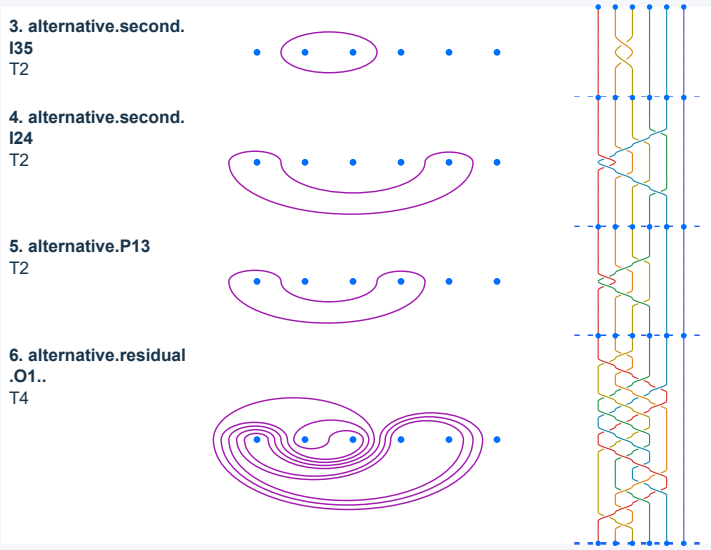

3 - step 061a

Inverse Hurwitz transport of the SAME outer past three petals

DISK MOVE: exact local free-word, based-action, or supported-class certificate retained.

2 unchanged displayed factors above; 10 below. Only the changed interval is shown. PARALLEL STEP 61: moves a, b are independent and each starts from the SAME input. Both orders are certified.

Before

After

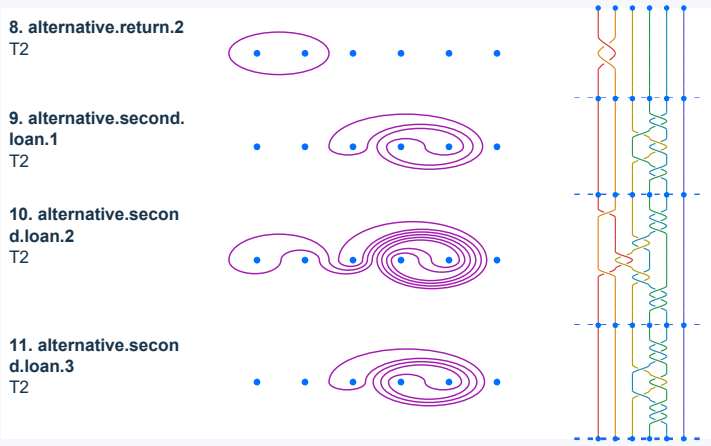

3 - step 061b

Return the12 petal through the three actual loan petals

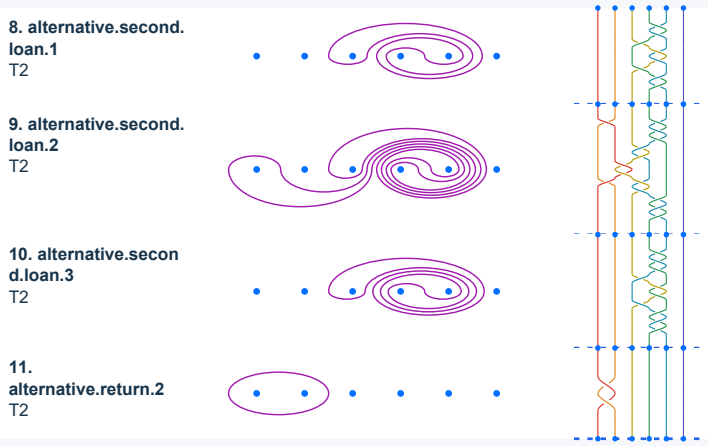

DISK MOVE: exact local free-word, based-action, or supported-class certificate retained.

7 unchanged displayed factors above; 5 below. Only the changed interval is shown. PARALLEL STEP 61: moves a, b are independent and each starts from the SAME input. Both orders are certified.

Before

After

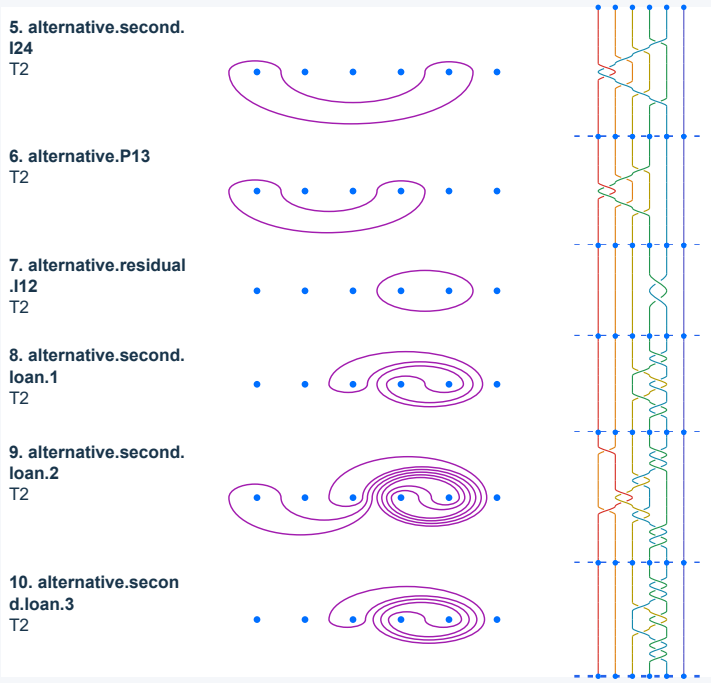

3 - step 062

Expanded PC rose returns the loan WITHOUT a petal reorder

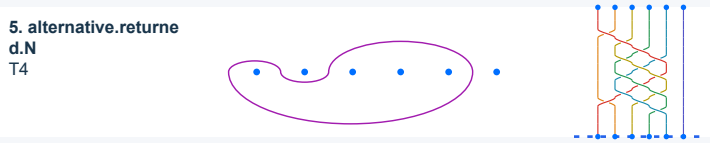

DISK MOVE: exact local free-word, based-action, or supported-class certificate retained.

4 unchanged displayed factors above; 6 below. Only the changed interval is shown.

Before

After

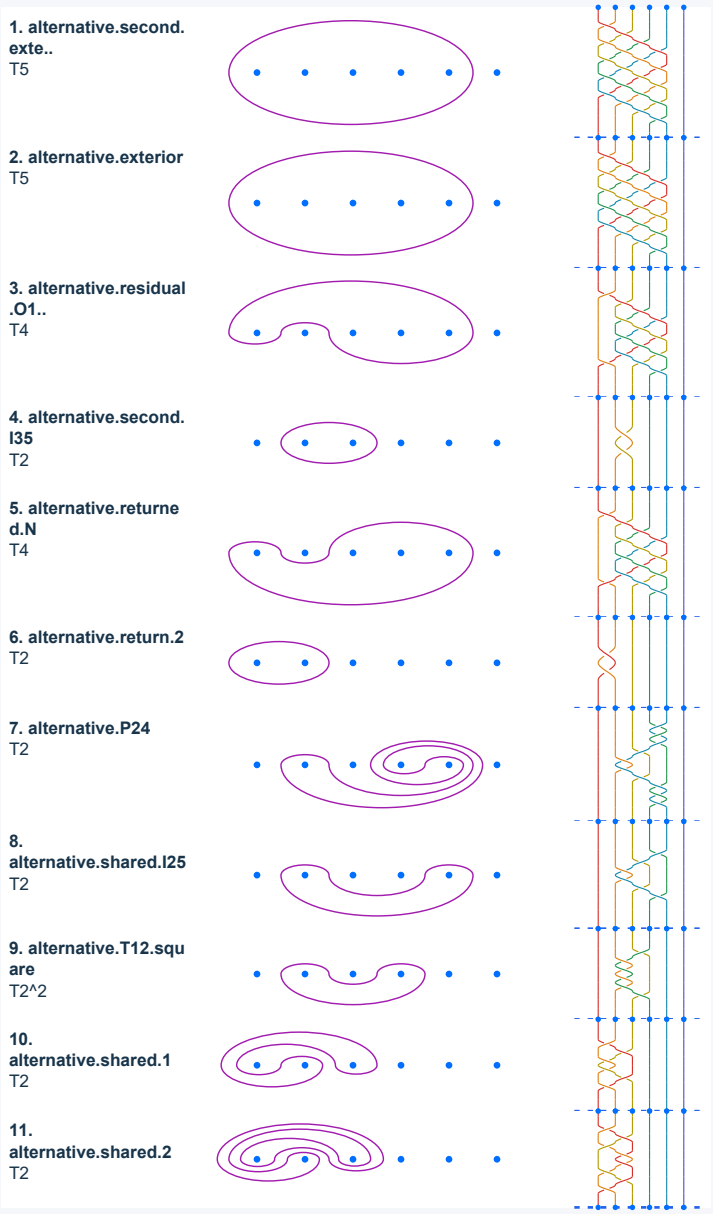

3 - step 063

Cyclic start BEFORE gathering the first daisy

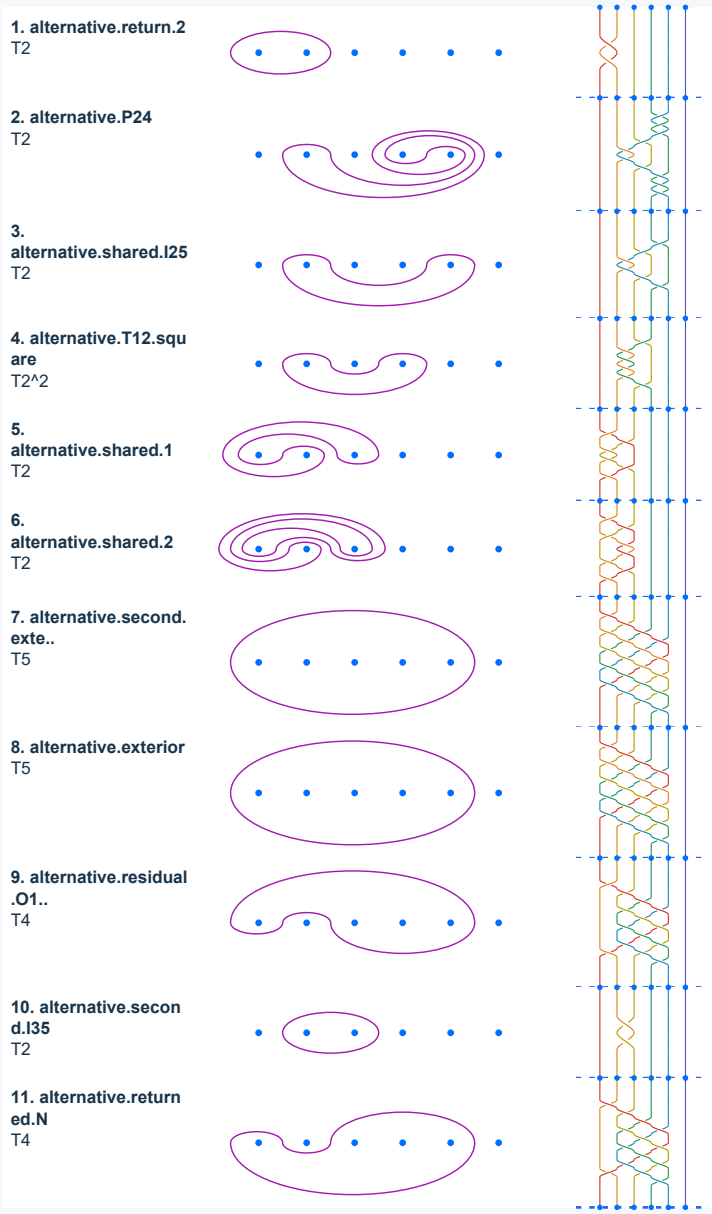

DISK MOVE: exact local free-word, based-action, or supported-class certificate retained.

0 unchanged displayed factors above; 0 below. Only the changed interval is shown.

Before

After

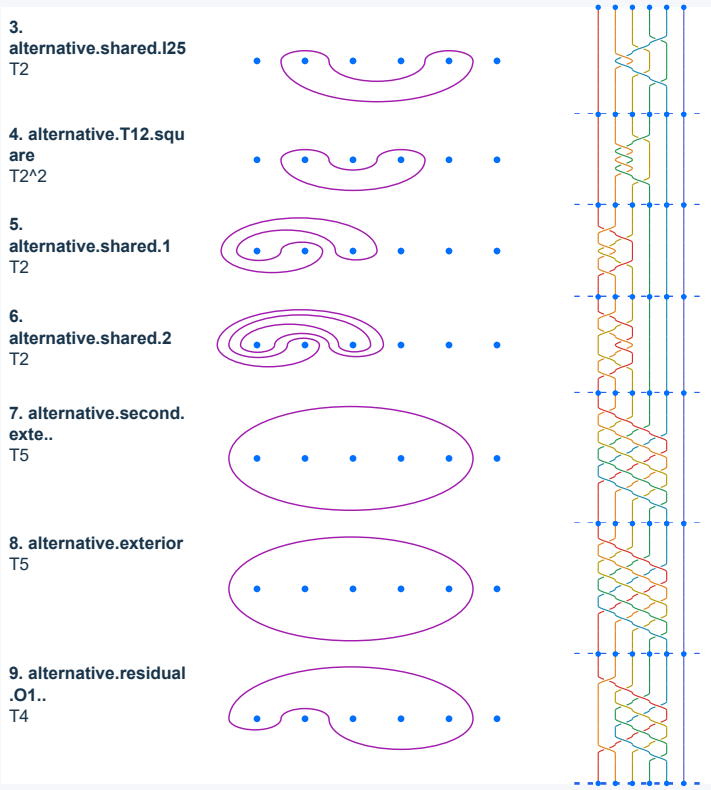

3 - step 064

Carry the SAME outer UP through its first-daisy petals

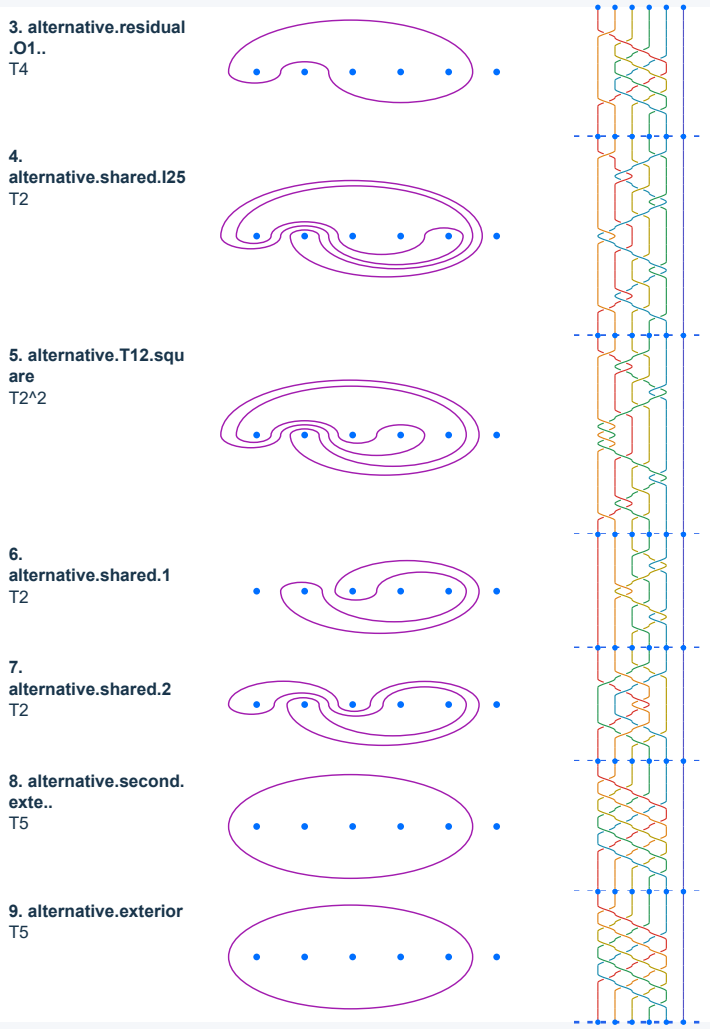

DISK MOVE: exact local free-word, based-action, or supported-class certificate retained.

2 unchanged displayed factors above; 2 below. Only the changed interval is shown.

Before

After

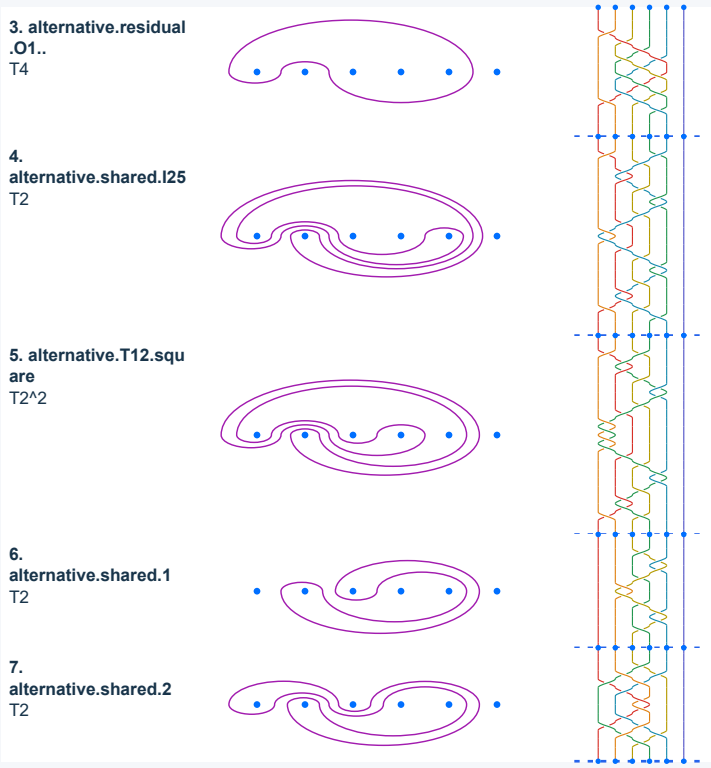

3 - step 065

PC daisy extracts the exterior DIRECTLY from the squared petal

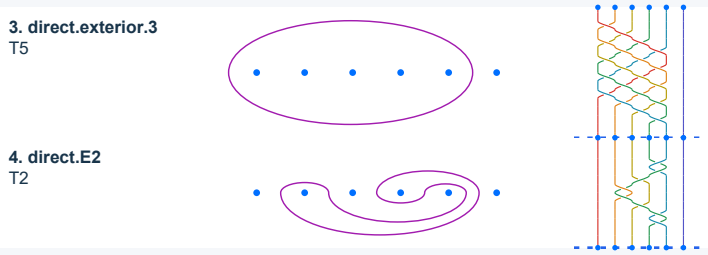

DISK MOVE: exact local free-word, based-action, or supported-class certificate retained.

2 unchanged displayed factors above; 4 below. Only the changed interval is shown.

Before

After

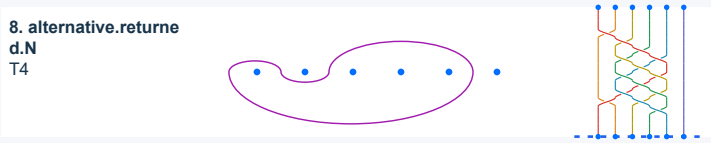

3 - step 066

The retained outer lends 45 in its checked internal chart

DISK MOVE: exact local free-word, based-action, or supported-class certificate retained.

7 unchanged displayed factors above; 0 below. Only the changed interval is shown.

Before

After

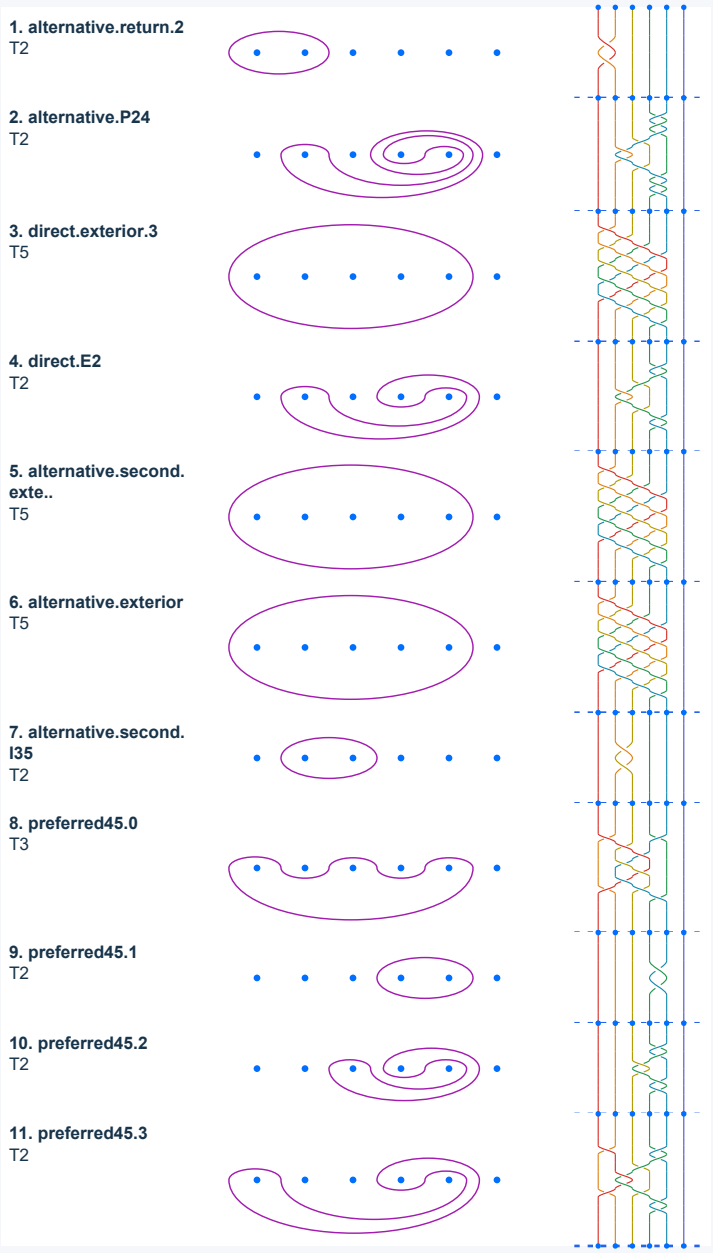

3 - step 067

Cyclic start at preferred45.1

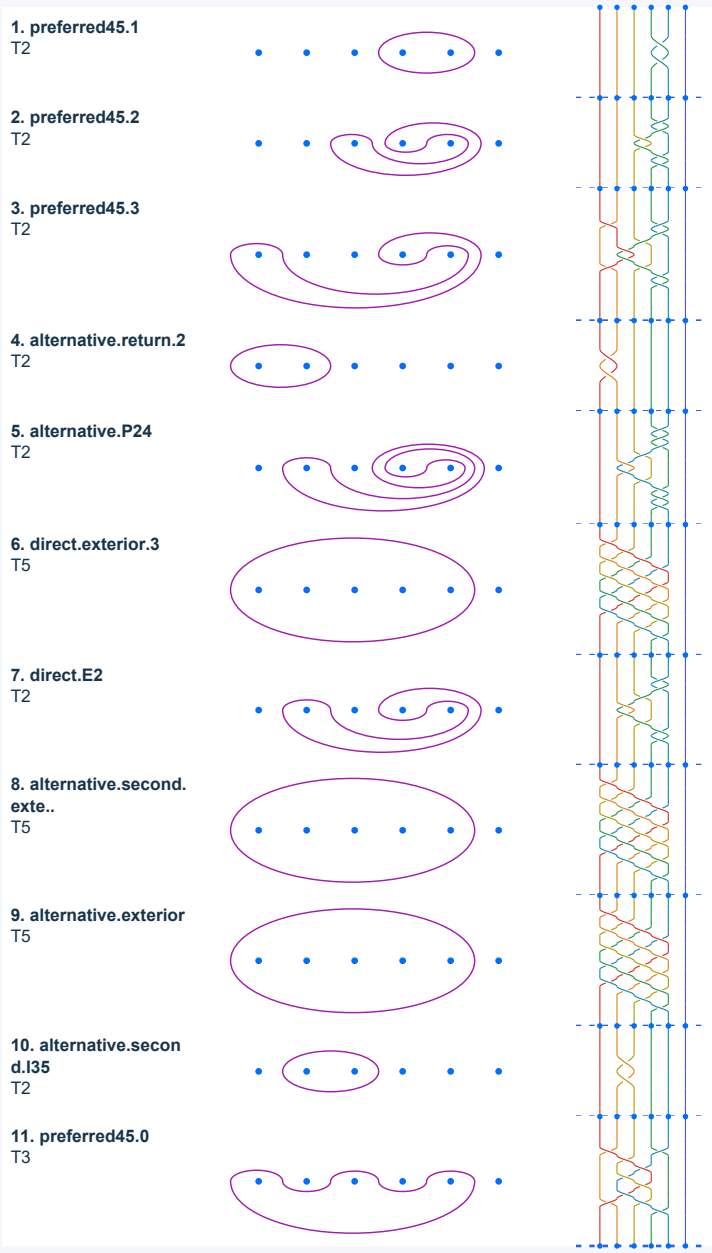

DISK MOVE: exact local free-word, based-action, or supported-class certificate retained.

0 unchanged displayed factors above; 0 below. Only the changed interval is shown.

Before

After

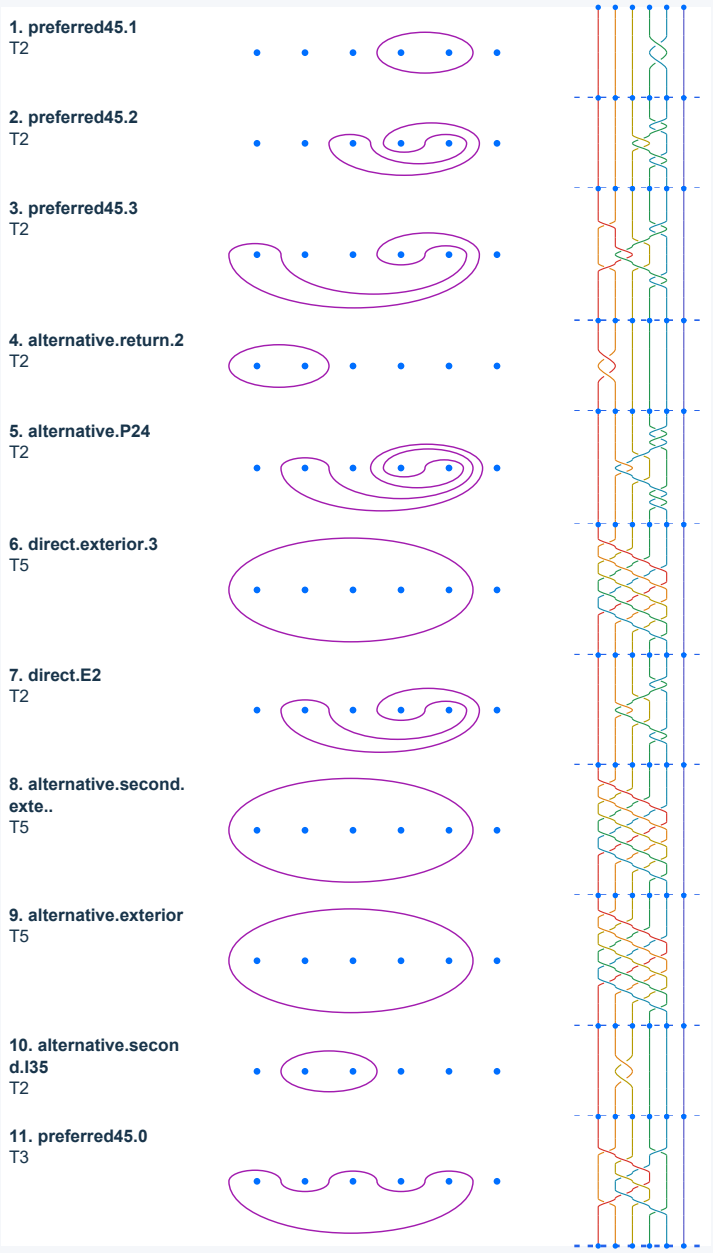

3 - step 068

Carry the SAME round 45 DOWN through all ten actual neighbors

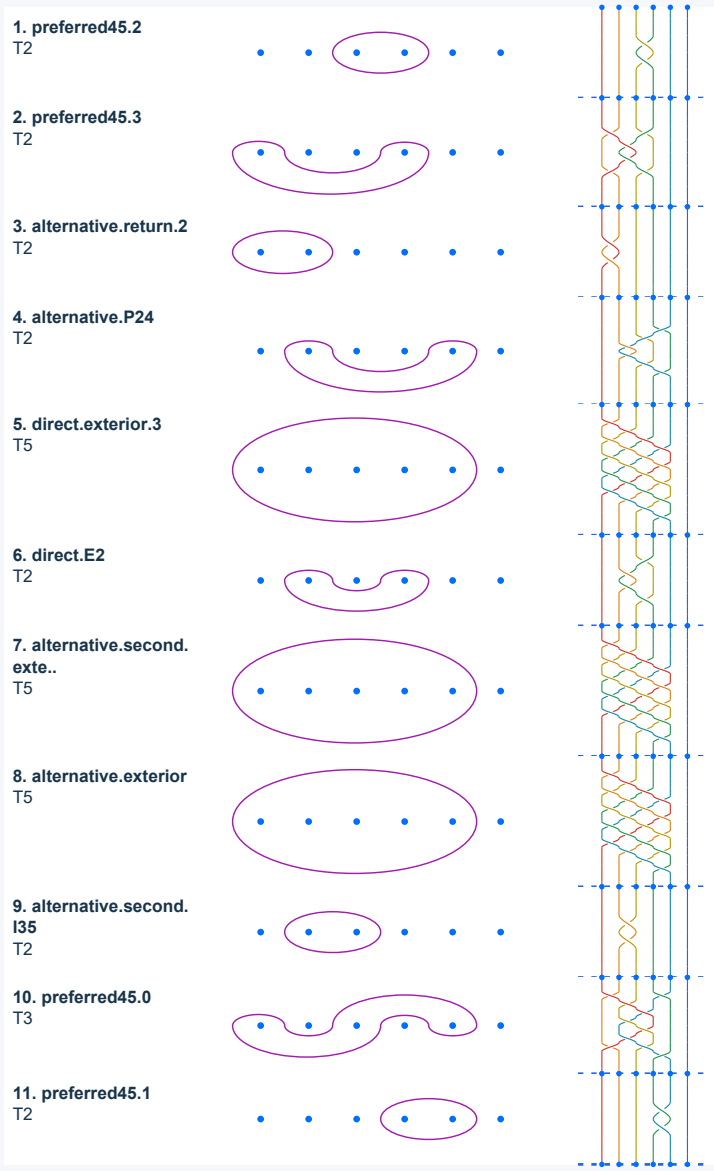

DISK MOVE: exact local free-word, based-action, or supported-class certificate retained.

0 unchanged displayed factors above; 0 below. Only the changed interval is shown.

Before

After

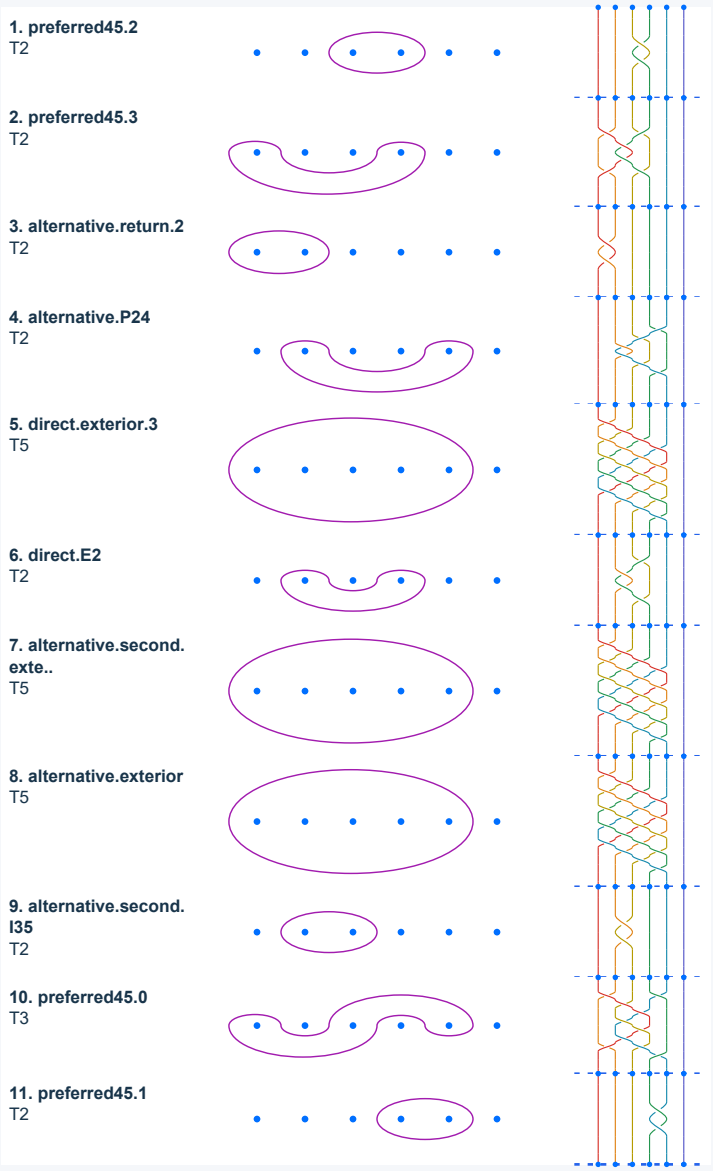

3 - step 069

Cyclic start at preferred45.0

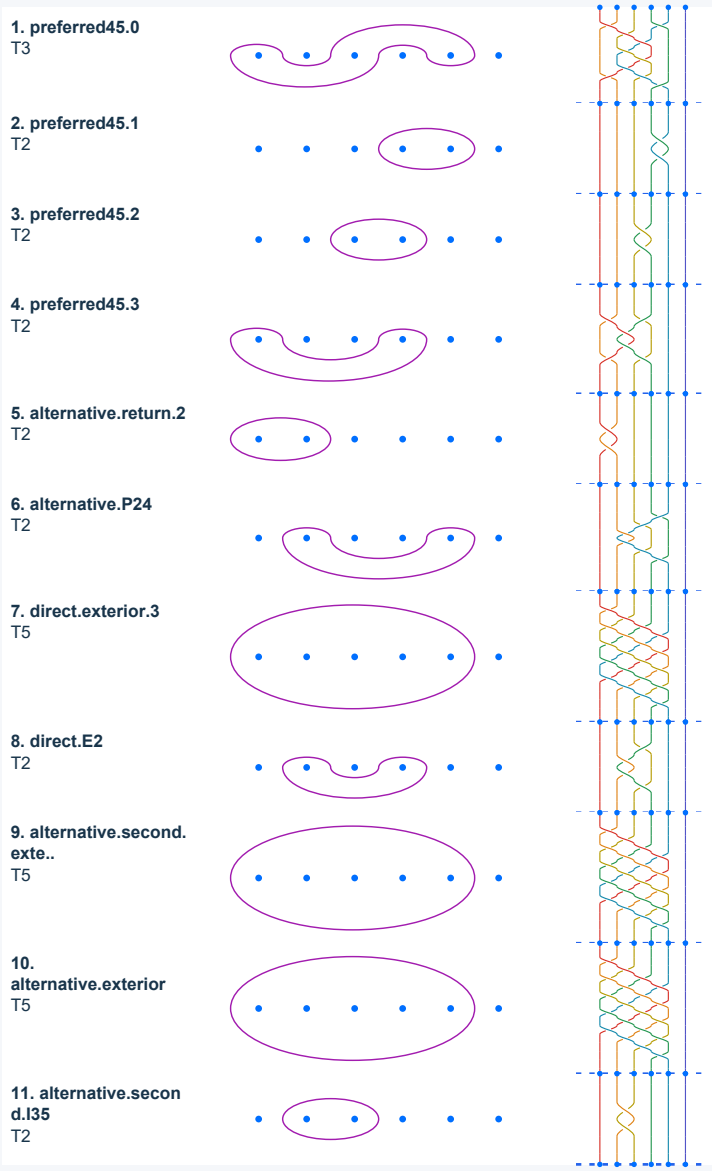

DISK MOVE: exact local free-word, based-action, or supported-class certificate retained.

0 unchanged displayed factors above; 0 below. Only the changed interval is shown.

Before

After

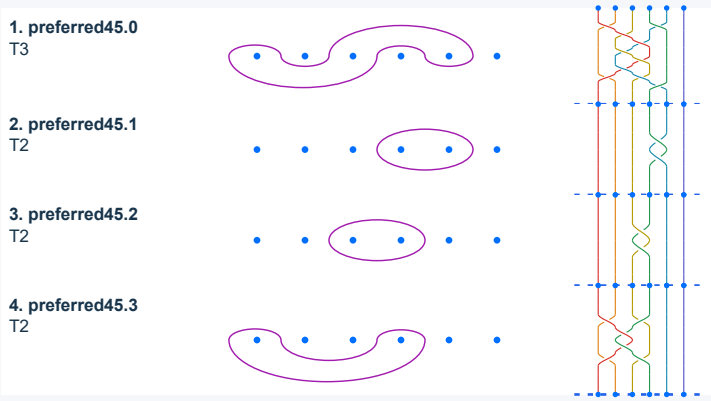

3 - step 070a

Return the SAME source outer through the full changed donor daisy

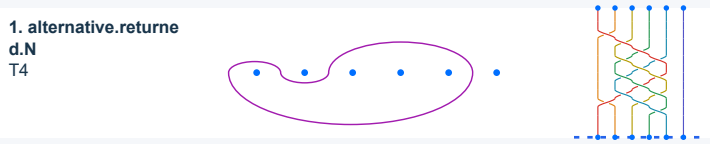

DISK MOVE: exact local free-word, based-action, or supported-class certificate retained.

0 unchanged displayed factors above; 7 below. Only the changed interval is shown. PARALLEL STEP 70: moves a, b are independent and each starts from the SAME input. Both orders are certified.

Before

After

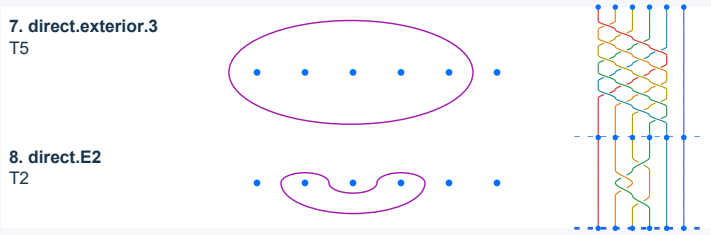

3 - step 070b

SAME short 24 UP across one commuting exterior

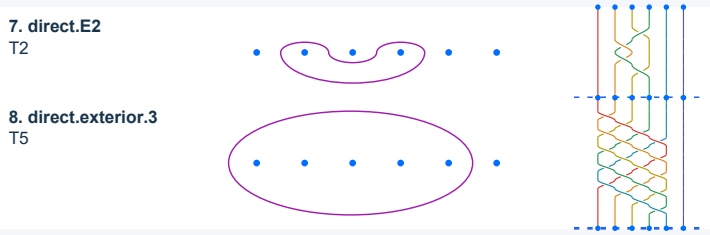

DISK MOVE: exact local free-word, based-action, or supported-class certificate retained.

6 unchanged displayed factors above; 3 below. Only the changed interval is shown. PARALLEL STEP 70: moves a, b are independent and each starts from the SAME input. Both orders are certified.

Before

After

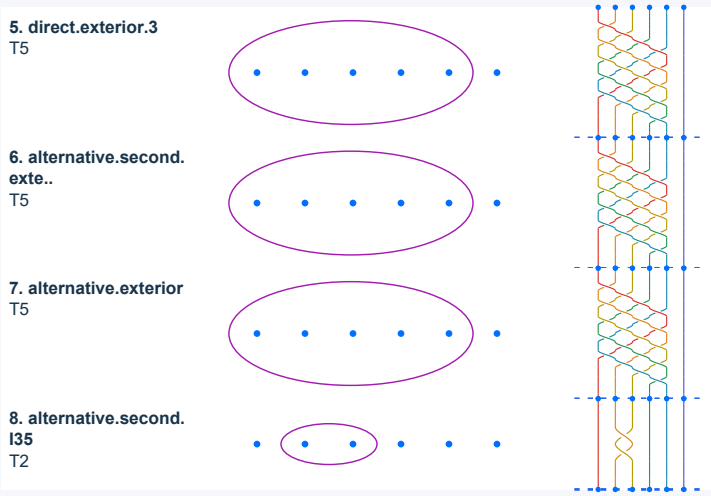

3 - step 071

SAME round 23 UP across three commuting exteriors

DISK MOVE: exact local free-word, based-action, or supported-class certificate retained.

4 unchanged displayed factors above; 0 below. Only the changed interval is shown.

Before

After

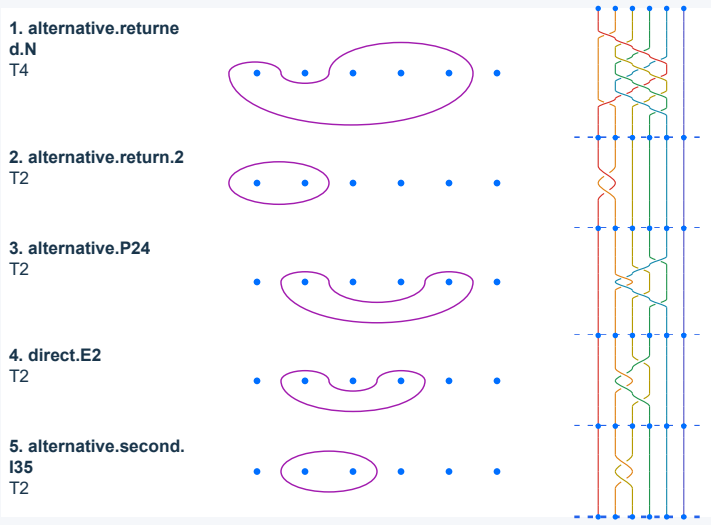

3 - step 072

FIVE short actual inputs contract by the twice-modified D5 daisy

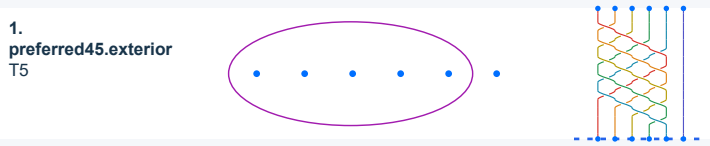

DISK MOVE: exact local free-word, based-action, or supported-class certificate retained.

0 unchanged displayed factors above; 3 below. Only the changed interval is shown.

Before

After

IV. The terminal redraw and peripheral cleanup

Every substitution and sphere redraw is separate. Independent moves share a step number; their individual diagrams remain visible.

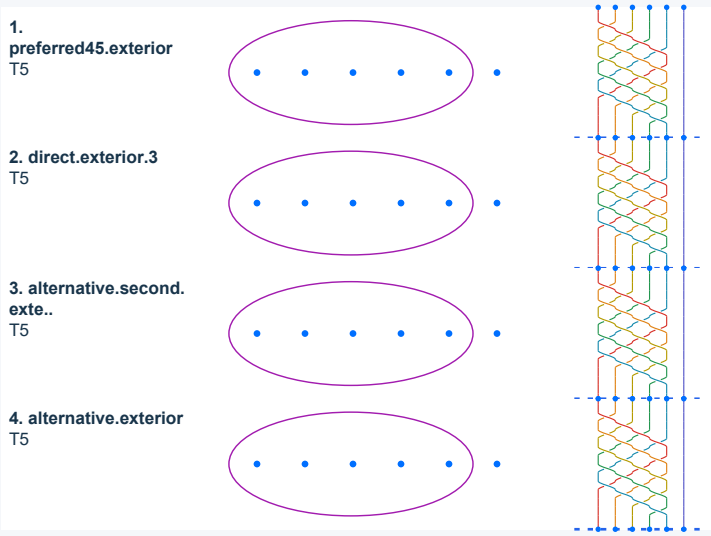

4 - step 073

Combine the FOUR actual visible standard exterior twists

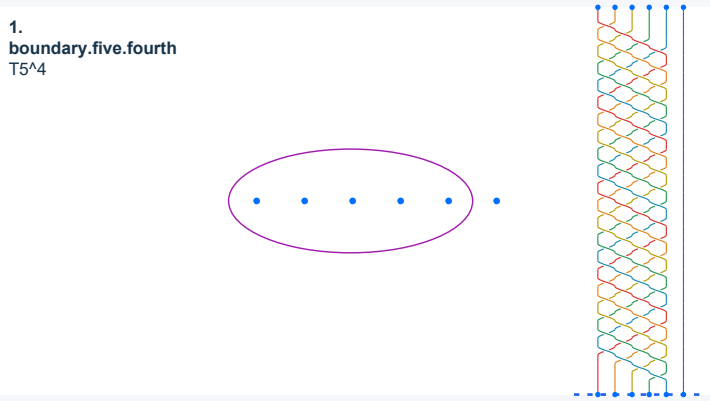

DISK MOVE: exact local free-word, based-action, or supported-class certificate retained.

0 unchanged displayed factors above; 0 below. Only the changed interval is shown.

Before

After

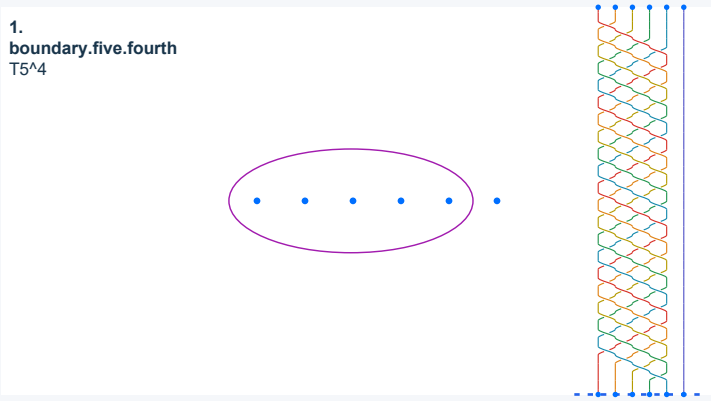

4 - step 074

Redraw the FOURTH-power exterior curve around point6

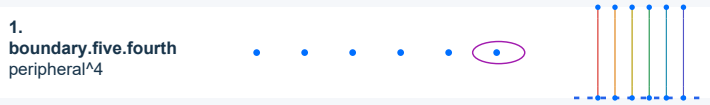

SPHERE REDRAW ONLY: the same curve or arc, with the same factor and power. Framing ledger retained separately.

0 unchanged displayed factors above; 0 below. Only the changed interval is shown. REDRAW ONLY: factor identity, position, power and sphere curve are retained.

Before

After

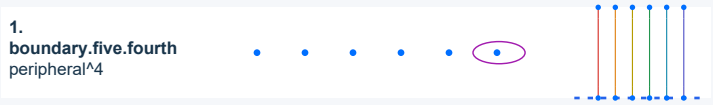

4 - step 075

Remove the already-peripheral FOURTH-power twist

PERIPHERAL CLEANUP: the curve has already been redrawn around one point; its even powered twist is trivial in the chosen lift.

0 unchanged displayed factors above; 0 below. Only the changed interval is shown.

Before

After

Identity / no factors in this interval.

V. Full sphere-redraw discrepancies

Every genuine sphere redraw is listed below. Each has the same geometric curve, an explicit full disk discrepancy, exact marked-sphere action and corrected chosen +I lift. The framing ledger is included in the full word.

SPHERE REDRAW at step 011

Redraw ONE outer curve from its complementary side

Drawing change only; no lantern or other substitution is included. The corrected full discrepancy has exact sphere action and chosen +I lift.

FULL DISK DISCREPANCY including ledger (52 signed letters)

Certificates and scope

Preferred graphical route:
https://richardbuckman-math.github.io/surface-diagrams/docs/proofs/six-seven-fifty-blocks/index.html?phase=clearfull

Clarity certificates: clarity-certificate.json. The archived 79-operation source, the longer early prefix, and all their named-pattern witnesses remain unchanged in certificate.json / named_full_route.

106 moves are displayed in 75 certified independent steps. This is a presentation structure, not a mathematical-shortening claim. All source Hurwitz checks, named witnesses, signed PC balances and nonabelian kernels remain referenced.

The first lantern is now an exact disk substitution with its four-point outer retained. The following sphere move only redraws that ONE outer curve as its complementary pair. Framing corrections in the later chart are held in a separate explicit ledger. Peripheral deletion always follows its own curve redraw.

The thirteen genuine sphere redraws retain full discrepancies and corrected lifts. Four other chart redraws are already disk equalities. No standalone odd exterior cap is used. The archive 125-page/177-step PDF remains unchanged.

Priority: favor simpler arcs and curves and less tangled interactions, even when more moves are needed. Parallel steps require actual independence, not a smaller number of navigation labels.

Round 45 loan source: six-seven-preferred-late45.json. The actual retained outer returns literally; all source input/output charts, signed PC balances and full nonabelian kernels AND shadows remain explicit. The half-meeting 101/71 edition is pinned as clarity-half-meeting-certificate.json / display-half-meeting.json / six-seven-named-half-meeting.pdf.

Independent jointly certified six-point / five-arc comparison
